Analyzing Baseball Data with R, 2018-01-17 With its flexible capabilities and open-source platform, R has become a major tool for analyzing detailed, high-quality baseball data. *Analyzing Baseball Data with R* provides an introduction to R for sabermetricians, baseball enthusiasts, and students interested in exploring the rich sources of baseball data. It equips readers with the necessary skills and software tools to perform all of the analysis steps, from gathering the datasets and entering them in a convenient format to

visualizing the data via graphs to performing a statistical analysis. The authors first present an overview of publicly available baseball datasets and a gentle introduction to the type of data structures and exploratory and data management capabilities of R. They also cover the traditional graphics functions in the base package and introduce more sophisticated graphical displays available through the lattice and ggplot2 packages. Much of the book illustrates the use of R through popular sabermetrics topics, including the Pythagorean formula, runs expectancy, career trajectories, simulation of games and seasons, patterns of streaky behavior of players, and fielding measures. Each chapter contains exercises that encourage readers to perform their own analyses using R. All of the datasets and R code used in the text are available online. This book helps readers answer questions about baseball teams, players, and strategy using large, publically available datasets. It offers detailed instructions on downloading the datasets and putting them into formats that simplify data exploration and analysis. Through the book's various examples, readers will learn about modern sabermetrics and be able to conduct their own baseball analyses.

Les marchés du sport Gary Tribou, Fabien Ohl, 2004-01-12 Les marques de sport s'imposent désormais dans la mode et doivent, par ailleurs, s'adapter à l'intégration des réseaux de distribution. Les magasins de sport traditionnels sont en concurrence directe avec la grande distribution et les boutiques de prêt-à-porter. Quant aux consommateurs, dont les choix sont de moins en moins prévisibles, s'ils jouent le jeu de la publicité des marques, ils tendent parfois à s'en affranchir. En s'appuyant sur des analyses sociologiques et marketing étoffées de nombreuses données documentaires, les auteurs donnent les repères indispensables à la compréhension des principaux marchés du sport et des stratégies marketing de la distribution. Cet ouvrage s'adresse aux professionnels de l'industrie et de la distribution du sport, aux enseignants de gestion du sport et à leurs étudiants, ainsi qu'à tous ceux qui portent un intérêt à l'économie du sport en général. Fabien OHL, docteur en sociologie et professeur des universités, dirige l'équipe d'accueil en Sciences du Sport à l'UFR STAPS de l'université Marc Bloch de Strasbourg. Il est éditeur, pour l'Europe, de la Revue Internationale de Sociologie du Sport. Gary TRIBOU,

docteur en sciences de gestion et diplômé d'études politiques, est maître de conférences au sein de la même université où il dirige le DESS de Marketing et Gestion du Sport. Il enseigne également le marketing du sport en écoles de commerce (ESSEC, IECS, CEMAS). Ils ont publié plusieurs ouvrages portant notamment sur le marketing du sport et le sponsoring sportif. Ils réalisent régulièrement des études de marchés pour les entreprises de l'industrie du sport et de la distribution. Sociologie des comportements d'achat.
