STIR Futures Stephen Aikin,2012-11-16 Short term interest rate futures (STIR futures) are one of the largest financial markets in the world. The two main contracts, the Eurodollar and Euribor, regularly trade in excess of one trillion dollars and euros of US and European interest rates each day. STIR futures are also unique because their structure encourages spread and strategy trading, offering a risk reward profile incomparable to other financial markets. STIR futures are traded on a completely electronic market place that provides a level playing field, meaning that the individual can compete on exactly the same terms as banks and institutions. The sheer number of trading

permutations allows traders to find their own niche. 'STIR Futures' is a handbook to the STIR futures markets, clearly explaining what they are, how they can be traded, and where the profit opportunities are. The book has been written for aspiring traders and also for experienced traders looking for new markets. This book offers a unique look at a significant but often overlooked financial instrument. By focusing exclusively on this market, the author provides a comprehensive guide to trading STIR futures. He covers key points such as how STIR futures are priced, the need to understand what is driving the markets and causing the price action, and provides in-depth detail and trading examples of the intra-contract spread market and cross-market trading opportunities of trading STIR futures against other financial products. An essential read for anyone involved in this market.

Day One Trader John Sussex, 2009-10-09 "The catastrophic events of 2008 prove that the financial world has not learnt the lessons of my own tragic tale. But anyone who thinks that the world of derivatives is just about greedy bankers who put our pensions and savings at risk is wrong. Day One Trader is the gripping chronicle of the unknown working class heroes of the Liffe floor who shattered a glass ceiling of elitism in the City of London and helped build one of the few financial institutions that we can be proud of..." NICK LEESON Day One Trader is the exclusive story of John Sussex on his journey from son of a Basildon factory worker, leaving school at 16, to successful City financier and member of the Liffe board. Providing a unique insight to this competitive and often brutal industry, readers will discover the tactics used by dealers to survive the jungle of the pits in a story that chronicles the floor banter and characters that made Liffe a global derivatives powerhouse. Packed full of exclusive - until now unreported - stories, Day One Trader sheds new light on what motivated characters such as Nick Leeson, and provides insight to the Liffe floor star traders. Financial experts

and novices alike will be gripped by Sussex's account of the highs and lows of a career that spanned almost three decades in the history of the financial markets.
