Advances in Networked-based Information Systems Leonard Barolli,2023-08-23 The networks and information systems of today are evolving rapidly. There are new trends and applications in information networking such as wireless sensor networks, ad hoc networks, peer-to-peer systems, vehicular networks, opportunistic networks, grid and cloud computing, pervasive and ubiquitous computing, multimedia systems, security, multi-agent systems, high-speed networks, and web-based systems. These kinds of networks need to manage the increasing number of users, provide support for different services, guarantee the QoS, and optimize the network resources. For these networks, there are many research issues and challenges that should be considered and find solutions. The aim of the book is to provide latest research findings, innovative research results, methods, and development techniques from both theoretical and practical perspectives related to the emerging areas of information networking and their applications.

Multi-Axis Spindle Turning Barbara Dill,2018 Master the art of multi-axis spindle turning! This book offers a strategy for understanding multi-axis turning and the many options available to create unique forms. Dill, a self-professed experimental turner, takes readers step by step through this complex area of turning. Working in multiple axes on a spindle can be confusing, but as Dill teaches the hows of turning spindles as systematic building blocks for future work, turners can finally make this skill their own. Hundreds of photos and diagrams offer detailed guidance, and explain the variables--axis placement, profile, orientation of the new axis to the center axis, and so on--and how they apply to each quadrant of multi-axis work. Split and thermed turning methods, planning tips, tricks of the trade, and a three-sided cup or vase project help you succeed. Concepts come to life as Dill shows examples of not only her work, but the work of other expert turners.

Computer Vision -- ECCV 2010 Kostas Daniilidis,Petros Maragos,Nikos Paragios,2010-09-08 The 2010 edition of the European Conference on Computer Vision was held in Heraklion, Crete. The call for papers attracted an absolute record of 1,174 submissions. We describe here the selection of the accepted papers: Thirty-eight area chairs were selected coming from Europe (18), USA and Canada (16), and Asia (4). Their selection was based on the following criteria: (1) Researchers who had served at least two times as Area Chairs within the past two years at major vision conferences were excluded; (2) Researchers who served as Area Chairs at the 2010 Computer Vision and Pattern Recognition were also excluded (exception: ECCV 2012 Program Chairs); (3) Minimization of overlap introduced by Area Chairs being former student and advisors; (4) 20% of the Area Chairs had never served before in a major conference; (5) The Area Chair selection process made all possible efforts to achieve a reasonable geographic distribution between countries, thematic areas and trends in computer vision. Each Area Chair was assigned by the Program Chairs between 28–32 papers. Based on paper content, the Area Chair recommended up to seven potential reviewers per paper. Such assignment was made using all reviewers in the database including the conflicting ones. The Program Chairs manually entered the missing conflict domains of approximately 300 reviewers. Based on the recommendation of the Area Chairs, three reviewers were selected per paper (with at least one being of the top three suggestions), with 99.

The Digital Departed Timothy Recuber,2023-09-12 A sociologist examines the ways we die online, and the digital texts we leave behind-including blogs of the terminally ill, suicide notes, post-mortem messages, and hashtags about police brutality. The book argues that the Internet has reenchanting our notions of selfhood, but in ways that blind us to the inequalities underpinning our digital lives--

Computer Vision Systems Antonios Gasteratos,Markus Vincze,John K. Tsotsos,2008-05-09 In the past few years, with the advances in microelectronics and digital technology, cameras became a widespread media. This, along with the enduring increase in computing power boosted the development of computer vision systems. The International Conference on Computer Vision Systems (ICVS) covers the advances in this area. This is to say that ICVS is not and should not be yet another computer vision conference. The field of computer vision is fully covered by many well-established and famous conferences and ICVS differs from these by covering the systems point of view. ICVS 2008 was the 6th International Conference dedicated to advanced research on computer vision systems. The conference, continuing a series of successful events in Las Palmas, Vancouver, Graz, New York and Bielefeld, in 2008 was held on Santorini. In all, 128 papers entered the review process and each was reviewed by three independent reviewers using the double-blind review method. Of these, 53 papers were accepted (23 as oral and 30 as poster presentation). There were also two invited talks by P. Anandan and by Heinrich H. Bulthoff. The presented papers cover all aspects of computer vision systems, namely: cognitive vision, monitor and surveillance, computer vision architectures, calibration and registration, object recognition and tracking, learning, human-machine interaction and cross-modal systems.

Intelligent Visual Surveillance Zhang Zhang,Kaiqi Huang,2016-12-20 This book constitutes the refereed proceedings of the 4th Chinese Conference, IVS 2016, held in

Beijing, China, in October 2016. The 19 revised full papers presented were carefully reviewed and selected from 45 submissions. The papers are organized in topical sections on low-level preprocessing, surveillance systems; tracking, robotics; identification, detection, recognition; behavior, activities, crowd analysis.

Teacher Education: Concepts, Methodologies, Tools, and Applications Management Association, Information Resources, 2016-05-19 Educators play a significant role in the intellectual and social development of children and young adults. Next-generation teachers can only be as strong as their own educational foundation which serves to cultivate their knowledge of the learning process, uncover best practices in the field of education, and employ leadership abilities that will inspire students of all ages. Teacher Education: Concepts, Methodologies, Tools, and Applications explores the current state of pre-service teacher programs as well as continuing education initiatives for in-service educators. Emphasizing the growing role of technology in teacher skill development and training as well as key teaching methods and pedagogical developments, this multi-volume work compiles research essential to higher education professionals and administrators, educational software developers, and researchers studying pre-service and in-service teacher training.

Multimodal Video Characterization and Summarization Michael A. Smith, Takeo Kanade, 2005-12-17 Multimodal Video Characterization and Summarization is a valuable research tool for both professionals and academicians working in the video field. This book describes the methodology for using multimodal audio, image, and text technology to characterize video content. This new and groundbreaking science has led to many advances in video understanding, such as the development of a video summary. Applications and methodology for creating video summaries are described, as well as user-studies for evaluation and testing.

Multiple Intelligences Howard E. Gardner, 1993 Howard Gardner's brilliant conception of individual competence is changing the face of education today. In the ten years since the publication of his seminal Frames of Mind, thousands of educators, parents, and researchers have explored the practical implications of Multiple Intelligences (MI) theory—the powerful notion that there are separate human capacities, ranging from musical intelligence to the intelligence involved in understanding oneself. Multiple Intelligences: The Theory in Practice brings together previously published and original work by Gardner and his colleagues at Project Zero to provide a coherent picture of what we have learned about the educational applications of MI theory from projects in schools and formal research over the last decade.

Cloud Computing and Digital Media Kuan-Ching Li, Qing Li, Timothy K. Shih, 2014-03-07 Cloud Computing and Digital Media: Fundamentals, Techniques, and Applications presents the fundamentals of cloud and media infrastructure, novel technologies that integrate digital media with cloud computing, and real-world applications that exemplify the potential of cloud computing for next-generation digital media. It brings together technologies for media/data communication, elastic media/data storage, security, authentication, cross-network media/data fusion, interdevice media interaction/reaction, data centers, PaaS, SaaS, and more. The book covers resource optimization for multimedia cloud computing—a key technical challenge in adopting cloud computing for various digital media applications. It describes several important new technologies in cloud computing and digital media, including query processing, semantic classification, music retrieval, mobile multimedia, and video transcoding. The book also illustrates the profound impact of emerging health-care and educational applications of cloud computing. Covering an array of state-of-the-art research topics, this book will help you understand the techniques and applications of cloud computing, the interaction/reaction of mobile devices, and digital media/data processing and communication.

Procrastinate on Purpose Rory Vaden, 2015 You've tried managing your time. You've tried prioritizing your time. Now discover how to multiply it. Do you feel like you're busier than ever - yet never caught up? You're not alone. Many of us are tired, frustrated, and stressed from being overworked at the office and at home, with no concrete plan for getting it all under control without compromising our well-being. In Procrastinate on Purpose, self-discipline strategist Rory Vaden presents a different approach for how to identify and focus on what's important. Instead of one more calendar, checklist, or gadget, he points out that what we really need is an understanding of the emotional reasons we fail to maximize our time - and he then reveals the five 'permissions' we can grant ourselves in order to get better results while creating more margin in our daily lives. In this paradigm-shifting book, you will discover how to- Identify your most significant priorities, in business and in life Create more time to do the things you love without sacrificing results Say no to the things that don't matter, and yes to the things that do Implement systems that give you more time tomorrow than you have today Gain control and inner peace by adopting the 'multiplier mindset' Informed by Southwestern Consulting's work with thousands of busy clients, and interspersed with Vaden's case studies that reveal the 'multiplier mindset' at work, this insightful, practical book will turn everything you thought you knew about time upside-down-and it will change the way you work and live. From the New York Times bestselling author of Take the Stairs- A bold new way to get things done. 'Managing your time is a lot like managing your money. It's not about the numbers; it's about your behavior. The best time-management tricks in the world won't do you much good if they don't actually make your life better. In Procrastinate on Purpose, Rory builds on what we've all heard about time management and adds the two things that have always been missing- emotion and significance.' Dave Ramsey, New York Times bestselling author and nationally syndicated radio show host 'If you've ever thought, 'I wish I had more time,' read the great principles of this book. And then I dare you to do what Rory does- live them.' Jon Acuff, New York Times bestselling author of Start and Quitter 'Procrastinate on Purpose will alter the way the professional world thinks about time - I've never read anything like it. Useful, unique, and relevant . . . this is an absolute must-read for every leader.' Sue Schick, CEO of UnitedHealthcare of Pennsylvania and Delaware 'This book is a game-changer.' Jon Gordon, bestselling author of The Energy Bus and The Carpenter 'Every once in a while a book comes along that completely shifts the way an entire generation thinks about a specific topic. When it comes to time management and productivity, Procrastinate on Purpose may be the one!' Andy Andrews, New York Times bestselling author of The Traveler's Gift and The Noticer
