Furry Nation Joe Strike, 2017-10-03 Winner of the 2017 Ursa Major Award for Best Non-Fiction Work! Furry fandom is a recent phenomenon, but anthropomorphism is an instinct hard-wired into the human mind: the desire to see animals on a more equal footing with people. It's existed since the beginning of time in prehistoric cave paintings, ancient gods and tribal rituals. It lives on today—not just in the sports mascots and cartoon characters we see everywhere, but in stage plays, art galleries, serious literature, performance art—and among furry fans who bring their make-believe characters to life digitally, on paper, or in the carefully crafted fursuits they wear to become the animals of their imagination. In *Furry Nation*, author Joe Strike shares the very human story of the people who created furry fandom, the many forms it takes—from the joyfully public to the deeply personal— and how Furry transformed his own life.

FurScience! Courtney N. Plante, Stephen Reysen, Sharon E. Roberts, Kathleen C. Gerbasi, 2016-06-01 The International Anthropomorphic Research Project is a group of social scientists conducting research to gain a better understanding of the furry fandom. In the present book we present the main findings from a

variety of studies, including more than 10,000 furry participants, over the past five years. The book seeks to answer questions often asked about furies, such as what is a furry? Do furies really think they're animals? Is it true that all furies wear fursuits? Whether you've never heard of furies before or you've been a furry for decades, you're sure to learn something from this book.

A Furry Faux Paw Jessica Kara, 2022-07-26 Sometimes Your Best Self Is Your Fursona Online, MauveCat (a cool, confident, glittering pixie cat) has friends and a whole supportive furry community that appreciates her art. At home, Maeve Stephens has to tiptoe around her hoarder mother's mood and mess. When her life is at its hardest, Maeve can always slip into Mauve, her fursona, and be "the happy one," the bubbliest, friendliest artist in her community—it's even how she made her best friend, Jade. With graduation around the corner, Maeve is ready to put her lonely school days behind her and move on with her life. And while her father hasn't been home since the divorce, he does offer her a dream come true: an all-expenses paid trip to the regional furry convention. Furrylympia will have everything Maeve's been missing—friends, art mentors, and other furies! So when her

mother forbids her from going, Maeve decides to sneak out on her own. Between hitching a ride with Jade, getting a makeover from a young furry she inspired, and connecting with an art idol who could help her get into her dream school—the furcon is everything Maeve hoped for and more. A single weekend away shows Maeve how wonderful her life could be, but breaking free of the hoard means abandoning her mother, just like everyone else in their life. And Maeve isn't sure if she can—even if it destroys her, too.

Fan Identities in the Furry Fandom Jessica Ruth

Austin, 2021-08-26 Although definition can vary, to be a Furry, a person identifies with an animal as part of their personality; this can be on a mystical/religious level or a psychological level. In modern Western society having a spirit animal or animal identity can sometimes be framed as social deviance rather than religious or totemic diversity. Jessica Ruth Austin investigates how Furries use the online space to create a 'Furry identity'. She argues that for highly identified Furries, posthumanism is an appropriate framework to use. For less identified Furries, who are more akin to fans, fan studies literature is used to conceptualise their identity construction. This book argues that the Furries are not a homogenous group and with varying levels of identification within the fandom, so shows that negative media representations of the Furry Fandom have wrongly pathologized the Furries as deviants as opposed to fans.

Furry Logic Matin Durrani, Liz Kalaugher, 2016-10-06

The animal world is full of mysteries. Why do dogs slurp from their drinking bowls while cats lap up water with a delicate flick of the tongue? How does a tiny turtle hatchling from Florida circle the

entire northern Atlantic before returning to the very beach where it hatched? And how can a Komodo dragon kill a water buffalo with a bite only as strong as a domestic cat's? These puzzles – and many more besides – are all explained by physics. From heat and light to electricity and magnetism, Furry Logic unveils the ways that more than 30 animals exploit physics to eat, drink, mate and dodge death in their daily battle for survival. Along the way, science journalists Martin Durrani and Liz Kalaugher introduce the great physicists whose discoveries helped us understand the animal world, as well as the animal experts of today who are scouring the planet to find and study the animals that seem to push the laws of physics to the limit. Presenting mind-bending physics principles in a simple and engaging way, Furry Logic will appeal both to animal lovers and to those curious to see how physics crops up in the natural world. It's more of a 'howdunit' than a whodunit, though you're unlikely to guess some of the answers.

Furry and Shiny, BFF ! Mike Wyant, 2014-10-25 Furry, a young

coyote, and Shiny, a fish in the lake, become friends. After several months, Furry disappears, making Shiny very sad. Shiny looks for Furry every day and spurts water in the air to signal Furry where she is. Then, one day, Furry comes back to the lake with four small coyote pups that are her new family. They are all very excited. But, then Shiny disappears for several weeks and that makes Furry and her pups unhappy. Suddenly, Shiny spurts water to the surface to signal Furry and they are all happy again. All of a sudden, many spurts of water come out of the lake from tiny fish and Shiny introduces her new babies to Furry and her pups. It's a great time when all the fish are squirting Furry and her pups as they are dancing around enjoying playing with the water.

Furry Tales Fred Patten,2019-09-06 Tales featuring anthropomorphic animals have been around as long as there have been storytellers to spin them, from Aesop's Fables to Reynard the

Fox to Alice in Wonderland. The genre really took off following the explosion of furry fandom in the 21st century, with talking animals featuring in everything from science fiction to fantasy to LGBTQ coming-out stories. In his lifetime, Fred Patten (1940-2018)--one of the founders of furry fandom and a scholar of anthropomorphic animal literature--authored hundreds of book reviews that comprise a comprehensive critical survey of the genre. This selected compilation provides an overview from 1784 through the 2010s, covering such popular novels as *Watership Down* and *Redwall*, along with forgotten gems like *The Stray Lamb* and *Where the Blue Begins*, and science fiction works like *Sundiver* and *Decision at Doona*.
