The Non-designer's Design Book Robin Williams,2015 A lot has happened in the world of digital design since the first edition of this title was published, but one thing remains true: There is an ever-growing number of people attempting to design everything from newsletters to advertisements with no formal training. This book is the one place they can turn to find quick, non-intimidating, excellent design help from trusted design instructor Robin Williams. This revised and expanded classic includes a new chapter on designing with type, more quizzes and exercises, updated projects, and new visual and typographic examples that give the book a fresh, modern look. In The Non-Designer's Design Book, 4th Edition, Robin turns her attention to the basic principles that govern good design. Perfect for beginners, Robin boils great design into four easy-to-master principles: contrast, repetition, alignment, and proximity (C.R.A.P.!). Readers who follow her clearly explained concepts will produce more sophisticated and professional work immediately. Humor-infused, jargon-free prose interspersed with design exercises, quizzes, and illustrations make learning a snap—which is just what audiences have come to expect from this bestselling author.

**The Power of Moments** Chip Heath,Dan Heath,2017-10-03 The New York Times bestselling authors of Switch and Made to Stick explore why certain brief experiences can jolt us and elevate us and change us—and how we can learn to create such extraordinary moments in our life and work. While human lives are endlessly variable, our most memorable positive moments are dominated by four elements: elevation, insight, pride, and connection. If we embrace these elements, we can conjure more moments that matter. What if a teacher could design a lesson that he knew his students would remember twenty years later? What if a manager knew how to create an experience that would delight customers? What if you had a better sense of how to create memories that matter for your children? This book delves into some fascinating mysteries of experience: Why we tend to remember the best or worst moment of an experience, as well as the last moment, and forget the rest. Why “we feel most comfortable when things are certain, but we feel most alive when they’re not.” And why our most cherished memories are clustered into a brief period during our youth. Readers discover how brief experiences can change lives, such as the experiment in which two strangers meet in a room, and forty-five minutes later, they leave as best friends. (What happens in that time?) Or the tale of the world’s youngest female billionaire, who credits her resilience to something her father asked the family at the dinner table. (What was that simple question?) Many of the defining moments in our lives are the result of accident or luck—but why would we leave our most meaningful, memorable moments to chance when we can create them? The Power of Moments shows us how to be the author of richer experiences.

**Tragic Design** Jonathan Shariat,Cynthia Savard Saucier,2017-04-19 Bad design is everywhere, and its cost is much higher than we think. In this thought-provoking book, authors Jonathan Shariat and Cynthia Savard Saucier explain how poorly designed products can anger, sadden, exclude, and even kill people who use them. The designers responsible certainly didn't intend harm, so what can you do to avoid making similar mistakes? Tragic Design examines real case studies that show how certain design choices adversely affected users, and includes in-depth interviews with authorities in the design industry. Pick up this book and learn how you can be an agent of change in the design community and at your company. You'll explore: Designs that can kill, including the bad interface that doomed a young cancer patient Designs that anger, through impolite technology and dark patterns How design can inadvertently cause emotional pain Designs that exclude people through lack of accessibility, diversity, and justice How to advocate for ethical design when it isn't easy to do so Tools and techniques that can help you avoid harmful design decisions Inspiring professionals who use design to improve our world

**Design for People** Karrie Jacobs,2016 Most design books focus on outcome rather than on process. Scott Stowell's Design for People is groundbreaking in its approach to design literature. Focusing on 12 design projects by Stowell's design firm, Open, the volume offers a sort of oral history as told by those involved with each project--designers, clients, interns, collaborators and those who interact with the finished product on a daily basis. In addition to the case studies, the book features texts from influential figures in the design world, including writer Karrie Jacobs, founding editor-in-chief of Dwell magazine; plus contributions from Pierre Bernard, revolutionary French graphic artist and designer; Charles Harrison, pioneering industrial designer; Maira Kalman, artist and writer; Wynton Marsalis, composer and musician; Emily Pilloton, design activist and author of Design Revolution; Michael Van Valkenburgh, landscape architect and professor at Harvard's Graduate School of Design; and Alissa Walker, design writer and urban advocate.

**Design History Beyond the Canon** Jennifer Kaufmann-Buhler,Victoria Rose Pass,Christopher Wilson,2019-02-07 Design History Beyond the Canon subverts hierarchies of taste which have dominated traditional narratives of design history. The book explores a diverse selection of objects, spaces and media, ranging from high design to mass-produced and mass-marketed objects, as well as counter-cultural and sub-cultural material. The authors' research highlights the often marginalised role of gender and racial identity in the production and consumption of design, the politics which underpins design practice and the role of designed objects as pathways of nostalgia and cultural memory. While focused primarily on North American examples from the early 20th century onwards, this collection also features essays examining European and Soviet design history, as well as the influence of Asia and Africa on Western design practice. The book is organised in three thematic sections: Consumers, Intermediaries and Designers. The first section analyses a range of designed objects and spaces through the experiences and perspectives of users. The second section considers intermediaries from both technology and cultural industries, as well as the hidden labour within the design process itself. The final section focuses on designers from multiple design disciplines including high fashion, industrial design, interior design, graphic design and design history pedagogy. The essays in all three sections utilise different research methods and a wide range of theoretical approaches, including feminist theory, critical race theory, spatial theory, material culture studies, science and technology studies and art history. Design History Beyond the Canon

brings together the most recent research which stretches beyond the traditional canon and looks to interdisciplinary methodologies to better understand the practice and consumption of design.
