Apache Avro Jesse Russell,Ronald Cohn,2012-06 High Quality Content by WIKIPEDIA articles! Avro is a remote procedure call and serialization framework developed within Apache's Hadoop project. It uses JSON for defining data types and protocols, and serializes data in a compact binary format. Its primary use is in Apache Hadoop, where it can provide both a serialization format for persistent data, and a wire format for communication between Hadoop nodes, and from client programs to the Hadoop services.

The Avro Shackleton Jason Nicholas Moore,2023-09-17 Long-ranged maritime reconnaissance aircraft were a part of British wartime strategy since the First World War, in the form of flying boats. During the Second World War, the flying boats were increasingly replaced by land-based aircraft, such as the American Lend-Lease Flying Fortresses and Liberators. After the war, these aircraft were replaced by a purpose-built aircraft, the Avro Shackleton, which traced its ancestry through the Lincoln and Lancaster all the way back to the early Second World War bomber, the Manchester. The road from the Manchester to the Shackleton was a long one, and it is described comprehensively. The Shackleton itself went through two major changes - from the MR.1 to the MR.2, then from the MR.2 to the MR.3. Along with a detailed technical description of the Shackleton and its weaponry, photographs and accurate colour profiles accompany the text, to illustrate the Shackleton. This aircraft is compared and contrasted with its post-war piston-engined counterparts. Its former use with the United Kingdom and South Africa is also described. The current survivors, especially an MR.2 (WR963) in the United Kingdom and an AEW.2 (WL790) in the United States, are described in great detail.

The Avro Arrow Lawrence Miller,2020-07-20 When it first flew in 1957, the Avro Arrow was the world's best supersonic combat aircraft. It was the proudest achievement of the engineers and designers in Canada's world-leading aircraft industry. They had already succeeded in building the worlds first passenger jet. This book tells the story of building, testing, and flying the Arrow. It explores the reasons why the Diefenbaker Conservative government of the day cancelled the contract to build these planes — and then ordered the six already finished airplanes cut up and destroyed.

The Avro Type 698 Vulcan David W. Fildes,2012-05-19 The Avro Vulcan was the last V Bomber to see active service in its primary role during the Falklands conflict. It is the most popular of the three and one aircraft has recently become airborne again after a long period of rejuvenation. It has always been a major attraction at air shows throughout the world, attracting crowds who delight in its unique delta-wing shape and amazing maneuverability.The book examines the origins of the design, the prototypes and experimental aircraft, and goes on to explain the modifications that were made to the last of the breed.A leading member of the Avro Historical Society, the author has discovered many photographs and experimental design plans in their archives which are here published for the first time.

Avro Lancaster Richard Marks,2015-08-20 The Avro Lancaster was one of the finest bombers of World War II and became the spearhead of the RAF's strategic bombing campaign over the Third Reich. Richard Marks draws on extensive research and detailed technical drawings to explore the evolution of this heavy bomber, revealing how its design developments transformed an old airframe from a dangerous liability into one of the most powerful weapons in the RAF arsenal. It demonstrated excellent performance, ruggedness and good handling qualities and it was soon at the fore of all the RAF's bombing campaigns. This book tells the story of the iconic Lancaster in full, providing a comprehensive account of the design, development and operational history of the aircraft and its evolution into successor aircraft.

The Avro Arrow Palmiro Campagna, 2024-02-06 “No one has done more than Palmiro Campagna to document the story of Canada’s extraordinary Avro Arrow ... This latest work sheds new light on the Arrow’s fascinating saga.” — ANDREW CHAIKIN, author of *A Man on the Moon* An expanded edition of the bestselling book, including newly discovered American records that shed further light on the disastrous cancellation of the Avro Arrow. The controversial cancellation of the Avro Arrow — an extraordinary achievement of Canadian military aviation — continues to inspire debate today. When the program was scrapped in 1959, all completed aircraft and those awaiting assembly were destroyed, along with tooling and technical information. Was abandoning the program the right decision? Did Canada lose more than it gained? Brimming with information to fill the gaps in the Arrow’s troubled history, this new edition also brings to light recently discovered documents that answer whether the United States government wished Canada to continue the development of what was considered the world’s most advanced interceptor aircraft.

The Avro Vulcan Peter G. Dancey , 2017-01-24 The delta-wing design of the subsonic bomber Avro Vulcan was years ahead of its time in terms of design when the Ministry accepted the proposal in 1947. Based on top secret Luftwaffe material after the end of the Second World War, the first prototype flew on 18 May 1951 and it went on to serve in the RAF from 1952 to 1984. During this time it carried Britain’s first nuclear weapon, the gravity bomb, and played an important part in the deterrence policy of the Cold War. *The Avro Vulcan: A History* provides a complete history of the design and development of Britain’s iconic and much loved bomber, covering the period from 1947 to 1984, when it was finally withdrawn due to mounting costs. The history takes in trials and development, taking flight, and the Vulcan B.2 and Black Buck attacks in the Falklands War, and provides details of all 136 airframes including completion dates, operational services in unit order, worldwide goodwill and flag-waving missions, making it a valuable record of this graceful and famous bomber aircraft.

The Avro Manchester Robert Kirby, 2017-05-17 In its earliest, dark days, Bomber Command operated deep into occupied Europe with the underdeveloped Avro Manchester. Powered by the Rolls Royce Vulture, it was the only British aircraft to use this engine operationally. The design was revised and amended several times, with three enlargements of the flying surfaces required to provide an adequate flight envelope. Nevertheless, Manchesters entered service without adequate type-testing, leading to four groundings in the first ten months of use. Aircrews were faced with airframe and engine challenges, and the Manchester continued to evolve as the war was being fought. Despite this, seven RAF squadrons would eventually use 202 Manchesters (with 538 Vultures) on 1,260 sorties. Manchesters may have contributed to Bomber Command failures (as set out in the Butt Report of August 1941), but they also contributed to its success in denying German capital ships the naval base at Brest. Bomber Command’s persistence with the type was soon shown to be wise, as the Manchester was developed into the famous and war-winning Avro Lancaster. This second edition of *The Avro Manchester: The Legend Behind the Lancaster* retains the keen analysis and gripping narrative of the first, but it also fills many gaps, revises key passages, and provides six appendices for references. It is richly illustrated with 200 images, many of which are previously unpublished. Illustrations: 190 black-and-white photographs

The Avro Arrow Story Bill Zuk, 2011-12-14 These dedicated men and women gave blood, sweat, and tears as their contribution - And now, it really happened, our beloved bird was in the air. - Ray Boone, A.V. Roe Canada employee. In the 1950s, A. V. Roe Canada was at the forefront of aviation development worldwide. After building one of the first jet airliners and completing production of Canada's first jet fighter, the company was poised to launch its most revolutionary design - the Avro Arrow. Despite the efforts of

courageous test pilots and some of the world's best designers, engineers, and technicians, the dream was shattered.

Avro Lancaster 1945-1965 Martin Derry, Neil Robinson, 2014-12-17 The Avro Lancaster, such a stalwart of the skies during the Second World War, also enjoyed an interesting and surprisingly colourful post-war career. It is this era that the authors have chosen to focus on by profiling the type across its many variants. Split into three primary sections, this book offers a concise yet informative history of the Lancaster's post-war operational career (from 1945-1965) charting the course of the various alterations and improvements that occurred during this time and including a selection of contemporary photographs with detailed captions. A 16-page section features 32 colour illustrations (in profiles, 2-views and 4-views) specially prepared by Mark Gauntlett. The book's final section provides a list and box top illustrations of the plastic model kits produced of the Lancaster in all scales plus reviews and 'how to' construction notes on building a selection of kits in 1/144, 1/72 and 1/48 scales. As with the other books in the Flight Craft series, whilst published primarily with the scale aircraft modeller in mind, it is hoped that those readers who might perhaps describe themselves as 'occasional' modellers - if indeed they model at all - may also find that this colourful and informative work offers something to provoke their interests too.

Avro Arrow Arrowheads, 2004 The illustrated memoir of the most advanced fighter jet of the 1950s. At its creation in the mid-1950s, the Avro Arrow was a fighter jet without equal. This Cold War aircraft was twenty years ahead of its time. Unfortunately, political realities resulted in the complete termination of the Arrow project. Cancellation of the Arrow called for the destruction of all photos, drawings, models, specifications and tooling. Even the aircraft themselves were disassembled and destroyed. Avro Arrow is a fascinating historical record with an extensive collection of rare and highly prized photos, drawings and diagrams. Using two hundred images, the book traces the story of the Arrow from its inception to roll out and flight test, including advanced proposals for the development of future version. Primary sources include: Taped interviews, test pilots' firsthand impressions, Avro officials and many plant personnel Surviving company records Declassified government documents. Diagrams offer stunning details such as the North American strategic defense zones and interception tactics proposed for bomber attacks. This book concentrates solely on the vision, design and technical excellence of the airplane itself rather than the politics of its demise.

Avro Aircraft & Cold War Aviation Randall Whitcomb, 2002 This book is definitely not another rehash of old Avro Arrow material! It covers the entire history of Avro Canada, includes much about Avro in Britain and about advanced aviation progress in the United States. Its sub-plots involve the aerospace race of the 20th century set in global political aspects. The reader will discover the exciting advances in aviation over the last century and be able to assess the impact of the Avro story as a result. Statistical comparisons of Avro's products to the benchmark products of the American competition provide the most shocking evidence of how advanced the Avro actually was. Examines the C-102, CF-100 and the CF-105 Arrow interceptor through exceptionally detailed technical and aerodynamic discussions, and the political and economic factors at work in the demise of the Arrow. Most particularly the author focuses on the staggering front-line achievements of the A.V. Roe Company, later Avro Canada Ltd. His own stunning artwork illustrates the book.

Storms of Controversy Palmiro Campagna, 2010-04-22 The development of the Avro Arrow was a remarkable Canadian achievement. Its mysterious cancellation in February 1959 prompted questions that have long gone unanswered. What role did the Central Intelligence Agency play in the scrapping of the project? Who in Canada's government was involved in that decision? What, if anything, did Canada get in return? Who ordered the blowtorching of all the prototypes? And did Arrow technology find its way into the

American Stealth fighter/bomber program? When Storms of Controversy was first published in 1992, its answers to these questions sent a shock wave across the country. Using never-before-released documents, the book exploded the myth that design flaws, cost overruns, or obsolescence had triggered the demise of the Arrow. Now, in this fully revised fourth edition, complete with two new appendices, the bestselling book brings readers up-to-date on the CF-105 Arrow, the most innovative, sophisticated aircraft the world had seen by the end of the 1950s.

Avro Vulcan Kev Darling, 2005 The Avro Vulcan is probably the most famous and best loved of the three V-Bombers that constituted the Royal Air Force's nuclear strike force during the 1960s. Immediately recognizable thanks to its huge delta wing, it was at the forefront of Britain's strategic nuclear defenses for over a decade. As the nuclear deterrent was passed to the Royal Navy at the end of the 1960s, the Vulcan was redeployed onto tactical interdiction duties. During the 1982 Falklands War, the Vulcan saw the only combat service of its career. This detailed study surveys the history of the aircraft from its inception in 1947 to its final role as an inflight-refueling tanker in the mid-1980s, and beyond.
