The Ransomware Hunting Team Renee Dudley,Daniel Golden,2022-10-25 A real-life technological thriller about a band of eccentric misfits taking on the biggest cybersecurity threats of our time. "What Michael Lewis did for baseball in Moneyball, Renee Dudley and Daniel Golden do brilliantly for the world of ransomware and hackers. Cinematic, big in scope, and meticulously reported, this book is impossible to put down." —Doug Stanton, New York Times bestselling author of In Harm's Way and Horse Soldiers Scattered across the world, an elite team of code crackers is working tirelessly to thwart the defining cyber scourge of our time. You've probably never heard of them. But if you work for a school, a business, a hospital, or a municipal government, or simply cherish your digital data, you may be painfully familiar with the team's sworn enemy: ransomware. Again and again, an unlikely band of misfits, mostly self-taught and often struggling to make ends meet, have outwitted the underworld of hackers who lock computer networks and demand huge payments in return for the keys. The Ransomware Hunting Team traces the adventures of these unassuming heroes and how they have used their skills to save millions of ransomware victims from paying billions of dollars to criminals. Working tirelessly from bedrooms and back offices, and refusing payment, they've rescued those whom the often hapless FBI has been unwilling or unable to help. Foremost among them is Michael Gillespie, a cancer survivor and cat lover who got his start cracking ransomware while working at a Nerds on Call store in the town of Normal, Illinois. Other teammates include the brilliant, reclusive Fabian Wosar, a high school dropout from Germany who enjoys bantering with the attackers he foils, and his protégé, the British computer science prodigy Sarah White. Together, they have established themselves as the most effective force against an escalating global threat. This book follows them as they put their health, personal relationships, and financial security on the line to navigate the technological and moral challenges of combating digital hostage taking. Urgent, uplifting, and entertaining, Renee Dudley and Daniel Golden's The Ransomware Hunting Team is a real-life technological thriller that illuminates a dangerous new era of cybercrime.

All the Campus Lawyers Louis H. Guard,Joyce P. Jacobsen,2024-04-16 How colleges and universities can respond to legal pressures while remaining true to their educational missions. Not so long ago, colleges and universities had little interaction with the law. In the 1970s, only a few well-heeled universities even employed in-house legal counsel. But now we live in the age of tenure-denial lawsuits, free speech battles, and campus sexual assault investigations. Even athletics rules violations have become a serious legal matter. The pressures of regulation, litigation, and legislation, Louis Guard and Joyce Jacobsen write, have fostered a new era in higher education, and institutions must know how to respond. For many higher education observers and participants, including most administrators and faculty, the maze of legal mandates and potential risks can seem bewildering. Guard, a general counsel with years of higher education law experience, and Jacobsen, a former college president, map this unfamiliar terrain. All the Campus Lawyers provides a vital, up-to-date assessment of the impact of legal concerns on higher education and helps readers make sense of the most pressing trends and issues, including civil rights; free speech and expression; student life and wellness; admissions, advancement, and community relations; governance and oversight; the higher education business model; and on-campus crises, from cyberattacks to pandemics. As well as informing about the latest legal and regulatory developments affecting higher education, Guard and Jacobsen offer practical guidance to those in positions of campus authority. There has never been a more crucial time for college and university boards, presidents, inside and outside counsel, and other higher education leaders to know the law and prepare for legal challenges.

Invisible Victims and the Pursuit of Justice: Analyzing Frequently Victimized Yet Rarely Discussed Populations Blasdell, Raleigh,Krieger-Sample, Laura,Kilburn, Michelle,2021-06-18 Victims of crime may experience a wide variety of traumas that result in physical, sexual, financial, psychological, emotional, and/or social consequences. While the types of trauma can vary greatly and include lesser-known forms such as vicarious and secondary trauma, identifying and recognizing victims can be complicated. Throughout this book, experts and professionals from academia and the fields of criminal justice, social work, and mental health acknowledge victims historically overlooked by society, political movements, the media, and/or the criminal justice system - we acknowledge the invisible victims. Invisible Victims and the Pursuit of Justice: Analyzing Frequently Victimized Yet Rarely Discussed Populations pioneers the assertion that our view of victims needs to be more inclusive by exploring invisible victims that are rarely, if ever, a focus of discussions in traditional victimology textbooks. To educate the reader and begin working toward positive change, each chapter identifies an invisible victim and provides the background, controversies, issues, solutions, and areas of future research. It is crucial to identify these gaps in the field as some of the most victimized populations remain absent from important dialogue on crime victims. This book is appropriate for a wide range of readership including but not limited to criminologists, victim service providers, psychologists, sociologists, social workers, advocate groups, law enforcement, lawyers, defense attorneys, criminal justice practitioners, academicians, researchers, and students studying criminology, criminal justice, victimology, social work, psychology, and social justice.
