Firefox Craig Thomas, 2022-10-27 At the height of the Cold War, a new Soviet threat triggers a daring heist, and the stakes couldn't be higher 'A defining novel of the genre and a lost classic' James Swallow British and American intelligence services have just learned of the Soviet Union's latest aircraft: the MiG-31. Codenamed Firefox, the plane is a marvel of engineering – stealthy, hypersonic, with a thought-guided weapons system – outclassing anything flown by the West. Faced with Soviet air domination, MI6 and the CIA launch a daring mission to steal a Firefox prototype. Veteran US Air Force pilot Mitchell Gant, is sent to the Soviet Union under an assumed identity. He seems the perfect man for the job. But, deep within the icy heart of Soviet power, the stakes are overwhelming: fail this mission, and lose the war... Blending Cold War espionage suspense with high-altitude aerial action, Firefox is the original and greatest techno-thriller, from million-copy bestselling author Craig Thomas. Perfect for fans of Tom Clancy and Robert Ludlum. Praise for Firefox 'Firefox is as tense and exciting as they come' TLS 'Writes far better than Ludlum' Washington Post

Learning Firefox OS Application Development

Tanay Pant, 2015-10-09 Learn to design, build, and deploy your Firefox OS applications, built with web technologies, to the Firefox Marketplace About This Book Create beautiful and interactive Firefox OS applications by applying your knowledge of web development Cater your applications to a huge number of users by porting them to the Firefox OS

A step-by-step learning workflow with real-life applications to demonstrate the concepts Who This Book Is For This is a practical guide that uses hands-on examples to teach you how to create applications for Firefox OS and also how to port applications to Firefox Marketplace. This book is intended for developers who want to build applications for Firefox OS. An understanding of HTML5, JavaScript, and CSS is required. What You Will Learn Install, use, and access the Firefox OS simulator with the help of WebIDE Get to know about application manifest files and the essential difference between web applications and Firefox OS applications Create an application that measures the tapping speed of the user Create an application that allows a user to check in at a place with geolocation tagging Access device-specific features with WebAPIs and implement these by building a photo editing and sharing application Submit your own applications to the Firefox Marketplace and share them with others Professionally maintain the code of your application with the help of Github and deploy your hosted applications to OpenShift In Detail With broad compatibility, the latest in web technologies, and powerful development tools, Firefox is a great choice for both web developers and end users. Firefox OS's promotion of HTML5 as a first class citizen opens up the walled gardens of mobile application development for web developers. It is because of this initiative that no special SDKs are required to develop for Firefox OS. This book will help you excel in the art of developing applications for Firefox OS. It

sequentially covers knowledge building, skills acquisition, and practical applications. Starting with an introduction to Firefox OS, usage of WebIDE, and then the application structure, this book introduces applications of increasing complexity with each chapter. An application that measures your tapping speed, a geolocation tagging application, and a photo editing and sharing application are the three applications that will be built from scratch. You will learn about topics such as the difference between various types of Firefox OS applications, application manifest files, offline apps, and designing principles for applications. You will also learn to test and submit the applications to the marketplace and finally maintain the repository of the Firefox OS application. By the end, you will be able to develop beautifully designed, fully-fledged, and rigorously tested Firefox OS applications and also share them at the Firefox OS Marketplace.

Style and approach This book is an easy-to-grasp workflow with practical examples of real-world applications such as Clickr, Check In!, and FotoFox. Each chapter explains the concepts, which are then reinforced as they are demonstrated in an application or a flowchart.

Programming Firefox Kenneth C. Feldt, 2007-04-25

This is your guide to building Internet applications and user interfaces with the Mozilla component framework, which is best known for the Firefox web browser and Thunderbird email client. *Programming Firefox* demonstrates how to use the XML User Interface Language (XUL) with open source tools in the framework's Cross-Platform Component (XPCOM) library to develop a variety of projects, such as commercial web applications and Firefox extensions. This book serves as both a programmer's reference and an in-depth tutorial, so not only do you get a comprehensive look at XUL's capabilities--from simple interface design to complex, multitier applications with real-time operations--but you also learn how to build a complete working application with XUL. If you're coming from a Java or .NET environment, you'll be amazed at how quickly large-scale applications can be constructed with XPCOM and XUL. Topics in *Programming Firefox* include: An overview of Firefox technology An introduction to the graphical elements that compose a XUL application Firefox development tools and the process used to design and build applications Managing an application with multiple content areas Introduction to Resource Description Files, and how the Firefox interface renders RDF Manipulating XHTML with JavaScript Displaying documents using the Scalable Vector Graphics standard and HTML Canvas The XML Binding Language and interface overlays to extend Firefox Implementing the next-generation forms interface through XForms

Programming Firefox is ideal for the designer or developer charged with delivering innovative standards-based Internet applications, whether they're web server applications or Internet-enabled desktop applications. Firefox Craig Thomas, 2023-02-14 The New York Times—bestselling Cold War thriller: It's the most advanced stealth fighter ever developed, and his job is to steal it from the Soviets . . . The Soviets have created a new plane equipped with a weapons system that can be activated via sensors in the pilot's helmet—an advance that could shift the global balance of power. But British intelligence has a plan. There are two prototypes within the heavily secured Soviet base, and with some help from the CIA, they're going to steal one. The man chosen for the job is US pilot and troubled Vietnam veteran Mitchell Gant. First, he has to get into Russia. Then the airbase. Then the hangar. Then onto the plane and into the air. All while the KGB scrambles to stop him at any cost . . . “Like a domino fall in slow motion.” —Kirkus Reviews (starred review) “Will have you sweating bullets. Thomas misses no tricks, and tension is sustained from first page to last.” —The New York Times Book Review

A crash landing in remote, frigid Finland leaves daredevil pilot Mitchell Gant fighting for survival and trying to elude his pursuers. Meanwhile, the US and UK desperately calculate their chances of recovering the plane—and getting out of the area before the Russians arrive. They've made it this far, but will their efforts come to nothing in the end? "Lively, straightforward action." —Kirkus Reviews (starred review) "The last word in espionage thrillers." —The Pittsburgh Press
