UbiComp 2004: Ubiquitous Computing Nigel

Davies,Elizabeth Mynatt,Itiro Siio,2011-04-05 Welcome to the proceedings of UbiComp 2004. In recent years the ubiquitous computing community has witnessed a significant growth in the number of conferences in the area, each with its own distinctive characteristics. For UbiComp these characteristics have always included a high-quality technical program and associated demonstrations and posters that cover the full range of research being carried out under the umbrella of ubiquitous computing. Ours is a broad discipline and UbiComp aims to be an inclusive forum that welcomes submissions from researchers with many different backgrounds. This year we received 145 submissions. Of these we accepted 26, an acceptance rate of just under 18%. Of course acceptance rate is simply a measure of selectivity rather than quality and we were particularly pleased this year to note that we had a large number of high-quality submissions from which to assemble the program for 2004. The broad nature of ubiquitous computing research makes reviewing UbiComp

submissions a particular challenge. This year we adopted a new process for review and selection that has, we hope, resulted in all authors obtaining - tremely detailed feedback on their submission whether or not it was accepted for publication. We believe the process enabled us to assemble the best pos- ble program for delegates at the conference. If you submitted a paper, we hope that you bene?ted from the feedback that your peers have provided, and if you attended UbiComp 2004 we hope that you enjoyed the technical program.

People and Computers XVI - Memorable Yet Invisible
Xristine Faulkner, Janet Finlay, Francoise Detienne, 2012-12-06 For the last 20 years the dominant form of user interface has been the Graphical User Interface (GUI) with direct manipulation. As software gets more complicated and more and more inexperienced users come into contact with computers, enticed by the World Wide Web and smaller mobile devices, new interface metaphors are required. The increasing complexity of software has introduced more options to the user. This seemingly increased control actually decreases control as the number of options and features available to them overwhelms the users and 'information overload' can occur (Lachman, 1997). Conversational anthropomorphic interfaces provide a possible alternative to the direct manipulation metaphor. The aim of this paper is to investigate users reactions and assumptions when interacting with anthropomorphic agents. Here we consider how the level of anthropomorphism exhibited by the character and the level of

interaction affects these assumptions. We compared characters of different levels of anthropomorphic abstraction, from a very abstract character to a realistic yet not human character. As more software is released for general use with anthropomorphic interfaces there seems to be no consensus of what the characters should look like and what look is more suited for different applications. Some software and research opts for realistic looking characters (for example, Haptik Inc., see <http://www.haptik.com>). Others opt for cartoon characters (Microsoft, 1999) others opt for floating heads (Dohi & Ishizuka, 1997; Takama & Ishizuka, 1998; Koda, 1996; Koda & Maes, 1996a; Koda & Maes, 1996b).

Knowledge: How Knowledge Management is Changing the Way We Do Business “You may think you know knowledge management, but this is new—how knowledge initiatives can incorporate social media, mobile technologies, and learning, for example. This book integrates the new knowledge management with the best of the old, such as communities of practice and measurement. KM still matters, and this book tells you why.” —Thomas H. Davenport, President’s Distinguished Professor of IT and Management, Babson College Over the last decade, knowledge management has emerged as a key success factor for the modern corporation, driven by tremendous advances in business analytics. This book studies the best practices in knowledge management and how leadership companies are applying them today. —Virginia M. Rometty, Senior Vice President and Group Executive Sales, Marketing and Strategy, IBM “APQC has been on the leading edge of knowledge management for almost two decades. O’Dell and Hubert have captured those best practices and created a road map to transform the way people work. Reap the benefits of their experience.” —C. Jackson Grayson, Chairman and Founder, APQC and co-author of *If Only We Knew What We Know* “The New Edge in Knowledge is a useful how-to manual that takes best practice sharing and organizational capability building to the next level: Web 2.0, social networking, mobility, and communities of practice. Gary Shilling & Co., Inc. I highly recommend it for your bookshelf." —Dr. Nick Bontis, Director, Institute for Intellectual Capital Research "Food for thought from two of the pioneers. Carla O'Dell and Cindy Hubert have been in the trenches with many of the organizations that have succeeded in leveraging KM for business benefit. They recognized early the symbiotic relationship between knowledge flow and work flow and have guided practitioners in the quest to optimize and streamline both." — Reid Smith, Enterprise Content Management Director, Marathon Oil Company "Carla O'Dell and Cindy Hubert take knowledge management from vague idea to strategic enabler. In so doing, they clear up the not only the whats, but the whys and the hows. This book establishes knowledge management as an organizational discipline. The authors offer a straightforward set of execution steps, coaching readers on how to launch their own knowledge management programs in a deliberate and rigorous way." —Jill Dyché, Partner and Co-Founder, Baseline Consulting; Author of Customer Data Integration: Reaching a Single Version of the Truth "The authors and APQC have put together an excellent 'how to' manual for

Knowledge Management (KM) that can benefit any organization, from those experienced in KM to those just starting. The authors have taken their years of experience and excellence in this field and written a masterful introduction and design manual that incorporates industry best-practices and alerts readers to the pitfalls they are likely to encounter. This book needs to be in the hands of every KM professional and corporate senior leader.”

The Networked Health-Relevant Factors for Office Buildings

Werner Seiferlein, Christine Kohlert, 2020-12-19 People who work in an office spend at least a third of their lifetime in these spaces. The planning of office and administration buildings can therefore contribute a great deal to the satisfaction and well-being of future users. The book looks at the health-relevant factors that affect people in office and administration buildings and therefore deserve special attention in the planning process. In doing so, the authors are guided by a concept of health as defined by the World Health Organization: Accordingly, health encompasses mental as well as social and physical well-being and thus goes far beyond the factors laid down in legal norms and guidelines. In this volume, architects and designers, physicians and ergonomists deal with all aspects of interior design seen from a health perspective: What role does colour design play, what significance do light, air and noise have? What does a demand-oriented building technology look like and how is the office furniture adequately designed? Which medical and hygienic aspects have to be considered? How can offices be designed in terms of work-life balance and how will the office change in the course of digitalisation? The book serves as a guideline that can be applied chapter by chapter in the planning of health-promoting office spaces - depending on the interests of the reader. Problems that arise are discussed using examples, and checklists help you with planning and implementation. The guide is aimed at building owners, architects, engineers, but also at lawyers, psychologists and doctors as well

as university members in the field of economics and engineering.
