Food Process Engineering F. Xavier Malcata,2020-12-13 Food Process Engineering: Safety Assurance and Complements pursues a logical sequence of coverage of industrial processing of food and raw material where safety and complementary issues are germane. Measures to guarantee food safety are addressed at start, and the most relevant intrinsic and extrinsic factors are reviewed, followed by description of unit operations that control microbial activity via the supply of heat supply or the removal of heat. Operations prior and posterior are presented, as is the case of handling, cleaning, disinfection and rinsing, and effluent treatment and packaging, complemented by a brief introduction to industrial utilities normally present in a food plant. Key Features: Overviews the technological issues encompassing properties of food products Provides

comprehensive mathematical simulation of food processes Analyzes the engineering of foods at large, and safety and complementary operations in particular, with systematic derivation of all relevant formulae Discusses equipment features required by the underlying processes

Life and Mortality in Ugaritic Matthew McAfee,2019-12-11 While topics such as death, funerary cult, and the netherworld have received considerable scholarly attention in the context of the Ugaritic textual corpus, the related concept of life has been relatively neglected. Life and Mortality in Ugaritic takes as its premise that one cannot grasp the significance of mwt (“to die”) without first having wrestled with the concept of ḥyy (“to live”). In this book, Matthew McAfee takes a lexical approach to the study of life and death in the Ugaritic textual corpus. He identifies and analyzes the Ugaritic terms most commonly used to talk about life and mortality in order to construct a more representative framework of the ancient perspective on these topics, and he concludes by synthesizing the results of this lexical study into a broader literary discussion that considers, among other things, the

implications for our understanding of the first-millennium Katumuwa stele from Zincirli. McAfee's study complements previous scholarly work in this area, which has tended to rely on conceptual and theoretical treatment of mortality, and advances the discussion by providing a more focused lexical analysis of the Ugaritic terms in question. It will be of interest to Semitic scholars and those who study Ugaritic in particular, in addition to students of the culture of the ancient Levant.
