**Emergency Alert System (EAS) and All-Hazard Warnings** Linda K. Moore, 2011-04 The Emergency Alert System (EAS) is built on a structure conceived in the 1950's when over-the-air broadcasting was the best-available technol. for widely disseminating emergency alerts. It is one of several federally managed warning systems. The NOAA/NWS weather radio system has been upgraded to an all-hazard warning capability. The Dept. of Homeland Security is implementing a program that will disseminate nat. alert messages over digital broadcast airwaves, using satellite and public TV broadcast towers. This program is called the Integrated Public Alert and Warning System (IPAWS). Contents of this report: EAS Admin.; NOAA Weather Radio; All-Hazard Warning Tech.; Public Alert Warning System: The WARN Act. A print on demand report.

**Training Your Diabetic Alert Dog** Rita Martinez CpdT-K, Sue Barns Ph D, 2013-02 The Scent of Safety You can harness dogs' amazing sense of smell to manage your diabetes. Many dogs can perform this life-saving task, but they must be trained if you are to produce a reliable diabetic alert service dog (DAD). The authors bring to this book extensive experience in training for diabetic alert and assistance dog work in particular, and over half a century of training dogs for search & rescue, obedience, and therapy in general. They will guide you through this process step by step. This book helps diabetics train their own dog with the help of a professional trainer, and explains how to:

- o Select a great dog for alert work
- o Find and work with a qualified trainer
- o Understand how dogs detect changes in diabetic blood sugar levels
- o Train alerts and low/high blood sugar signals
- o Teach your dog to alert at night and in the car
- o Train other helpful skills such as

Go for Help, trailing the diabetic, and retrieving useful items (glucometer, juice box, etc.) o Troubleshoot training difficulties o Locate additional resources on training and assistance dogs And when you are done, you will experience the freedom that comes from knowing a canine friend is looking out for you.

**Network Traffic Anomaly Detection and Prevention** Monowar H. Bhuyan, Dhruba K. Bhattacharyya, Jugal K. Kalita, 2017-09-03 This indispensable text/reference presents a comprehensive overview on the detection and prevention of anomalies in computer network traffic, from coverage of the fundamental theoretical concepts to in-depth analysis of systems and methods. Readers will benefit from invaluable practical guidance on how to design an intrusion detection technique and incorporate it into a system, as well as on how to analyze and correlate alerts without prior information. Topics and features: introduces the essentials of traffic management in high speed networks, detailing types of anomalies, network vulnerabilities, and a taxonomy of network attacks; describes a systematic approach to generating large network intrusion datasets, and reviews existing synthetic, benchmark, and real-life datasets; provides a detailed study of network anomaly detection techniques and systems under six different categories: statistical, classification, knowledge-base, cluster and outlier detection, soft computing, and combination learners; examines alert management and anomaly prevention techniques, including alert preprocessing, alert correlation, and alert post-processing; presents a hands-on approach to developing network traffic monitoring and analysis tools, together with a survey of existing tools; discusses various evaluation criteria and metrics, covering issues of accuracy, performance,

completeness, timeliness, reliability, and quality; reviews open issues and challenges in network traffic anomaly detection and prevention. This informative work is ideal for graduate and advanced undergraduate students interested in network security and privacy, intrusion detection systems, and data mining in security. Researchers and practitioners specializing in network security will also find the book to be a useful reference.

**Managing Cyber Threats** Vipin Kumar,Jaideep Srivastava,Aleksandar Lazarevic,2005-11-23 Modern society depends critically on computers that control and manage the systems on which we depend in many aspects of our daily lives. While this provides conveniences of a level unimaginable just a few years ago, it also leaves us vulnerable to attacks on the computers managing these systems. In recent times the explosion in cyber attacks, including viruses, worms, and intrusions, has turned this vulnerability into a clear and visible threat. Due to the escalating number and increased sophistication of cyber attacks, it has become important to develop a broad range of techniques, which can ensure that the information infrastructure continues to operate smoothly, even in the presence of dire and continuous threats. This book brings together the latest techniques for managing cyber threats, developed by some of the world's leading experts in the area. The book includes broad surveys on a number of topics, as well as specific techniques. It provides an excellent reference point for researchers and practitioners in the government, academic, and industrial communities who want to understand the issues and challenges in this area of growing worldwide importance.

Audit Risk Alert AICPA,2017-06-19 The increasing complexity of employee benefit plan auditing and increased focus by the DOL have resulted in significant pressure for CPAs and firms performing EBP audits. To help CPAs meet the challenge of performing quality audits in this unique and complex area, the AICPA has developed this alert to assist in identifying current sources of risk within EBP audit engagements. A targeted discussion on new developments, issues auditors may face in their current audits, as well as a look at what's in the pipeline that may

affect their engagements is provided. Updates include:

*Amber Alert Program Technology* Linda K. Moore,2008

**Amber Alert** Linda Rodante,2015-10-03 Sharee Jones just wants a partner to share her love of God. She didn't

plan to get involved with a man who resents Him. And she certainly didn't plan on his large, scary dog or the mutilated dolls and the darkness plaguing her Christmas program. But she has to wonder, does God have his hand in this somewhere? And if so, how will she ever know? John Jergenson hoped taking the maintenance job at his cousin's church meant he could leave his guilt-ridden past and old life behind. But he hadn't counted on Sharee and her program. He hadn't counted on her laugh or the warmth in her hazel eyes. And he certainly hadn't counted on her wanting to know the truth about his life. He wants to leave, but Sharee, the mutilated dolls, and the sinister notes...Is Sharee in danger? Or someone else? And if he runs again, will he ever be able to live with himself?

**Emergency Communications** Linda K. Moore, 2007  
Heightened awareness of the integral role of the nation's wireless communications infrastructure in homeland security is bringing to the fore technical issues about public safety spectrum that have lain fallow for a number of years. This book covers issues concerning technology, the connection between technology standards and spectrum allocation, and the competition for spectrum among many users with diverse needs. The report in particular addresses two key issues that have attracted significant attention and controversy: interoperability and interference. Interoperability questions focus mainly on spectrum needs and compatible technology. Interference problems stem primarily from spectrum allocation decisions and radio-communications engineering that have combined to disrupt some public safety radio transmissions. Originally viewed by most industry stakeholders as separate topics, the two issues have, over time, coalesced into a single concern that questions different aspects of spectrum policy and technology

planning.

Ad-Hoc, Mobile and Wireless Networks Ioanis Nikolaidis, Kui Wu, 2010-08-24 For more than a decade, ad hoc wireless networks have galvanized the interest and sparked the imagination of researchers. Such networks consist of a set of nodes equipped with wireless interfaces and they are designed to form self-organizing and spontaneous networks. They are usually multi-hop in nature, collectively forwarding and processing data to accomplish an application task. In addition, their topologies can be highly dynamic due to the potential mobility of the nodes. All these properties, in isolation and combination, pose a plethora of research challenges as well as new application opportunities. The International Conference on Ad-Hoc Networks and Wireless (ADHOC-NOW) serves as one of the premier venues for researchers and industrial practitioners to exchange ideas in this exciting area. Following previous ADHOC-NOW conferences in Murcia, Spain (2009), Sophia Antipolis, France (2008), Morelia, Mexico (2007), Ottawa, Canada (2006), Cancun, Mexico (2005), Vancouver, Canada (2004), Montreal, Canada (2003), and Toronto, Canada (2002), the ninth ADHOC-NOW conference took place at the University of Alberta in Edmonton, Canada, during August 20-22, 2010. As the capital city of the Province of Alberta, Edmonton is a cultural, governmental, and educational center and offers year-round world-class festivals, including the Edmonton International Fringe Theatre Festival. Edmonton is also home to North America's largest indoor shopping mall, the West Edmonton Mall. The summer in Edmonton is particularly joyful and has mild temperature and long, sunny daytime.
