Geary A. Rummler, Alan P. Brache

Improvement Joan Silber, 2018-08-21 The national bestseller and New York Times Notable Book about a young single mother living in New York, her eccentric aunt, and the decisions they make that have unexpected implications for the world around them from one of America's most gifted writers of fiction, our own country's Alice Munro (The Washington Post). Reyna knows her relationship with Boyd isn't perfect, yet as she visits him throughout his three-month stint at Rikers Island, their bond grows tighter. Kiki, now settled in the East Village after a journey that took her to Turkey and around the world, admires her niece's spirit but worries that she always picks the wrong man. Little does she know that the otherwise honorable Boyd is pulling Reyna into a cigarette smuggling scheme, across state lines, where he could risk violating probation. When Reyna ultimately decides to remove herself for the sake of her four-year-old child, her small act of resistance sets into motion a tapestry of events that affect the lives of loved ones and strangers around them. A novel that examines conviction, connection, and the possibility of generosity in the face of loss, Improvement is as intricately woven together as Kiki's beloved Turkish rugs, as colorful as the tattoos decorating Reyna's body, with narrative twists and turns as surprising and unexpected as the lives all around us. The Boston Globe says of Joan Silber: No other writer can make a few small decisions ripple across the globe, and across time, with more subtlety and power. Improvement is Silber's most shining achievement yet. Without fuss or flourishes, Joan Silber weaves a remarkably patterned tapestry connecting strangers from around the world to a central tragic car accident. The writing here is funny and down-to-earth, the characters are recognizably fallible, and the message is quietly profound: We are not ever really alone, however lonely we feel. —The Wall Street Journal

Learning to Improve Anthony S. Bryk, Louis M. Gomez, Alicia Grunow, Paul G. LeMahieu, 2015-03-01 As a field, education has largely failed to learn from experience. Time after time, promising education reforms fall short of their goals and are abandoned as other promising ideas take their place. In Learning to Improve, the authors argue for a new approach. Rather than "implementing fast and learning slow," they believe educators should adopt a more rigorous approach to improvement that allows the field to "learn fast to implement well." Using ideas borrowed from improvement science, the authors show how a process of disciplined inquiry can be combined with the use of networks to identify, adapt, and successfully scale up promising interventions in education. Organized around six core principles, the book shows how "networked improvement communities" can bring together researchers and practitioners to accelerate learning in key areas of education. Examples include efforts to address the high rates of failure among students in community college remedial math courses and strategies for improving feedback to novice teachers. Learning to Improve offers a new paradigm for research and development in education that promises to be a powerful driver of improvement for the nation's schools and colleges.

Publish Don't Perish Robert N. Lussier, 2010-08-01 Today, publish or perish is hitting virtually all colleges and universities. As much as we may love to teach, without publishing we may not get a faculty position, not get tenure and promotions, and publishing often affects our salaries and ability to move to a new position. Therefore, the purpose of this book is to help you get your academic work published. Thus, anyone who is interested is getting ideas that will help them get published, and those who would like to help others publish, can benefit from this book.

Active Listening Center for Creative Leadership (CCL), Michael H. Hoppe, 2011-08-15 Active listening is a person's willingness and ability to hear and understand. At its core, active listening is a state of mind that involves paying full and careful attention to the other person, avoiding premature judgment, reflecting understanding, clarifying information, summarizing, and sharing. By learning and committing to the skills and behaviors of active listening, leaders can become more effective listeners and, over time, improve their ability to lead.

The Book of You Nelli Lähteenmäki, Nora Rosendahl, Jamie Oliver, Aleks Hoffmann, 2015-12-31 Give The Book of YOU one minute of your time each day and achieve a happier, healthier, more fulfilled life. Change can be hard and rarely happens overnight. The aim of this book is to empower you to make change happen. The Book of YOU contains 365 micro-actions, one for each day of the year, grouped under four areas - Food, Mind, Move and Love, for example: LOVE: Smile at a Stranger: Has someone ever suddenly smiled at you on a busy street? Remember the feeling after the initial surprise? Today when you are out and about, smile at a stranger. MIND: Set a Go-To-Sleep Alarm: We use alarm clocks to get us up in the morning, but for many the challenge is actually the night before - hitting the sack early enough. Tonight, decide on a bedtime and set an alarm for when it's time to go to sleep. FOOD: Go Nuts: Pay homage to the wonderful world of nuts. They're deliciously diverse in flavour, packed with protein, essential good fats and minerals, and will give you an energy boost. Try just a small handful today as a snack, or added to a meal - pecans on porridge, pine nuts over pasta or crushed walnuts over a salad. MOVE: Activate Your Abs: While you are for example making breakfast or on the bus, pull your belly button in. This activates your deep abdominal muscles that are usually asleep, which is amazing for your lower back to provide support. The action host contributors to The Book of YOU include chef Jamie Oliver, productivity expert and author of Small Move, Big Change Caroline Arnold, fitness trainer Jamie Sawyer, neuroscientists Dr Tara Swart and Dr Darya Rose, and fitness guru Dani Stevens. Life is not about how many steps you walk, how many calories you eat or your place on the leaderboard. Life is about feelings, moments, shared experiences; enjoying every victory, celebrating balance and showing vulnerability. Complete just one micro-action each day - eat more fruit, take the stairs, do a random act of kindness - and it will help you live a happier, more fulfilled life.

Improving Diagnosis in Health Care National Academies of Sciences, Engineering, and Medicine, Institute of Medicine, Board on Health Care Services, Committee on Diagnostic Error in Health Care,2015-12-29 Getting the right

diagnosis is a key aspect of health care - it provides an explanation of a patient's health problem and informs subsequent health care decisions. The diagnostic process is a complex, collaborative activity that involves clinical reasoning and information gathering to determine a patient's health problem. According to *Improving Diagnosis in Health Care*, diagnostic errors-inaccurate or delayed diagnoses-persist throughout all settings of care and continue to harm an unacceptable number of patients. It is likely that most people will experience at least one diagnostic error in their lifetime, sometimes with devastating consequences. Diagnostic errors may cause harm to patients by preventing or delaying appropriate treatment, providing unnecessary or harmful treatment, or resulting in psychological or financial repercussions. The committee concluded that improving the diagnostic process is not only possible, but also represents a moral, professional, and public health imperative. *Improving Diagnosis in Health Care*, a continuation of the landmark Institute of Medicine reports *To Err Is Human* (2000) and *Crossing the Quality Chasm* (2001), finds that diagnosis-and, in particular, the occurrence of diagnostic errors-has been largely unappreciated in efforts to improve the quality and safety of health care. Without a dedicated focus on improving diagnosis, diagnostic errors will likely worsen as the delivery of health care and the diagnostic process continue to increase in complexity. Just as the diagnostic process is a collaborative activity, improving diagnosis will require collaboration and a widespread commitment to change among health care professionals, health care organizations, patients and their families, researchers, and policy makers. The recommendations of *Improving Diagnosis in Health Care* contribute to the growing momentum for change in this crucial area of health care quality and safety.

Measure, Use, Improve! Christina A. Russell, Corey Newhouse, 2020-10-01 *Measure, Use, Improve! Data Use in Out-of-School Time* shares the experience and wisdom from a broad cross-section of out-of-school time professionals, ranging from internal evaluators, to funders, to researchers, to policy advocates. Key themes of the volume include building support for learning and evaluation within out-of-school time programs, creating and sustaining continuous quality improvement efforts, authentically engaging young people and caregivers in evaluation, and securing funder support for learning and evaluation. This volume will be particularly useful to leadership-level staff in out-of-school time organizations that are thinking about deepening their own learning and evaluation systems, yet aren't sure where to start. Authors share conceptual frameworks that have helped inform their thinking, walk through practical examples of how they use data in out-of-school time, and offer advice to colleagues.

Opportunities to Improve the U.S. Geological Survey National Water Quality Assessment Program National Research Council, Division on Earth and Life Studies, Water Science and Technology Board, Committee to Improve the U.S. Geological Survey National Water Quality Assessment Program, 2002-03-05 The U.S. Geological Survey (USGS) established the National Water Quality Assessment (NAWQA) program in 1985 to assess water quality conditions and trends in representative river basins and aquifers across the United States. With this report, the NRC's Water Science and Technology Board has provided advice to USGS regarding NAWQA five separate times as the program

evolved from an unfunded concept to a mature and nationally-recognized program in 2002. This report assesses the program's development and representative accomplishments to date and makes recommendations on opportunities to improve NAWQA as it begins its second decade of nationwide monitoring.

The Will to Improve Tania Murray Li, 2007-05-16 The Will to Improve is a remarkable account of development in action. Focusing on attempts to improve landscapes and livelihoods in Indonesia, Tania Murray Li carefully exposes the practices that enable experts to diagnose problems and devise interventions, and the agency of people whose conduct is targeted for reform. Deftly integrating theory, ethnography, and history, she illuminates the work of colonial officials and missionaries; specialists in agriculture, hygiene, and credit; and political activists with their own schemes for guiding villagers toward better ways of life. She examines donor-funded initiatives that seek to integrate conservation with development through the participation of communities, and a one-billion-dollar program designed by the World Bank to optimize the social capital of villagers, inculcate new habits of competition and choice, and remake society from the bottom up. Demonstrating that the "will to improve" has a long and troubled history, Li identifies enduring continuities from the colonial period to the present. She explores the tools experts have used to set the conditions for reform—tools that combine the reshaping of desires with applications of force. Attending in detail to the highlands of Sulawesi, she shows how a series of interventions entangled with one another and tracks their results, ranging from wealth to famine, from compliance to political mobilization, and from new solidarities to oppositional identities and violent attack. The Will to Improve is an engaging read—conceptually innovative, empirically rich, and alive with the actions and reflections of the targets of improvement, people with their own critical analyses of the problems that beset them.
