Archaeo-Astronometria Dean Clarke, 2008-10-23

There have been many books on the origin of astronomy some good and some very poorly address the issues of ancient man's interests in the stars. The ancient Sumer and Egyptian notions of music mostly confirm how ancient this notion is in their chorded progressions of tone. This notion is more an Upper Paleolithic celestial idea. In a sense man during this time was beginning to have a concept of north, south, east and west in spatial terms. It involves the curvature of the ribs of Nut the Egyptian Sky Goddess as a ribbed vaulted sky, and sometimes in a horizon sense of a bowing arch of a star's path, or the curve of a bone in the star's moving path. The half way point of this fall for say our Nut, Adam and Eve would thus be about 27,000 BC which falls in a significant period Ice Age re-emergence and a

deserts expanding in equator regions. These are only a small part of what had to be addressed in origins of night sky studies. The point being this piece as fake or not is that the components of the animals, man, plants and man's artifacts were very early on displayed. We might ask in such a condition what was their night sky? If we look at all of these constellations they fall below the Celestial Equator in the South Pole region mostly. It would seem that all these birds to them being placed in the night sky like the stars and as they watched what directions the birds along with stars as to where they went in order to ascertain their relations to dusk or dawn night sky. What caused the South Africa plight of 80,000 BC? The Antarctica had been growing ice forms from 170,000 BC to 80,000 BC towards the north, and then around 70,000 BC there seemed to be a melting trend back south. In an astronomy sense we can thank him for larger game entering in the pantheon of the constellations, or the leaf, otter, and some constellations lost to time like the mammoths. What does this have to do with constellations, taboos, or the advent of Cro-Magnon man well in the depictions of constellation images? Slowly from east to west the stars move, but then it did not take man not long after 70,000 BC to note that some planets or stars seemed to move retrograde in the night sky? This book address what ideas did they show or have before or after these earth changes. As ideas such as: Maybe, it was a lasso constellation for some animals capture as a God of Capture. And, Somewhere around the time of 50,000 BC in the region of northern England to the region

above the Black Sea there occurred a melting phase between the ice ages and cultures began to spread. The evidence of this is found by different locations in Europe and Central Europe of the use of rock shadows, stars noted by hands in movement, and certain hand symbols by star images or dots as stars not just stab marks. Ironical again that Man beside Woman on the pole treetop does not have strong reminders of the Adam-Eve Tree and the Serpent as maybe Draco? The symbol anciently always shows the snake at the foot of the tree or ascended the tree at the apex of the trunk which if astronomy wise would mean an ascended constellation to the Zenith or the Pole! Draco thus deposed Adam and Eve from their own constellation garden and domain by it ascending as an ancient Pole Axis Mundi? Thus the smoke screen really is a tie between this local area of France and Late Paleolithic Man's ideas of that region in the night sky of a certain year or month period of hunting. Although we have jumped forward in the time of ancient astronomy beginnings in a way really in this sense we have not. To the real beginnings of little known ancient astronomy.

Ave Auriga! Deke D. Wagner, 2016-12-15 AN ADVENTUROUS TALE OF ROMAN CHARIOT RACING AND IMPERIAL POLITICAL INTRIGUE! Panem et Circensus. Bread and Circuses. It was the Roman poet Juvenal that coined that often quoted phrase. In his opinion a great many Romans were interested in only two things: free handouts of bread, and chariot races. A.D. 96-Rubio, son of Aulus Artorius Celsus, arrives in Alexandria to seek his fortune fleeing Rome after the assassination of

Emperor Domitianus. He tries to enlist in the Legions but is rejected because of his youthful age. Afterwards he seeks employment in several different trades but has no success; he either quits or gets sacked. Desperate to earn a descent living in something in which he excels, Rubio gets a job as a horse groom at the Factio Russata, a local racing stable. He begins a menial career cleaning out stalls, grooming horses, feeding them, etc. Aurelius Falco, a prominent equestrian and a widower, is the stable's owner, and he takes to the Germani boy once he discovers his extraordinary knowledge of horses. Rubio slowly works his way up the stable hierarchy. But his progress is hampered by a cruel, foul-mouthed foreman named Titus Buccio, an ex-circus driver turned circus trainer. Then during a practice race, a driver is injured and Rubio steps in and shows off his driving skills as a charioteer, much to the surprise and delight of Aurelius Falco. Buccio vehemently rejects Falco's suggestion that Rubio become a permanent driver for the stable, and for the Red Faction which Falco represents. Buccio is overruled and Rubio becomes a regular charioteer or Auriga.

Source.mVandor was a single continent planet
orbiting a red star on the outer rim of our
galaxy. This was an insignificant planet, slow to
develop and influencing little else in the
universe. On Vandor .There was a hatred so
consuming that it rooted into every cell of our
body. It was an old hate. It was born before
memory, no one knows when or why. It grew with
every vengeful act, generation to generation, one
on top of another, until it eclipsed all else.
This was what existed between the Vandorians and
the Tanangg. And were one so able to blot the
other from the planet, to destroy ever aspect of
the other's existence, it would still not quench
the hatred that was felt.They fought in catacomb
cities through electro-magnetic tube labyrinths.
They used sophisticated assaults to kill their
enemies in complicated crossfires..the emotion was
so strong, so thick, that it was inhaled by the
two factions and exhaled as a beautifully deadly
dance of attacks and counter-attacks. This
mirrored passion between the armies produced a
masterful kata of tactics and strategic
adaptation. It was the hatred that drove the
Tanangg to inflict lasting marks upon the
Vandorian soldiery and citizenry. It was the
refraction of the same hate that empowered the

Vandorian Squibbs to destroy the Tanangg at every opportunity, giving no quarter or pause. Each race was capable of great, good things. Each race was also capable of great revulsions as they danced along opposite sides of the same blade edge. It was the hate that now connected them and gave them purpose. It was the hate that created the choreographed ballet of Tidron attack strategies and executions. This hatred also created Una Lor.

One of the significant advantages of Auriga books and manuals for download is the cost-saving aspect. Traditional books and manuals can be

many universities and educational institutions have their own digital libraries that provide free access to PDF books and manuals.
