Conics Jess Kauffman, 2023-09-05 If you have not graphed conics with a Conics Grapher, you have not experienced the euphoria of the phenomena. Most textbooks only graph the ellipse with a string, Students have a much better understand of the properties of the conics when all the conics are graphed with the author's Conics Grapher. The book also had a detailed justification of why the figure graphed is the desired conic. The book is an Algebra II or Precalculus supplementary book for high school or college undergraduates. College undergraduates studying to be mathematics or science teachers will be better prepared to teach with knowledge of the material in the book. Equations of the parabola, ellipse, and hyperbola are derived from the locus definitions. From given translated conic equations the following are located and graphed: the translated origin, axis of symmetry or major and minor axis, vertices, foci, endpoints of perpendicular focal chords (latus rectum), and asymptotes of the hyperbola. All formulae are justified and examples are given before problems and their answers are presented. The article also explains how ellipses and hyperbolas are graphed in the Func MODE on a TI-84 Plus calculator before problems are given where the student graphs these conics with a calculator. The book also has examples that change the equation of a conic from standard form to graphing or translated form before problems and their answers are presented. Contents: Locus definitions of the Conics. p. 1, Parabolas, p. 2 - 8, Ellipses, p. 9 - 14, Hyperbolas, p. 15 - 25, Conics changed from standard form to translated form, p. 26, Ellipses and hyperbolas graphed on a TI-84 Plus graphing calculator, p. 27, Problems #1-17, p. 28, Answers: Parabolas, p. 29 - 30, Ellipses, p. 30 -

Climate-Smart Food Dave Reay, 2019-01-01 This open access book asks just how climate-smart our food really is. It follows an average day's worth of food and drink to see where it comes from, how far it travels, and the carbon price we all pay for it. From our breakfast tea and toast, through breacktime chocolate bar, to take-away supper, Dave Reay explores the weather extremes the worlds farmers are already dealing with, and what new threats climate change will bring. Readers will encounter heat waves and hurricanes, wildfires and deadly toxins, as well as some truly climate-smart solutions. In every case there are responses that could cut emissions while boosting resilience and livelihoods. Ultimately we are all in this together, our decisions on what food we buy and how we consume it send life-changing ripples right through the global web that is our food supply. As we face a future of 10 billion mouths to feed in a rapidly changing climate, its time to get to know our farmers and herders, our vintners and fisherfolk, a whole lot better. Dave Reay is Professor of Carbon Management at the University of Edinburgh, UK. He has studied climate change for over 20 years, from warming impacts in the Southern Ocean, through carbon fluxes in forests, to greenhouse gas emissions from wetlands and agriculture. In 2018 he received the Chancellors Award for Teaching for his work in climate change education. His latest project involves managing a large area of coastal land in Scotland to regrow native tree species and trap a lifetimes carbon.
