The Master Blaster P.F. Kluge,2012-03-29 A blogger details corruption on a South Pacific island while its denizens intermingle in this novel by the acclaimed author of *Gone Tomorrow*. This captivating novel intertwines the stories of several inhabitants on Saipan, America's least-appreciated tropical island. George Griffin is a jaded writer who comes for a press junket and stays far longer than expected; Stephanie Warner is a university professor recently on "trial separation" from her husband; Mel Brodie is an elderly entrepreneur; and Khan is a Bangladeshi laborer who comes to Saipan ("America") to escape hunger. Their voices circle the enthralling element of Saipan—and the hopes that originally drew them to the island. With the versatility that won Kluge accolades as the writer behind *Dog Day Afternoon*, *The Master Blaster* is a rare wonder of contemporary storytelling. Praise for *The Master Blaster* "This is not a young man's book; it's the work of a writer who has seen the world, literally and figuratively, for a long time. *The Master Blaster* is tinged with thoughts of mortality, but they are offset by a bon vivant's occasional flash of gratitude and beauty." —Janet Maslin, *New York Times* "Delving deep into his rich setting, P.F. Kluge patiently lays out a tale of intrigue and ignorance worthy of Graham Greene." —Stewart O'Nan, author of *Wish You Were Here* "Fear, violence, sex, and money blow like trade winds across this Fantasy Island, a microscopic petri dish of greed and race sweltering in the American Pacific. Kluge is among our finest novelists, and he flexes his muscles over this postage stamp of territory. Like all the greats before him, he saves his best line for last, in this his greatest book." —Tony D'Souza, author of *Mule* "Recommended . . . for its interesting character development, plot twists, and "gotcha" ending." —Booklist

The Vortex Blaster E. E. "Doc" Smith, 2023-10-09 Neal Storm Cloud failed his Lensman exam, But life has a strange way of making heroes of even those who sometimes fail. Cloud's family is tragically killed when a misguided attempt to blow out a vortex lands one of the fragments right on his house. Devastated by the loss of his family, Cloud takes a leave of absence from the Radiation Lab where he works studying the vortices. As he drives he is struck with an idea for blowing out a vortex. It is slightly technical (Smith explains it so it can be easily followed), but the general idea is that Cloud's brain works so fast that he can calculate exactly where the center of the vortex will be at a moment in time and how big an explosive is needed, then hit it with a bomb that is set at the exact strength to actually extinguish the vortex instead of blowing it apart and making more vortices. As it continues the book tells of Cloud's new job as the universe's one and only vortex blaster. This job takes him from planet to planet where he blows out vortices, matches wits against drug dealers and gangsters, meets new life forms, and acquires a crew for his small scout ship. His adventures are many and varied, and the lifeforms he meets are strange and interesting.
