Digitally Enabling 'Learning by Doing' in Vocational Education Selena Chan, 2021-08-02 This book introduces, rationalizes and describes some ways to

circumvent the challenges of providing 'hands-on' learning when programmes with practice-based focuses have to be offered via distance learning. It presents a framework to help deconstruct the many aspects of 'learning to become' a professional or practitioner. Then, it demarcates the skills, knowledge and attributes towards ensuring learners are prepared for the exigencies of the future of work. The book details the types of pedagogical approaches, including project/inquiry/problem-based learning, which help assist learners to learn both the competencies and capabilities required. It introduces technology-enhanced learning (TEL) platforms and tools supporting 'education 4.0', and presents a series of contemporary research studies on the integration of TEL, which are augmented and updated to allow for the challenges of provisioning opportunities for 'learning by doing' through distance learning. Finally, the book proposes recommendations to help ensure that institutions are better prepared for the sustainable shift to distance learning.

Digitally Disrupted Space Anastasia Panori, 2024-02-15 Digitally Disrupted Space: Proximity and New Development Opportunities for Regions and Cities develops an analytical framework of the key structural elements in relation to digital space and its impact on existing spatial interactions at a regional and urban level. It puts forth the argument that digital space is a new form of space acting complementary to existing spatial structures and creating novel interactions between and/or within them. It explores how digital space enhances connected intelligence by combining knowledge-intensive activities, cooperation between organisational and institutional actors, and smart environments of knowledge creation and diffusion. Readers will better understand the connections between digital transformations and traditional paths of regional development, as well as underlying mechanisms fostering externalities and proximity emergence, triggering effective collaboration between the digital and other expressions of space. The first set of chapters (Part I) focuses on space disruptions in a digitalising world. The key notions of space and digital space are defined, alongside the main concepts that form it in relation to space dynamics, space connectors and space routines. The following group of chapters (Part II) discuss aspects related to the digital space reshaping transition processes, exploring the role of digital space under the multi-level perspective and the digital space in the forefront of twin transition. Finally, the last three chapters (Part III) focus on digital space challenges and opportunities for regional development. A specific focus is given in three key areas of regional development and the ways in which digital space can enhance them, including Productivity, Resilience and Inclusion. Academics and

researchers will find insights into how cities and regions can adopt this new developmental paradigm; how to organise connected intelligence within regional and urban environments; and how to sustain productivity, resilience and inclusion through the use of digital space. Digital transformation managers in the public sector and entrepreneurs in private organisations can leverage the opportunities offered from this transition process, not only by identifying actions and strategies for boosting their productivity, but also for making them more resilient during socio-economic, environmental and health crises. And professionals and policymakers in urban and regional development will find concrete guidance about the design, development and management of the digital space and the creation of connected intelligence environments at the urban and regional level. Thoroughly analyzes the role of digital space to complement existing structures and generate new interactions and networks, revealing the digital elements that are essential for the rise of new dynamics, connectors and routines Positions the digital space emergence under the framework of a multi-level transition perspective, shedding light on how digital space reshapes transition processes Explores the potential challenges and opportunities arising from the emergence of the digital space for regional development

Digitally Supported Disciplinary Literacy for Diverse K-5 Classrooms Jamie Colwell, Amy Hutchison, Lindsay Woodward, 2020-07-10 This book focuses on how elementary teachers might plan for and incorporate digitally-supported disciplinary literacy into English Language Arts, Mathematics, Science, and Social Studies to reach all learners. To do so, the authors present the six-phase Planning Elementary Digitally-Supported Literacy (PEDDL) Framework, along with four core practices useful for considering elementary disciplinary literacy. After grounding disciplinary literacy in elementary grades, how it might support all learners, and the rationale for its inclusion in K-5 instruction, core practices are presented, along with a rationale behind those practices. Then, the authors provide an in-depth overview of the PEDDL Framework with examples and research-based underpinnings of each phase. Finally, a paired chapter approach then guides readers through each of the four core disciplines to first overview practices particular to each discipline that are appropriate for elementary grades and then provide detailed lesson planning approaches using the PEDDL Framework for each. Supplementary lesson plan examples are also offered in this book for extended

consideration of digitally-supported disciplinary literacy across K-5--

The Digitally Divided Self Ivo Quartiroli, 2012-07-10 It isn't easy to find an informed and critical look at the impact of digital media practices on human lives and minds. Perspectives on Digitally-Mediated Team Learning Laurie O. Campbell, Richard Hartshorne, Ronald F. DeMara, 2021-11-08 This book explores technology-supported andragogical and pedagogical approaches that facilitate teamwork, collaboration, communication, and problem-solving opportunities in diverse disciplines. Collaboration and communication skills are not typically developed in traditional STEM instructional practices. The purpose of the book includes expanding the learning science research base regarding how learning principles and strategies, including structured, collaborative, active, contextual, and engaging instructional settings, can support foundational STEM instruction and improve student interest and achievement. The chapters are classified into three categories: (a) empirical studies exploring the manner in which technology-enabled pedagogical principles and practices facilitate student interest in STEM courses, (b) exploration of logistical factors associated with revisioning STEM education and (c) theoretical underpinnings and literature review of digitally-mediated team learning. The book showcases full-length manuscripts advancing transformative approaches for technology-enhanced team learning within STEM disciplines. Contributions have been sought from interdisciplinary researchers, developers, and educators who engage in the research, development, and practice of adaptable digital environments for highly-effective, rewarding, and scalable team-based and collaborative learning. These include such topics as real-time tools for teams in classroom settings; learning analytics; effective technology-enabled pedagogies; and technology-enabled, collaborative, pedagogical approaches to broaden participation in STEM disciplines. Promising approaches and technologies to

advance digitally-mediated team and collaborative learning are explored including learning analytics to form effective learning teams. Further, innovative cyber-assisted observation approaches for diagnostic/assessment observation and interaction with student teams, educational data mining of large volumes of collected data, and leveraging. The book will be of interest to Higher Education Faculty in STEM, Learning Scientist, and K-12 educators and learning coaches.

The Digitally Disinterested Retta Guy, The vast amount of research regarding student experiences with digital technology has been conducted at majority institutions in higher education yet insufficient focus has been given to those students (majority Black Americans) attending Historically Black Colleges and Universities (HBCUs). For this reason, a number of primary research studies were conducted at various HBCUs across the country to determine learner characteristics, technology ownership and usage, and students' preference in terms of the learning environment. This book, *The Digitally Disinterested*, contains the findings of those studies in a form that I hope will be accessible to educators, practitioners, researchers, students and all who have an interest in higher education

Governing Digitally Integrated Genetic Resources, Data, and Literature Jerome

H. Reichman, Paul F. Uhler, Tom Dedeurwaerdere, 2016-05-19 The free exchange of microbial genetic information is an established public good, facilitating research on medicines, agriculture, and climate change. However, over the past quarter-century, access to genetic resources has been hindered by intellectual property claims from developed countries under the World Trade Organization's TRIPS Agreement (1994) and by claims of sovereign rights from developing countries under the Convention on Biological Diversity (CBD) (1992). In this volume, the authors examine the scientific community's responses to these obstacles and advise policymakers on how to harness provisions of the Nagoya Protocol (2010) that allow multilateral measures to support research. By pooling microbial materials, data, and literature in a carefully designed transnational e-infrastructure, the scientific community can facilitate access to essential research assets while simultaneously reinforcing the open access movement. The original empirical surveys of responses to the CBD included here provide a valuable addition to the literature on governing scientific knowledge commons.

Rhizome vs Regime: Southeast Asia's Digitally Mediated Youth Movements

Yatun Sastramidjaja,2023-03-30 In Indonesia, Thailand and Myanmar, democratic regression and the reconsolidation of authoritarian regimes have triggered the rise of social media-driven protest movements. These are pioneered by a new generation of activist youth, distinguishing themselves from previous student and youth movements by the digitally mediated, decentralized and diverse nature of their protest. While experimenting with digitally mediated repertoires of action adopted and adapted from similar struggles elsewhere, these protesters forge transnational links that give rise to new protest assemblages across and beyond the region. This is exemplified by the social media-based #MilkTeaAlliance, in which the distinct protests in Indonesia, Thailand, Myanmar and other countries are conjoined through extended solidarity and affinity ties in

a common “generational” struggle against entrenched authoritarianism. The youth resistance in Hong Kong was instrumental in driving this trend. Like a “rhizome” (Deleuze and Guattari 1987), these movements are characterized by connectivity, heterogeneity, multiplicity and “unbreakable” expansion. This allows for a fluid participation of various activist and non-activist groups (such as K-poppers) and the inclusion of various issues and demands in the protest, which merge into the cause of fighting systemic injustice. It also heightens the movements’ viability and resilience to repression. However, besides physical repression, protesters in all three countries face the added challenge of new modes of cyber-repression. The combined effect of repressive cyber laws, intrusive cyber surveillance and aggressive cyber troops took its toll on the protest movements’ capacities for online agitation and mobilization, thus contributing to the movements’ silencing and suppression. Yet, the resistance did not die out, as activists dodge cyber-repression and make creative uses of digital media and technologies to cultivate their resistance online, at the grassroots level, or in the cultural sphere. Meanwhile, as long as authorities remain repressive and tone-deaf to this generation’s criticism and concerns, the gulf between them looks set to widen. The longer-term implication is that this generation will remain alienated and continue to express their struggle in novel and unpredictable ways.
