Burn Herman Pontzer PhD, 2022-04-19 One of the foremost researchers in human metabolism reveals surprising new science behind food and exercise. We burn 2,000 calories a day. And if we exercise and cut carbs, we'll lose more weight. Right? Wrong. In this paradigm-shifting book, Herman Pontzer reveals for the first time how human metabolism really works so that we can finally manage our weight and improve our health. Pontzer's groundbreaking studies with hunter-gatherer tribes show how exercise doesn't increase our metabolism. Instead, we burn calories within a very narrow range: nearly 3,000 calories per day, no matter our activity level. This was a brilliant evolutionary strategy to survive in times of famine. Now it seems to doom us to obesity. The good news is we can lose weight, but we need to cut calories. Refuting such weight-loss hype as paleo, keto, anti-gluten, anti-grain, and even vegan, Pontzer discusses how all diets succeed or fail: For shedding pounds, a calorie is a calorie. At the same time, we must exercise to keep our body systems and signals functioning optimally, even if it won't make us thinner. Hunter-gatherers like the Hadza move about five hours a day and remain remarkably healthy into old age. But elite athletes can push the body too far, burning calories faster than their bodies can take them in. It may be that the most spectacular athletic feats are the result not just of great training, but of an astonishingly efficient digestive system. Revealing, irreverent, and always entertaining, Pontzer has written a book that will change how you eat, move, and live.

Burn James Patrick Kelly, 2018-04-24 Nebula Award Winner Hugo Award Nominee Featuring a new afterword from the author "Burn is James Patrick Kelly at his best, and there's nothing better." —Connie Willis, author of Doomsday Book The tiny planet Morobe's Pea has been sold and renamed Walden. The new owner has some interesting ideas. Voluntary simplicity will rule in the

Transcendent State; Walden is destined to become a paradise covered in lush new forests. But even believers find temptations in the black markets; non-believers are willing to defend their ideals with fire. Walden's only hope may lie with a third option: a very unlikely alien intervention. In *Burn*, James Patrick Kelly (Think Like a Dinosaur) delivers an innovative, entertaining, and morally-complex vision of the perils of idealism.

Burn Unit Barbara Ravage, 2009-04-27 "A compelling blend of science, history and storytelling. Barbara Ravage has fashioned an enlightening, invaluable book." —Stewart O'Nan, author of *The Circus Fire: A True Story of an American Tragedy* Though each of us is just a spark away from being a burn victim, the public knows little and understands less about the world that patients inhabit. Pulling the curtains back on this private and sterile environment, *Burn Unit* is a riveting account of the frontline efforts—both modern-day and historical—to save lives devastated by fire. With unflinching urgency, Barbara Ravage follows an extraordinary team of healers at Massachusetts General Hospital, the cradle of modern burn treatment and the site of one of the best burn units in the world. From Boston's Coconut Grove fire of 1942 to the treatment of the victims of the Rhode Island nightclub fire in early 2003, we watch everyday heroes do their incredible but punishing work against the backdrop of history. Both a moving human drama and an engrossing scientific exploration of this little-known field of medicine, *Burn Unit* is an unforgettably powerful read.

Burn Albert Bates, Kathleen Draper, 2020-04-14 In order to rescue ourselves from climate catastrophe, we need to radically alter how humans live on Earth. We have to go from spending carbon to banking it. We have to put back the trees, wetlands, and corals. We have to regrow the soil and turn back the desert. We have to save whales, wombats, and wolves. We have to reverse the flow of greenhouse gases and send them in exactly the opposite direction: down, not up. We have to flip the carbon cycle and run it backwards. For such a revolutionary transformation we'll need civilization 2.0. A secret unlocked by the ancients of the Amazon for its ability to transform impoverished tropical soils into terra preta—fertile black earths—points the way. The indigenous custom of converting organic materials into long lasting carbon has enjoyed a reawakening in recent decades as the quest for more sustainable farming methods has grown. Yet the benefits of this carbonized material, now called biochar, extend far beyond the soil. Pyrolyzing carbon has the power to restore a natural balance by unmining the coal and undrilling the oil and gas. Employed to its full potential, it can run the carbon cycle in reverse and remake Earth as a garden planet. *Burn* looks beyond renewable biomass or carbon capture energy systems to offer a bigger and bolder vision for the next phase of human progress, moving carbon from wasted sources: • into soils and agricultural systems to rebalance the carbon, nitrogen, and related cycles; enhance nutrient density in food; rebuild topsoil; and condition urban and agricultural lands to withstand flooding and drought • to cleanse water by carbon filtration and trophic cascades within the world's rivers, oceans, and wetlands • to shift urban infrastructures such as buildings, roads, bridges, and ports, incorporating drawdown materials and components, replacing steel, concrete, polymers, and composites with biological carbon •

to drive economic reorganization by incentivizing carbon drawdown Fully developed, this approach costs nothing—to the contrary, it can save companies money or provide new revenue streams. It contains the seeds of a new, circular economy in which energy, natural resources, and human ingenuity enter a virtuous cycle of improvement. Burn offers bold new solutions to climate change that can begin right now.

Burn Patrick Ness,2020-06-02 On a cold Sunday evening in early 1957, Sarah Dewhurst waited with her father in the parking lot of the Chevron gas station for the dragon he'd hired to help on the farm... Sarah Dewhurst and her father, outcasts in their little town of Frome, Washington, are forced to hire a dragon to work their farm, something only the poorest of the poor ever have to resort to. The dragon, Kazimir, has more to him than meets the eye, though. Sarah can't help but be curious about him, an animal who supposedly doesn't have a soul but who is seemingly intent on keeping her safe. Because the dragon knows something she doesn't. He has arrived at the farm with a prophecy on his mind. A prophecy that involves a deadly assassin, a cult of dragon worshippers, two FBI agents in hot pursuit—and somehow, Sarah Dewhurst herself.

Burning the Books Richard Ovenden,2020-10-13 The director of the famed Bodleian Libraries at Oxford narrates the global history of the willful destruction—and surprising survival—of recorded knowledge over the past three millennia. Libraries and archives have been attacked since ancient times but have been especially threatened in the modern era. Today the knowledge they safeguard faces purposeful destruction and willful neglect; deprived of funding, libraries are fighting for their very existence. *Burning the Books* recounts the history that brought us to this point. Richard Ovenden describes the deliberate destruction of knowledge held in libraries and archives from

ancient Alexandria to contemporary Sarajevo, from smashed Assyrian tablets in Iraq to the destroyed immigration documents of the UK Windrush generation. He examines both the motivations for these acts—political, religious, and cultural—and the broader themes that shape this history. He also looks at attempts to prevent and mitigate attacks on knowledge, exploring the efforts of librarians and archivists to preserve information, often risking their own lives in the process. More than simply repositories for knowledge, libraries and archives inspire and inform citizens. In preserving notions of statehood recorded in such historical documents as the Declaration of Independence, libraries support the state itself. By preserving records of citizenship and records of the rights of citizens as enshrined in legal documents such as the Magna Carta and the decisions of the US Supreme Court, they support the rule of law. In *Burning the Books*, Ovenden takes a polemical stance on the social and political importance of the conservation and protection of knowledge, challenging governments in particular, but also society as a whole, to improve public policy and funding for these essential institutions.

Burning Ginger Lazarus, 2022-01-18 Synopsis: It's 2008, at the height of the second Gulf War, and Don't Ask Don't Tell still bans LGBTQ service members from revealing their truth. When local infantryman Cole begs for Cy's help in wooing east coast transplant Rose, she volunteers to ghost write his courtship and keep her own admiration for Rose silent. Meanwhile, the return of her former commander revives old grudges and forces Cy to confront the darkest days of her military past. When Cole is deployed, Cy not only keeps the love letters coming but charts a dangerous course to expose Dulac's complicity in unspeakable crimes. Burn Herman Pontzer,2022 Why do so many diets lead to more weight gain? Do more active people have faster metabolisms? Is exercise essential for weight loss? Over the past twenty years, evolutionary biologist Herman Pontzer has conducted ground-breaking studies across a range of settings, including pioneering fieldwork and Hadza hunter-gatherers in northern Tanzania. This book draws on his eye-opening research to show how, contrary to received wisdom, exercise does not increase our metabolism. Instead, we burn calories within a very narrow range- nearly 3,000 calories per day, no matter our activity level. By taking a closer look at what happens to the energy we consume, Pontzer explores the ways in which metabolism controls every aspect of our health - from fertility to immune function - and reveals the truth about the dynamic systems that sustains us. Filled with facts and memorable anecdotes, *Burn* will change the way you think about food, exercise and life.

A Book to Burn and a Book to Keep (Hidden) Zhi Li,2016-06-07 Li Zhi's iconoclastic interpretations of history, religion, literature, and social relations have fascinated Chinese intellectuals for centuries. His approach synthesized Confucian, Buddhist, and Daoist ethics and incorporated the Neo-Confucian idealism of such thinkers as Wang Yangming (1472–1529). The result was a series of heretical writings that caught fire among Li Zhi's contemporaries, despite an imperial ban on their publication, and intrigued Chinese audiences long after his death. Translated for the first time into English, Li Zhi's bold challenge to established doctrines will captivate anyone curious about the origins of such subtly transgressive works as the sixteenth-century play *The Peony Pavilion* or the eighteenth-century novel *Dream of the Red Chamber*. In *A Book to Burn and a Book to Keep (Hidden)*, Li Zhi confronts accepted ideas about gender, questions the true identity of history's heroes and villains, and offers his own readings of Confucius, Laozi, and the Buddha. Fond of vivid sentiment and sharp expression, Li Zhi made no distinction between high and low literary genres in his literary analysis. He refused to support sanctioned ideas about morality and wrote stinging social critiques. Li Zhi praised scholars who risked everything to expose extortion and misrule. In this sophisticated translation, English-speaking readers encounter the best of this heterodox intellectual's vital contribution to Chinese thought and culture.
