   IBM System Storage N series with VMware vSphere 4.1 Roland Tretau,Christian
Prediger Appel,IBM Redbooks,2012-04-09 This IBM® Redbooks® publication
provides a basic introduction to the IBM System Storage® N series,
virtualization, and VMware. It explains how to use the N series with VMware
vSphere 4 environments and the benefits of doing so. Examples are given on
how to install and set up VMware ESXi server with the N series. This edition
includes information about the Virtual Storage Console (VSC), which is
another N series software product that works with VMware. VSC provides local
backup and recovery capability. You have the option to replicate backups to a
remote storage system by using SnapMirror relationships. Backups can be
performed on individual virtual machines or on datastores with the option of
updating the SnapMirror relationship as part of the backup on a per job
basis. Similarly, restores can be performed at a data-store level or
individual virtual machine level. IBM System Storage N series in conjunction
with VMware vSphere 4 helps complete the virtualization hierarchy by
providing both a server and storage virtualization solution. Although this
configuration can further assist with other areas of virtualization,
networks, and applications, these areas of virtualization are not covered in
detail in this book.

IBM Real-time Compression Appliance Version 4.1 Roland Tretau,Salahaldean Alamayri,Christian Prediger Appel,Joao Marcelo Barros de Almeida,Andre Luis

Giglioli,William Luiz de Souza,IBM Redbooks,2013-04-02 Continuing its commitment to developing and delivering industry-leading storage technologies, IBM is introducing the IBM Real-time Compression Appliance for NAS, an innovative new storage offering that delivers essential storage efficiency technologies, combined with exceptional ease of use and performance. In an era when the amount of information, particularly in unstructured files, is exploding, but budgets for storing that information are stagnant, IBM Real-time Compression technology offers a powerful tool for better information management, protection and access. IBM Real-time Compression can help slow the growth of storage acquisition, reducing storage costs while simplifying both operations and management. It also enables organizations to keep more data available for use rather than storing it offsite or on tape that is more difficult to access, so they can support improved analytics and decision-making. IBM Real-time Compression Appliance provides online storage optimization through real-time data compression, delivering dramatic cost reduction without performance degradation. This IBM Redbooks publication is for system administrators and IT architects. It describes the enhancements made in version 4.1 of the Real-time Compression Appliance as compared to previous releases. This book is a companion to the publication Introduction to IBM Real-time Compression Appliances, SG24-7953.

  Virgil, Aeneid, 4.1-299 Ingo Gildenhard,2012 Love and tragedy dominate book four of Virgil's most powerful work, building on the violent emotions invoked

by the storms, battles, warring gods, and monster-plagued wanderings of the epic's opening. Destined to be the founder of Roman culture, Aeneas, nudged by the gods, decides to leave his beloved Dido, causing her suicide in pursuit of his historical destiny. A dark plot, in which erotic passion culminates in sex, and sex leads to tragedy and death in the human realm, unfolds within the larger horizon of a supernatural sphere, dominated by power-conscious divinities. Dido is Aeneas' most significant other, and in their encounter Virgil explores timeless themes of love and loyalty, fate and fortune, the justice of the gods, imperial ambition and its victims, and ethnic differences. This course book offers a portion of the original Latin text, study questions, a commentary, and interpretative essays. Designed to stretch and stimulate readers, Ingo Gildenhard's incisive commentary will be of particular interest to students of Latin at both A2 and undergraduate level. It extends beyond detailed linguistic analysis to encourage critical engagement with Virgil's poetry and discussion of the most recent scholarly thought.

Philoponus: On Aristotle Physics 4.1-5 Keimpe Algra,Johannes van Ophuijsen,2014-04-22 Aristotle's account of place, in which he defined a thing's place as the inner surface of its nearest immobile container, was

supported by the Latin Middle Ages, even 1600 years after his death, though it had not convinced many ancient Greek philosophers. The sixth century commentator Philoponus took a more common-sense view. For him, place was an immobile three-dimensional extension, whose essence did not preclude its being empty, even if for other reasons it had always to be filled with body. However, Philoponus reserved his own definition for an excursus, already translated in this series, The Corollary on Place. In the text translated here he wanted instead to explain Aristotle's view to elementary students. The recent conjecture that he wished to attract young fellow Christians away from the official pagan professor of philosophy in Alexandria has the merit of explaining why he expounds Aristotle here, rather than attacking him. But he still puts the students through their paces, for example when discussing Aristotle's claim that place cannot be a body, or two bodies would coincide. This volume contains an English translation of Philoponus' commentary, as well as a detailed introduction, extensive explanatory notes and a bibliography.

  Journal of Biblical and Theological Studies, Issue 4.1 Daniel S. Diffey,Ryan A. Brandt,Justin McLendon,2019-06-06 The Journal of Biblical and Theological Studies (JBTS) is an academic journal focused on the fields of Bible and Theology from an inter-denominational point of view. The journal is comprised of an editorial board of scholars that represent several academic institutions throughout the world. JBTS is concerned with presenting high-

level original scholarship in an approachable way. Academic journals are often written by scholars for other scholars. They are technical in nature, assuming a robust knowledge of the field. There are fewer journals that seek to introduce biblical and theological scholarship that is also accessible to students. JBTS seeks to provide high-level scholarship and research to both scholars and students, which results in original scholarship that is readable and accessible. As an inter-denominational journal JBTS is broadly evangelical. We accept contributions in all theological disciplines from any evangelical perspective. In particular, we encourage articles and book reviews within the fields of Old Testament, New Testament, Biblical Theology, Church History, Systematic Theology, Practical Theology, Philosophical Theology, Philosophy, and Ethics.

   Simplicius: On Aristotle Physics 4.1-5 and 10-14 J.O. Urmson,2014-04-10 This companion to J. O. Urmson's translation in the same series of Simplicius' Corollaries on Place and Time contains Simplicius' commentary on the chapters on place and time in Aristotle's Physics book 4. It is a rich source for the preceding 800 years' discussion of Aristotle's views. Simplicius records attacks on Aristotle's claim that time requires change, or consciousness. He reports a rebuttal of the Pythagorean theory that history will repeat itself exactly. He evaluates Aristotle's treatment of Zeno's paradox concerning place. Throughout he elucidates the structure and meaning of Aristotle's argument, and all the more clearly for having separated off

his own views into the Corollaries.
