Tradigital Animate CC Stephen Brooks, 2016-11-03 Learn how to bridge the gap between the traditional animation principles and digital software. Tradigital Flash: 12 Principles of Animation in Adobe Flash brings the essentials of traditional animation and Adobe Flash together. The early masters of animation created a list of 12 principles which are important for anyone who wants to create interesting and believable animation. Digital animation continues to make incredible technological advancements that give animators the capability to produce visually stunning work. New technology, however, also has a tendency to create an environment where animators are so focused on adapting to the new workflow that they tend to dismiss these fundamental animation principles... which often leads to poor and lifeless character animation. Tradigital Flash helps you focus on these principles while using the program's wide array of features to create believable animation, consistently. Tradigital Flash joins three other Tradigital books covering Maya, Blender, and 3ds Max. This new volume in the series approaches the topic in a different way, giving readers both a practical look at the software, and providing a theoretical understanding of the genre. ? Learn a new principle in each chapter, the Flash tools most related to it and how to put it all together. A plethora of examples demonstrate the good methods which animators should use in Flash, how to avoid the bad ones and ways to create a workflow that works for you. An easy-to-follow approach with examples throughout the book that build on each other, showing how the principles act together. A companion website www.rubberonion.com/tradigital-animate features more examples, downloadable FLA resource files, video tutorials.

Drive Daniel H. Pink, 2011-04-05 The New York Times bestseller that gives readers a paradigm-shattering new way to think about motivation from the author of When: The Scientific Secrets of Perfect Timing Most people believe that the best way to motivate is with rewards like money—the carrot-and-stick approach. That's a mistake, says Daniel H. Pink (author of To Sell Is Human: The Surprising Truth About Motivating Others). In this provocative and persuasive new book, he asserts that the secret to high performance and satisfaction—at work, at school, and at home—is the deeply human need to direct our own lives, to learn and create new things, and to do better by ourselves and our world. Drawing on four decades of scientific research on human motivation, Pink exposes the mismatch between what science knows and what business does—and how that affects every aspect of life. He examines the three elements of true motivation—autonomy, mastery, and purpose—and offers smart and surprising techniques for putting these into action in a unique book that will change how we think and transform how we live.
