

The Year 200 Agustín de Rojas,Hebe Powell,2016-07-12 The cult classic from the godfather of Cuban science fiction, Agustín de Rojas's *The Year 200* is both a visionary sci-fi masterwork and a bold political parable about the perils of state power. Centuries have passed since the Communist Federation defeated the capitalist Empire, but humanity is still divided. A vast artificial-intelligence network, a psychiatric bureaucracy, and a tiny egalitarian council oversee civil affairs and quash "abnormal" attitudes such as romantic love. Disillusioned civilians renounce the new society and either forego technology to live as "primitives" or enhance their brains with cybernetic implants to become "cybos." When the Empire returns and takes over the minds of unsuspecting citizens in a scenario that terrifyingly recalls *Invasion of the Body Snatchers*, the world's fate falls into the hands of two brave women. Originally published in 1990, just after the fall of the Berlin Wall and before the onset of Cuba's devastating Special Period, Agustín de Rojas's magnum opus brings contemporary trajectories to their logical extremes and boldly asks, "What does 'the greatest good for the greatest number' really mean?"

Hope Runs Claire Diaz-Ortiz,Samuel Ikua Gachagua,2014-04-15 Sammy Ikua Gachagua had lost his father to illness, his mother to abandonment, and his home to poverty. By age ten, he was living in a shack with seven other children and very little food. He entered an orphanage seeing it as a miracle with three meals a day, a bed to sleep in, and clothes on his back. When Claire Diaz-Ortiz arrived in Kenya at the end of an around-the-world journey, she decided to stay the night, climb Mt. Kenya, then head back home. She entered an orphanage seeing it as little more than a free place to spend the night before her mountain trek. God had other plans. *Hope Runs* is the emotional story of an American tourist, a Kenyan orphan, and the day that would change the course of both of their lives forever. It's about what it means to live in the now when the world is falling down around you. It's about what it means to hope for the things you cannot see. Most of all, it's about how God can change your life in the blink of an eye.

How to Read a Book Mortimer Jerome Adler,1963

The Torchlight List Jim Flynn,2013-11-01 In today's world it seems that everywhere we turn we are saturated with book recommendations from talk shows, magazines, radio shows, friends, and top ten lists. But which books are really the best, and what effects do the books we read have on our intelligence? The Torchlight List has the answers. A professor for over forty years, Jim Flynn was concerned when he saw that his students were reading less and less. He decided to compile a list of recommendations for them, which expanded to include two hundred titles that transport the reader into a magic realm of knowledge and imagination. The books must also shed light on human psychology, history, science, or philosophy: the concepts needed to comprehend the complexities of the modern world. The list, named in honor of Flynn's uncle who read by torchlight onboard a ship during WWI, is divided by geographical area. Flynn offers a brief explanation on the history each book deals with and comments on the plots with humor and wit. He bets each reader that at least one of the five first titles will change his or her life. This is a book that will inspire you to reread books you love, and to discover and relish many new ones.

The London Enviro 200 David Beddall,2024-01-30 Launched by Transbus in 2004, the original Enviro 200 mode was not a success. The Enviro 200 was relaunched in 2006, this new model becoming more successful. The new model was taken into stock by many London operators, replacing older single-deckers in their fleets. The Enviro 200 had just as much success as its predecessor, the Dennis Dart SLF. As with the Dart SLF, the Enviro 200 was available in a number of lengths. 2014 saw the launch of the Enviro 200 MMC (major model change), this replacing the original "classic" Enviro 200 in 2018. The first all-electric Enviro 200 MMCs arrived in London in 2016, this becoming the standard model for new contracts. The London Enviro 200 looks at the history of the Enviro 200 and Enviro 200 MMC model in London service.

Engels @ 200 Frank Jacob,2020-11-25 Friedrich Engels was one of the most important German thinkers of the 19th century and his writings are still important today. Addressing the pressing issues of his time, the broadly interested scholar Engels would write about many different topics, and thereby not only pave the way for a science-based socialism, but also for further studies in sociology, history, and philosophy. To highlight the value and impact of Engels' work as well as emphasize its relevance for major issues that will determine the 21st century, the present anthology assembles scholars from different countries and research fields to discuss how to read and gain insights from reading his works in our time. It also attempts to stimulate further research about Engels, who 200 years after his birth deserves to be fully brought out of the shadow of his friend and colleague Karl Marx.

Latin America at 200 Phillip Berryman,2016-04-26 Between 2010 and 2025, most of the countries of Latin America will commemorate two centuries of independence, and Latin Americans have much to celebrate at this milestone. Most countries have enjoyed periods of sustained growth, while inequality is showing modest declines and the middle class is expanding. Dictatorships have been left behind, and all major political actors seem to have accepted the democratic process and the rule of law. Latin Americans have entered the digital world, routinely using the Internet and social media. These new realities in Latin America call for a new introduction to its history and culture, which Latin America at 200 amply provides. Taking a reader-friendly approach that focuses on the big picture and uses concrete examples, Phillip Berryman highlights what Latin Americans are doing to overcome extreme poverty and underdevelopment. He starts with issues facing cities, then considers agriculture and farming, business, the environment, inequality and class, race and ethnicity, gender, and religion. His survey of Latin American history leads into current issues in economics, politics and governance, and globalization. Berryman also acknowledges the ongoing challenges facing Latin Americans, especially crime and corruption, and the efforts being made to combat them. Based on decades of experience, research, and travel, as well as recent studies from the World Bank and other agencies, Latin America at 200 will be essential both as a classroom text and as an introduction for general readers.
