## The Age of Phillis Honorée Fanonne Jeffers, 2020-02-20 In

1773, a young, African American woman named Phillis Wheatley published a book of poetry that challenged Western prejudices about African and female intellectual capabilities. Based on fifteen years of archival research, *The Age of Phillis*, by award-winning writer Honorée Fanonne Jeffers, imagines the life and times of Wheatley: her childhood in the Gambia, West Africa, her life with her white American owners, her friendship with Obour Tanner, and her marriage to the enigmatic John Peters. Woven throughout are poems about Wheatley's age—the era that encompassed political, philosophical, and religious upheaval, as well as the transatlantic slave trade. For the first time in verse, Wheatley's relationship to black people and their individual mercies is foregrounded, and here we see her as not simply a racial or literary symbol, but a human being who lived and loved while making her indelible mark on history.

**Logic as a Liberal Art** R. E. Houser, 2019-12-10 In the twenty-first century there are two ways to study logic. The more recent approach is symbolic logic. The history of teaching logic since World War II, however, casts doubt on the idea that symbolic logic is best for a first logic course. Logic as a Liberal Art is designed as part of a minority approach, teaching logic in the verbal way, in the student's natural language, the approach invented by Aristotle. On utilitarian grounds alone, this verbal approach is superior for a first course in logic, for the whole range of students. For millennia, this verbal approach to logic was taught in conjunction with grammar and rhetoric, christened the trivium. The decline in teaching

grammar and rhetoric in American secondary schools has led Dr. Rollen Edward Houser to develop this book. The first part treats grammar, rhetoric, and the essential nature of logic. Those teachers who look down upon rhetoric are free, of course, to skip those lessons. The treatment of logic itself follows Aristotle's division of the three acts of the mind (Prior Analytics 1.1). Formal logic is then taken up in Aristotle's order, with Parts on the logic of Terms, Propositions, and Arguments. The emphasis in Logic as a Liberal Art is on learning logic through doing problems. Consequently, there are more problems in each lesson than would be found, for example, in many textbooks. In addition, a special effort has been made to have easy, medium, and difficult problems in each Problem Set. In this way the problem sets are designed to offer a challenge to all students, from those most in need of a logic course to the very best students.

**Purchasing Submission Philip Hamburger, 2021-09-07** From a leading constitutional scholar, an important study of a powerful

mode of government control: the offer of money and other privileges to secure submission to unconstitutional power. The federal government increasingly regulates by using money and other benefits to induce private parties and states to submit to its conditions. It thereby enjoys a formidable power, which sidesteps a wide range of constitutional and political limits. Conditions are conventionally understood as a somewhat technical problem of 'Unconstitutional conditions'—those that threaten constitutional rights—but at stake is something much broader and more interesting. With a growing ability to offer vast sums of money and invaluable privileges such as licenses and reduced sentences, the federal government increasingly regulates by placing conditions on its generosity. In this way, it departs not only from the Constitution's rights but also from its avenues of binding power, thereby securing submission to conditions that regulate, that defeat state laws, that commandeer and reconfigure state governments, that extort, and even that turn private and state institutions into regulatory agents. The problem is expansive, including almost the full range of governance. Conditions need to be recognized as a new mode of power—an irregular pathway—by which government induces Americans to submit to a wide range of unconstitutional

arrangements. *Purchasing Submission* is the first book to recognize this problem. It explores the danger in depth and suggests how it can be redressed with familiar and practicable legal tools.

*The Brussels Effect* Anu Bradford, 2020-01-27 For many observers, the European Union is mired in a deep crisis. Between sluggish growth; political turmoil following a decade of austerity politics; Brexit; and the rise of Asian influence, the EU is seen as a declining power on the world stage. Columbia Law professor Anu Bradford argues the opposite in her important new book *The Brussels Effect*: the EU remains an influential superpower that shapes the world in its image. By promulgating regulations that shape the international business environment, elevating standards worldwide, and leading to a notable Europeanization of many important aspects of global commerce, the EU has managed to shape policy in areas such as data privacy, consumer health and safety, environmental protection, antitrust, and online hate speech. And in contrast to how superpowers wield their global influence, the Brussels Effect - a phrase first coined by Bradford in 2012 - absolves the EU from playing a direct role in imposing standards,

as market forces alone are often sufficient as multinational companies voluntarily extend the EU rule to govern their global operations. The Brussels Effect shows how the EU has acquired such power, why multinational companies use EU standards as global standards, and why the EU's role as the world's regulator is likely to outlive its gradual economic decline, extending the EU's influence long into the future.

Poet Warrior: A Memoir Joy Harjo, 2021-09-07 National bestseller An ALA Notable Book Three-term poet laureate Joy Harjo offers a vivid, lyrical, and inspiring call for love and justice in this contemplation of her trailblazing life. Joy Harjo, the first Native American to serve as U.S. poet laureate, invites us to travel along the heartaches, losses, and humble realizations of her poet-warrior road. A musical, kaleidoscopic, and wise follow-up to *Crazy Brave*, *Poet Warrior* reveals how Harjo came to write poetry of compassion and healing, poetry with the power to unearth the truth and demand justice. Harjo listens to stories of ancestors and family, the poetry and music that she first encountered as a child, and the messengers of a changing earth—owls heralding grief, resilient desert plants, and a smooth green snake curled up in surprise. She celebrates the influences that shaped her poetry,

among them Audre Lorde, N. Scott Momaday, Walt Whitman, Muscogee stomp dance call-and-response, Navajo horse songs, rain, and sunrise. In absorbing, incantatory prose, Harjo grieves at the loss of her mother, reckons with the theft of her ancestral homeland, and sheds light on the rituals that nourish her as an artist, mother, wife, and community member. Moving fluidly between prose, song, and poetry, Harjo recounts a luminous journey of becoming, a spiritual map that will help us all find home. Poet Warrior sings with the jazz, blues, tenderness, and bravery that we know as distinctly Joy Harjo.

Searching for Health Kapil Parakh, Anna Dirksen, 2021-04-20

An insider's guide to searching online, communicating with your physician, and maximizing your health from a doctor who works at Google. We've all been there. Late at night, staring into the glow of a phone trying to make sense of some health-related issue that we know nothing about. In *Searching for Health*, Dr. Kapil Parakh, with Anna Dirksen, brings to life knowledge he gained from working at Google and practicing medicine. Helping readers avoid common pitfalls, get the information they need, and partner effectively with their health team to figure out a path to good health together, the book distills decades of scientific research into a set of easy-to-

follow tips. It also incorporates • firsthand accounts of common challenges on the path to good health; • an inside look at how doctors approach and assess health-related information; • techniques that consumers can use to locate evidence-based information online, whether in blogs, social media postings, forums, or news stories; • guidance on how individuals can make the best use of new technologies, such as health trackers and other applications; • recommendations to help patients assess health information for themselves and make decisions based on what they find; • brief summaries of the scientific studies underpinning the recommendations; and • online and offline resources—including handy checklists and worksheets—to help readers prepare for appointments, discuss tough topics with their doctors, and take control of their health. In addition to helping readers find evidence-based information online, the book provides insights into what you can expect from a visit to a doctor or hospital, how to make a decision about surgery or other treatment, what tests doctors will order, which symptom trackers are really effective, and what questions to ask about medications, supplements, and more. Searching for Health is a valuable resource for charting a healthier path through life.

**Corporate Crime and Punishment** John C. Coffee, 2020-08-04 A study and analysis of lack of enforcement against criminal actions in corporate America and what can be done to fix it. In the early 2000s, federal enforcement efforts sent white collar criminals at Enron and WorldCom to prison. But since the 2008 financial collapse, this famously hasn't happened. Corporations have been permitted to enter into deferred prosecution agreements and avoid criminal convictions, in part due to a mistaken assumption that leniency would encourage cooperation and because enforcement agencies don't have the funding or staff to pursue lengthy prosecutions, says distinguished Columbia Law Professor John C. Coffee. "We are moving from a system of justice for organizational crime that mixed carrots and sticks to one that is all carrots and no sticks," he says. He offers a series of bold proposals for ensuring that corporate malfeasance can once again be punished. For example, he describes incentives that could be offered to both corporate executives to turn in their corporations and to corporations to turn in their executives, allowing prosecutors to play

them off against each other. Whistleblowers should be offered cash bounties to come forward because, Coffee writes, “it is easier and cheaper to buy information than seek to discover it in adversarial proceedings.” All federal enforcement agencies should be able to hire outside counsel on a contingency fee basis, which would cost the public nothing and provide access to discovery and litigation expertise the agencies don't have. Through these and other equally controversial ideas, Coffee intends to rebalance the scales of justice. “Professor Coffee’s compelling new approach to holding fraudsters to account is indispensable reading for any lawmaker serious about deterring corporate crime.” —Robert Jackson, professor of Law, New York University, and former commissioner, Securities and Exchange Commission “A great book that more than any other recent volume deftly explains why effective prosecution of corporate senior executives largely collapsed in the post-2007–2009 stock market crash period and why this creates a crisis of underenforcement. No one is Professor Coffee’s equal in tying together causes for the crisis.” —Joel Seligman, author, historian, former law school dean, and president emeritus, University of Rochester

*Theology without Borders* Leo D. Lefebure, 2022-06-01 Peter C. Phan's contributions to theology and pioneering work on religious pluralism, migration, and Christian identity have made a global impact on the field. The essays in *Theology without Borders* offer a variety of perspectives across Phan's fundamental work, providing an overview for anyone interested in his body of work and its influence.

Teaching North American Environmental Literature Laird Christensen, Mark C. Long, Frederick O. Waage, 2008 From stories about Los Angeles freeways to slave narratives to science fiction, environmental literature encompasses more than nature writing. The study of environmental narrative has flourished since the MLA published *Teaching Environmental Literature* in 1985. Today, writers evince a self-consciousness about writing in the genre, teachers have incorporated field study into courses, technology has opened up classroom possibilities, and institutions have developed to support study of this vital body of writing. The challenge for

instructors is to identify core texts while maintaining the field's dynamic, open qualities. The essays in this volume focus on North American environmental writing, presenting teachers with background on environmental justice issues, ecocriticism, and ecofeminism. Contributors consider the various disciplines that have shaped the field, including African American, American Indian, Canadian, and Chicana/o literature. The interdisciplinary approaches recommended treat the theme of predators in literature, ecology and ethics, conservation, and film. A focus on place-based literature explores how students can physically engage with the environment as they study literature. The volume closes with an annotated resource guide organized by subject matter.
