Handbook of Research on the Global Impacts and Roles of Immersive Media Morie, Jacquelyn Ford, McCallum, Kate, 2019-12-06 The world is witnessing a media revolution similar to the birth of the film industry from the early 20th Century. New forms of media are expanding the human experience from passive viewership to active participants, surrounding and enveloping us in ways film or television never could. New immersive media forms include virtual reality (VR), augmented reality (AR), mixed reality (XR), fulldome, CAVEs, holographic characters, projection mapping, and mixed experimental combinations of old and new, live, and generated media. With the continued expansion beyond the traditional frame, practitioners are crafting these new media to see how they can influence and shape the world. The Handbook of Research on the Global Impacts and Roles of Immersive Media is a collection of innovative research that provides insights on the latest in existing and emerging immersive technologies through descriptions of case studies, new business models, philosophical viewpoints, and scientific findings. While highlighting topics including augmented reality, interactive media, and spatial computing, this book is ideally designed for media technologists, storytellers, artists, journalists, designers, programmers, developers, manufacturers, entertainment executives, content creators, industry professionals, academicians, researchers, and media students.

Digital Bodies Susan Broadhurst, Sara Price, 2017-10-12 This book explores technologies related to bodily interaction and creativity from a multi-disciplinary perspective. By taking such an approach, the collection offers a comprehensive view of digital technology research that both extends our notions of the body and creativity through a digital lens, and informs of the role of technology in practices central to the arts and humanities. Crucially, *Digital Bodies* foregrounds creativity, the interrogation of technologies and the notion of embodiment within the various disciplines of art, design, performance and social science. In doing so, it explores a potential or virtual new sense of the embodied self. This book will appeal to academics, practitioners and those with an interest in not only how digital technologies affect the body, but also how they can enhance human creativity.

New Media Futures Donna Cox, Ellen Sandor, Janine Fron, 2018-04-15 Trailblazing women working in digital arts media and education established the Midwest as an international center for the artistic and digital revolution in the 1980s and beyond. Foundational events at the University of Illinois and the School of the Art Institute of Chicago created an authentic, community-driven atmosphere of creative expression, innovation, and interdisciplinary collaboration that crossed gender lines and introduced artistically informed approaches to advanced research. Interweaving historical research with interviews and full-color illustrations, *New Media Futures* captures the spirit and contributions of twenty-two women working within emergent media as diverse as digital games, virtual reality, medicine, supercomputing visualization, and browser-based art. The editors and contributors give voice as creators integral to the development of these new media and place their works at the forefront of social change and artistic inquiry. What emerges is the dramatic story of how these Midwestern explorations in the digital arts produced a web of fascinating relationships. These fruitful collaborations helped usher in the digital age that propelled social media. Contributors: Carolina Cruz-Niera, Collen Bushell, Nan Goggin, Mary Rasmussen, Dana Plepys, Maxine Brown, Martyl Langsdorf, Joan Truckenbrod, Barbara Sykes-Dietz, Abina Manning, Annette Barbier, Margaret Dolinsky, Tiffany Holmes, Claudia Hart, Brenda Laurel, Copper Giloth, Jane Veeder, Sally Rosenthal, and Lucy Petrovic.

On Desire Bernd Kracke, Marc Ries, 2018-07-31 Desire indicates phenomena that are implicated in a productive ambiguity. These phenomena associate basic elements of human coexistence, while also referencing complex social processes and institutions. With today's new media we experience an assemblage of desire that maps out new relationships to the social body, to sexuality and gender questions, to ownership, and to the production, perception, and appropriation of moving images. This book brings together a broad spectrum of international positions relating to the time-based, immersive arts presented at the third B3 - the Biennial of the Moving Image Frankfurt/Main 2017 - which focuses on desire in the contemporary world. An extensive essay by Marc Ries develops a theoretical framework relating the moving image to desire. Contributions by Candice Breitz, Douglas Gordon, Johan Grimonprez, Jonas Mekas, Larissa Sansour, Igor Simic, and Frederico Solmi. Desire/Begehren benennt

Phänomene, die in eine produktive Ambivalenz eingeschrieben sind. Sie assoziieren Grundelemente menschlichen Zusammenlebens, verweisen aber zugleich auf komplexe gesellschaftliche Prozesse und Institutionen. Mit den gegenwärtigen Medien erleben und erfahren wir ein Gefüge des Begehrens, das neue Verhältnisse zum sozialen Körper, zur Sexualität und Geschlechterfrage, zum Eigentum und auch zur Produktion, Wahrnehmung und Aneignung von Bewegtbildern entwirft. Der Band versammelt ein Spektrum an internationalen Positionen zeitbasierter und immersiver Künste der dritten B3 - Biennale des Bewegten Bildes Frankfurt/Main 2017 - zum Begehren in der Gegenwart. Ein umfassender Essay von Marc Ries entwickelt einen theoretischen Rahmen der Beziehung des bewegten Bildes zum Begehren. Beiträge von Candice Breitz, Douglas Gordon, Johan Grimonprez, Jonas Mekas, Larissa Sansour, Igor Simic und Frederico Solmi.

Amplifying Informal Science Learning Judy Diamond, Sherman Rosenfeld, 2023-06-30 This collection explores the broad landscape of current and future out-of-school science learning environments. Written by leading experts and innovators in informal science learning, these thoughtful and critical essays examine the changing nature of informal institutions such as science museums, zoos, nature centers, planetariums, aquaria, and botanical gardens and their impact on science education. The book examines the learning opportunities and challenges created by community-based experiences including citizen science, makerspaces, science media, escape rooms, hobby groups, and gaming. Based on current practices, case studies, and research, the book focuses on four cross-cutting themes – inclusivity, digital engagement, community partnerships, and bridging formal and informal learning – to examine how people learn science informally. The book will be of interest to STEM (science, technology, engineering and math) educators – both in and out of school – designers of science and experiential education programs, and those interested in building STEM learning ecosystems in their communities.

Recent Advances in Science and Technology Education, Ranging from Modern Pedagogies to Neuroeducation and Assessment Zacharoula Smyrniou, 2016-03-08 Science and technology education research, influenced by inquiry-based thinking, not only concentrates on the teaching of scientific concepts and addressing any misconceptions that learners may hold, but also emphasizes the ways in which students learn, and seeks avenues to achieve better learning through creativity. New developments in science and technology education rely on a wide variety of methods, borrowed from various fields of science, such as computer science, cognitive science, sociology and neurosciences. This book presents papers from the first international conference on "New Developments in Science and Technology Education" that was structured around seven main thematic axes: namely modern pedagogies in science and technology education; new technologies in science and technology education; assessment in science and technology education; teaching and learning in the light of inquiry learning methods; neuroscience and science education; conceptual understanding and conceptual change in science; and interest, attitude and motivation in science. It explores the beneficial impact of pedagogically updated practices and approaches in the teaching of science concepts, and elaborates on future challenges and emerging issues that concern science and technology education. By pointing out new research directions, the volume will inform educational practices and bridge the gap between research and practice, providing new information, ideas and perspectives. It will also promote discussions and networking among scientists and stakeholders from worldwide scientific fields, such as researchers, professors, students, and companies developing educational software.
