0.1% Simeon Ivanov, 2018-09-08 WAKE UP! You are trying too hard to become something you don't want. Most books give you a ton of impractical information. This book gives you a bulletproof system for: • Using the unfair advantage to get richer, healthier, happier at the same time • Designing your purpose and setting yourself up for success • Beating the pros at self-discipline and habit development • Achieving 3X greater results from a single hour of work • Overcoming your fears and eliminating stress • Turning \$10/day into \$1,634,421 and much more. Where other books tell you what you should do, 0.1% tells you how to do it. Where other books tell you how to do it, 0.1% gives you a bulletproof system for helping you execute.

Preliminary Atlas of 1.0, 0.5, and 0.1 Percent Precipitation Intensities for Eurasia Henry A. Salmela, 1971 Using preliminary statistical relationships between precipitation intensities averaged over 1-min durations and commonly available monthly climatological tabulations of precipitation, rainfall rates for 1.0, 0.5, and 0.1 percent exceedances were computed for weather stations over Europe and Asia for which monthly totals and frequency of daily precipitation were available for the months of January, April, July, and October. Isolines of intensities were drawn delineating regions of low and high rates for each precipitation frequency. These rates may be used for obtaining calculated-risk design criteria for military equipment and for the evaluation of the probability of operational problems when the intensity of precipitation equalled or exceeded with various low probabilities may be critical. 0.1% Beyond Human Reality: An innocent Look into Existence and the Potential of Being Human S.S. López,2020-12-28 0.1 percent is a humble journey through the murky waters of human nature, existential doubt, suffering, and human potential. The 99.9 percent offers a starting point to understanding humanity through current human realities. Rational, subjective, deep-subjective, intersubjective, and virtual realities form the backbone of how we perceive, analyze, and rationalize whatever this thing is that we call existence. The book offers the reader some perspective on the obstacles we face while living completely unaware of our whole vital experience in the world and the endless potential we possess as human beings in such an inter-correlated universe. Once we are clear about our limitations, our values, and deep layers of existence, we enter the realm of our 0.1 percent. Here we are fully self-aware, creators of our own experiences with our own self-made choices, taking full responsibility for ourselves and the world. We can begin to dream of giving purpose to our life. 0.1 Beyond Human Reality confronts us with the realization that we are the origin of all coming evil as well as the most awe-inspiring acts of kindness.

Calibration of a Magnetic Spectrometer Designed to Measure 0.1-1.0-MeV Electrons in Space Paul L. Rothwell,Wayne R. Moomey,1972 The report describes the recalibration of a magnetic spectrometer designed to measure the 0.1- to 1.0-MeV electron flux in a space environment. A different technique from that of the original calibration was used. In the present case, a Monte Carlo

computer program and beta source measurements are used to determine the detected energies and their detection efficiencies. The mean energies were 20 to 40 keV higher and the normalizations were a factor of two higher than those previously found. Systematic errors effects and the degree of elastic scattering off the magnet faces are analyzed. (Author).

Army Tactics, Techniques, and Procedures ATTP 5-0.1 Commander and Staff Officer Guide September 2011 United States Government US Army,

Results of a 0.1-scale B-1 Inlet Model Test at Transonic and Supersonic Mach Numbers F. J. Graham, 1971 Results are presented of a wind tunnel investigation of a 0.1-scale model of the left-hand dual inlet air induction system of the B-1 aircraft. The test was conducted from Mach number 0.55 to 2.2 over an angle-of-attack range from -4 to 13 deg and yaw angles of -8 to 5 deg. Inlet performance in terms of compressor-face total-pressure recovery, total-pressure distortion, and turbulence index is presented as a function of inlet mass-flow ratios for various inlet geometries and model attitudes. The total-pressure recovery of the mixed-compression inlet was very good, but the total-pressure distortion at critical massflow ratios was higher than normally desired for satisfactory turbine engine operation. Best performance was realized with ramp and throat height schedules determined from previous testing. Effects of angle of attack and yaw were seen as general sidewash effects. The addition of canard-type fins had negligible effect on inlet performance. (Author).
