Solitons in Two-Dimensional Shallow Water Yuji Kodama,2018-12-10 Web-like waves, often observed on the surface of shallow water, are examples of nonlinear waves. They are generated by nonlinear interactions among several obliquely propagating solitary waves, also known as solitons. In this book, modern mathematical tools—algebraic geometry, algebraic combinatorics, and representation theory, among others—are used to analyze these two-dimensional wave patterns. The author's primary goal is to explain some details of the classification problem of the soliton solutions of the KP equation (or KP solitons) and their applications to shallow water waves. This book is intended for researchers and graduate students.

Representation of Lie Groups and Special Functions N.Ja. Vilenkin,A.U. Klimyk,2013-04-18

This is the last of three major volumes which present a comprehensive treatment of the theory of the main classes of special functions from the point of view of the theory of group representations. This volume deals with q-analogs of special functions, quantum groups and algebras (including Hopf algebras), and (representations of) semi-simple Lie groups. Also treated are special functions of a matrix argument, representations in the Gel'fand-Tsetlin basis, and, finally, modular forms, theta-functions and affine Lie algebras. The volume builds upon results of the previous two volumes, and presents many new results. Subscribers to the complete set of three volumes will be entitled to a discount of 15%.

China Marches West Peter C Perdue,2009-06-30 From about 1600 to 1800, the Qing empire of China expanded to unprecedented size. Through astute diplomacy, economic investment, and a series of ambitious military campaigns into the heart of Central Eurasia, the Manchu rulers defeated the Zunghar Mongols, and brought all of modern Xinjiang and Mongolia under their control, while gaining dominant influence in Tibet. The China we know is a product of these vast conquests. Peter C. Perdue chronicles this little-known story of China's expansion into the northwestern frontier. Unlike previous Chinese dynasties, the Qing achieved lasting domination over the eastern half of the Eurasian continent. Rulers used forcible repression when faced with resistance, but also aimed to win over subject peoples by peaceful means. They invested heavily in the economic and administrative development of the frontier, promoted trade networks, and adapted ceremonies to the distinct regional cultures. Perdue thus illuminates how China came to rule Central Eurasia and how it justifies that control, what holds the Chinese nation together, and how its relations with the Islamic world and Mongolia developed. He offers valuable comparisons to other colonial empires and discusses the legacy left by China's frontier expansion. The Beijing government today faces unrest on its frontiers from peoples who reject its autocratic rule. At the same time, China has launched an ambitious development program in its interior that in many ways echoes the old Qing policies. *China Marches West* is a tour de force that will fundamentally alter the way we understand Central Eurasia.

Contents Preface Chapter 1 - Introduction Chapter 2 - Car accidents Understanding our flaws Helping the victim Chapter 3 - Sports injuries Common sports injuries Walking through the cures Chapter 4 - Camping hazards The not so pleasant things while camping Weather issues Plants can be dangerous Bites Fractures General wounds Your camping companions Basic injury kit General items Emergency Conclusion References Author Bio Publisher Preface Survival of man has become slightly easier than that of other creatures, because of the modern techniques we have developed. We have enclosed and protected ourselves from the other species and the harmful aspects of nature by forming a separate society, but we still are in danger from ourselves through the activities we perform. This book intends to walk you through different scenarios of outdoor injuries that you might encounter while camping or travelling to and fro. Playing outdoors can be wearisome and without proper guidance one may not be able to perform effectively, and also get injured pretty quickly. Driving can create harmful scenarios and we will try and walk you through different techniques you can adopt to try and overcome such scenarios. What happens after going through an accident can be traumatic and confusing; having knowledge of how to deal with such situations can really come in handy. Camping guidelines are provided so that you can make the best choices for yourself and be out there to solely enjoy yourself and not to worry about anything. Hopefully, you have everything packed to tackle all situations and overcome all emergencies. All said, this book runs you through the times when you need help and guidance and that is what we have attempted to provide you with. With your common sense and better judgment, this book will complete your guide to outdoor adventures.

Aux questions le plus souvent posées et aux suggestions pour y répondre, s'ajoutent des conseils concernant la préparation à l'entretien d'embauche. Cela va du bilan personnel que tout candidat doit préparer (ses motivations, ses aspirations, ses points forts et ses points faibles) à la manière de s'habiller et de se comporter pendant l'entretien. Des exercices pratiques serviront également d'entraînement à l'expression orale (utile pour les étudiants des classes préparatoires et du 1er cycle universitaire). Des adresses utiles, des conseils pour préparer un curriculum vitae et un lexique en fin d'ouvrage viennent compléter l'ensemble.
