Cro-Magnon Brian Fagan, 2011-05-17 Cro-Magnons were the first fully modern Europeans--not only the creators of the stunning cave paintings at Lascaux and elsewhere, but the most adaptable and technologically inventive people that had yet lived on earth. The prolonged encounter between the Cro-Magnons and the archaic Neanderthals, between 45,000 and 30,000 years ago, was one of the defining moments of history. The Neanderthals survived for some 15,000 years in the face of the newcomers, but were finally pushed aside by the Cro-Magnons' vastly superior intellectual abilities and cutting-edge technologies. What do we know about this remarkable takeover? Who were these first modern Europeans and what were they like? How did they manage to thrive in such an extreme environment? And what legacy did they leave behind them after the cold millennia? This is the story of a little known, yet seminal, chapter of human experience.--From publisher description.

Outsourcing Clinical Development Jane Baguley, 2016-05-13 The challenges facing large pharmaceutical companies are stark: sales are slowing, and research and development costs are rising. There is an overwhelming need to reduce development costs by as much as 30-40%, while at the same time significantly shortening development cycle times. Pharmaceutical spend on outsourcing faces double-digit growth for the next three to five years and yet, if outsourcing is to meet these challenges, new models of collaborative and cooperative working are needed now. Outsourcing Clinical Development offers a guide to these new models and to future clinical outsourcing strategy. There is advice on the basis for an outsourcing strategy and guidance on how to work most productively with CROs (contract research organisations); geographical issues, including working in low-cost environments, are also covered. There is a detailed guide to selecting candidates, and managing the proposal, negotiation and contract process successfully; as well as

reviewing outsourcing performance and developing fruitful long-term strategic relationships. The pharmaceutical outsourcing process is as complex and as influential as the clinical trials it supports. Outsourcing Clinical Development, with a powerful mix of perceptive insight from leading lights in the industry, advice on long-term strategic direction and tools for immediate help is a must-have read for pharmaceutical companies and their CRO partners.

CRO - Contract Research Organization: How Drug Research is Evolving Jakob Miera, 2014-02-01 This book deals in general with mergers & acquisitions in the CRO industry, and more specifically with reasons for M&A, success factors during the M&A process, and why M&A can fail in the Contract Research Organization industry. The pharmaceutical industry faces increasing obstacles in respect to the development and introduction of new medications. That has to do with stricter requirements for admission and sharper controls by authorities. Today, the research and development of a new drug can easily consume more than \$800 million and lasting between 10 and

15 years. Due to these facts pharmaceutical companies are looking for an alternative in the drug development process. A popular alternative is the outsourcing or in-house working with Contract Research Organizations (CRO). CRO are specialized in coordination and monitoring of drug development activities. The size of the CRO market in 2012 was around \$32 billion and had an estimated market growth of around 9 - 12% for 2013. Increased outsourcing and allocation of R&D money towards CRO reflects a driving force for prospective growth. Contract Research Organizations consider mergers & acquisitions as a vital solution to achieve their objectives.

Wedding Day at the Cro-Magnons Wajdi Mouawad, 2018-01-10 As the bombs fall in Lebanon, a family prepares for their narcoleptic daughter's wedding feast. There's a main course that won't die, a bride who cannot stay awake and the small matter of an absent bridegroom... An audacious and anarchic comedy from a writer who knows first-hand what it feels like to be caught in a war-zone.

Hotel Cro-Magnon Clayton Eshleman, 1989 The title of this book comes from a hotel in the town of Les Eyzies in the French Dordogne, where the greatest concentration of Upper Paleolithic decorated shelters and caves are found. In 1868, in the Les Ayzies rock shelter called Abri de Cro-Magnon (Cro-Magnon meaning big hole in the local patois), the first skeletons of our direct ancestors were discovered. The shelter, now scoured of its holdings, can still be visited; it is part of the rockwall that undulates as the spinal backdrop of Les Eylzies; one section of the wall serves as the back wall of Hotel Cro-Magnon. The hotel can thus be thought of as the social outgrowth of our discovery of who we are. The poetics of Hotel Cro-Magnon are based on the belief that there is an archetypal poem, and that its most ancient design is probably the labyrinth. The first words of a poem, from this viewpoint, propose and nose toward a confrontation with what the writer is only partially aware of, or may not be prepared to address until it emerges, flushed forth by meanders and dead-ends. Poetry twists toward the unknown and seeks to realize something beyond the poet's

initial awareness.

Contract Research and Development Organizations-Their History, Selection, and Utilization

Shayne C. Gad, Charles B. Spainhour, David G. Serota, 2020-07-17 This volume provides a complete update of all the materials in prior volumes on the subject (including current directories to testing labs and other support establishments worldwide), while adding substantial new material on the following topics: · The history of CROs, including snapshots of CROs and a genealogy chart making clear where they came from and where they went. · Study directors and principal investigators. · The nuts and bolts of study performance. · Electronic reporting requirements – SEND and eCTD (required for NDA, BLA, ANDA, and IND submissions). · Consultants and their roles. · An expanded examination of common problems and their solutions. This book boasts complete directories to the global universe of operating labs – where they are, how to contact them, and what they do (including special capabilities). Additionally, checklists for qualifying labs and manufacturing facilities – and for auditing studies and projects at such facilities – are included. It is directed at those in industry (specifically directed at those working for companies using CRO services) but will also be of interest to scientists or administrators working in research organizations themselves. In this case, the contents of this new work are essential to the target reader because the work, regulations, and actors (CROs) have evolved and changed at a rapid pace in the 10 years since the earlier volume that the author published. Likewise, the companies using these services have come to all be almost completely dependent on outsourcing. The earlier texts remain the only source of their kind (paper or electronic) on the field and the only noncommercial guide to the global industry and this volume provides a complete update.

Cro, 2020-03-02 Second language classrooms provide unique opportunities for intellectual growth, cognitive skill development, and cultural exchange.
