In order to supplement its quota resources, the IMF has the authority to borrow the currency of any member from any source with the consent of the issuer. The international liquidity section in the country tables comprises lines for total reserves minus gold, gold holdings, other foreign assets and foreign liabilities of the monetary authorities, and foreign accounts of other financial institutions. IFS publish, for most countries of the world, current data on exchange rates, international liquidity, international banking, money and banking, interest rates, prices, production, international transactions, government finance, and national accounts.
