**Keyword Search in Databases** Jeffrey Xu Yu,Lijun Chang,Lu Qin,2022-06-01 It has become highly desirable to provide users with flexible ways to query/search information over databases as simple as keyword search like Google search. This book surveys the recent developments on keyword search over databases, and focuses on finding structural information among objects in a database using a set of keywords. Such structural information to be returned can be either trees or subgraphs representing how the objects, that contain the required keywords, are interconnected in a relational database or in an XML database. The structural keyword search is completely different from finding documents that contain all the user-given keywords. The former focuses on the interconnected object structures, whereas the latter focuses on the object content. The book is organized as follows. In Chapter 1, we highlight the main research issues on the structural keyword search in different contexts. In Chapter 2, we focus on supporting structural keyword search in a relational database management system using the SQL query language. We concentrate on how to generate a set of SQL queries that can find all the structural information among records in a relational database completely, and how to evaluate the generated set of SQL queries efficiently. In Chapter 3, we discuss graph algorithms for structural keyword search by treating an entire relational database as a large data graph. In Chapter 4, we discuss structural keyword search in a large tree-structured XML database. In Chapter 5, we highlight several interesting research issues regarding keyword search on databases. The book can be used as either an extended survey for people who are interested in the structural keyword search or a reference book for a postgraduate course on the related topics. **Keywords** John Patrick Leary,2019-01-08 “A clever, even witty examination of the manipulation of language in these days of neoliberal or late stage capitalism” (Counterpunch). From Silicon Valley to the White House, from kindergarten to college, and from the factory floor to the church pulpit, we are all called to be innovators and entrepreneurs, to be curators of an ever-expanding roster of competencies, and to become resilient and flexible in the face of the insults and injuries we confront at work. In the midst of increasing inequality, these keywords teach us to thrive by applying the lessons of a competitive marketplace to every sphere of life. What’s more, by celebrating the values of grit, creativity, and passion at school and at work, they assure us that economic success is nothing less than a moral virtue. Organized alphabetically as a lexicon, Keywords explores the history and common usage of major terms in the everyday language of capitalism. Because these words have infiltrated everyday life, their meanings may seem self-evident, even benign. Who could be against empowerment, after all? Keywords uncovers the histories of words like innovation, which was once synonymous with “false prophecy” before it became the prevailing faith of Silicon Valley. Other words, like best practices and human capital, are relatively new coinages that subtly shape our way of thinking. As this book makes clear, the new language of capitalism burnishes hierarchy, competition, and exploitation as leadership, collaboration, and sharing, modeling for us the habits of the economically successful person: be visionary, be self-reliant—and never, ever stop working.

**Keywords for Today** The Keywords Project,Colin MacCabe,Holly Yanacek,2018-09-03 Keywords for Today takes us deep into the history of the language in order to better understand our contemporary world. From nature to cultural appropriation and from market to terror, the most important words in political and cultural debate have complicated and complex histories. This book sketches these histories in ways that illuminate the political bent and values of our current society. Written by The Keywords Project, an independent group of scholars who have spent more than a decade on this work, Keywords for Today updates and extends Raymond Williams's classic work, Keywords: A Vocabulary of Culture and Society. It updates some 40 of Williams's original entries and adds 86 new entries, ranging from access to youth. The book is both a history of English, documenting important semantic change in the language, and a handbook of current political and ideological debate. Whether it is demonstrating the only recently-acquired religious meaning of fundamentalism or the complicated linguistic history of queer, Keywords for Today will intrigue and enlighten.

**Keywords; A Community of Inquiry**,2018-02-13 An irreverent critical lexicon of academic life and culture The university: The very name evokes knowledge, culture, and the magnificently universal ambition at the heart of this essential institution. Bastions of free inquiry and a free society, engines of social transformation and economic progress, enclosed gardens of ennobling reflection and creation, universities encompass the wisdom of the past and the hope of the future. Or do they? This critical glossary—written by a group of Princeton graduate students and faculty—defines fifty-eight terms common to academic life in a style that will prick both egos and consciences. From “academia” to “vocation,” “canon” to “peer review,” “discipline” to “methodology,” the book scrutinizes the often stultifying structures of modern disciplinary life, calls out a slavish devotion to “knowledge production” as the enemy of thought, and even dissects the notion of “academic excellence.” Feisty and darkly funny, passionate and deeply insightful, this book raises hard questions about teaching, research, theory, practice, and academic labor. The result is a must-read dispatch from today’s academic trenches—one that is sure to provoke discussion and debate.

**Keywords in the Press: The New Labour Years** Lesley Jeffries,Brian Walker,2017-11-16 Building on Raymond Williams' iconic Keywords released in 1975, Jeffries and Walker show how some pivotal words significantly increased in use and evolved in meaning during the years of the 'New Labour' project. Focussing on print news media, this book establishes a set of socio-political keywords for the 'Blair Years', and demonstrates how their evolving meanings are indicative of the ideological landscape in Britain at that time, and the extent to which the cultural hegemony of the New Labour project influenced the language of the commentariat. Combining corpus linguistic approaches with critical stylistics the authors conduct an analysis of two newspaper corpora using computational tools. Looking closely at textually-constructed meanings within the data, their investigation of the keywords has a qualitative focus, and sets out a clear methodology for combining corpus approaches with systematic co-textual analysis.

**Cultural Keywords in Discourse** Carsten Levisen,Sophia Waters,2017-10-15 Cultural keywords are words around which whole discourses are organised. They are culturally revealing, difficult to translate and semantically diverse. They capture how speakers have paid attention to the worlds they live in and embody socially recognised ways of thinking and feeling. The book contributes to a global turn in cultural keyword studies by exploring keywords from discourse communities in Australia, Brazil, Hong Kong, Japan, Melanesia, Mexico and Scandinavia. Providing new case studies, the volume showcases the diversity of ways in which cultural logics form and shape discourse. The Natural Semantic Metalanguage (NSM) approach is used as a unifying framework for the studies. This approach offers an attractive methodology for doing explorative discourse analysis on emic and culturally-sensitive grounds. Cultural Keywords in Discourse will be of interest to researchers and students of semantics, pragmatics, cultural discourse studies, linguistic ethnography and intercultural communication.

**Keyword Patent Searching Online** Gerald R. Black,2002

*Keywords: Identity* Mahmood Mamdani, 2004-11-17 The Alliance of Independent Publishers, a literary organization dedicated to a different kind of globalization and the Charles Leopold Mayer Foundation have invited Shanghai Literature and Art Publishing House (China), Arab Cultural Center (Morocco and Lebanon), Double Storey Books (South Africa), Sage India (India), Editions La Decouverte (France), and Other Press (United States) to participate in the creation of an unprecedented intercultural project. Entitled *Keywords*, this original and international experiment is divided into four concise volumes. Each one refers specifically to a word that is key to the understanding of the human condition. Truth, Identity, Gender, and Experience are concepts that we presume universal; therefore we would be hard-pressed to think that they refer to different systems of thought in cultures distinct from our own. *Keywords* explores the cultural specificity of these terms, and links them to issues that are most relevant for the region under consideration. Each volume of the series offers six different points of view on a given keyword. The authors, who have been carefully selected by their respective publishers for their mastery in their fields and for the clarity of their writing, have been given free rein to share their distinctive visions of the concept at hand and to emphasize particular examples that would best illustrate their unique perspectives. In the volume entitled *Gender* for example, we find a highly contemporary American analysis of the tension between feminist studies and the concept of the queer, while the Arab reading of the same word turns to the history of the Arab world to champion the cause of women and homosexuals. For the African author, identity is bound up with questions of ethnicity, race, and colonial laws. The Chinese author shows how in his country identity has been informed in the 20th century by Western references, such as Marxism and the market economy, because at its roots Chinese thought does not directly include these notions. The American author selects Tiger Woods' debate with the media to reveal how in the United States the question of identity politics defeats the ideals of multiculturalism. Experience in China may be understood classically as an actual event but also as revealing what cannot be spoken. The French reading emphasizes the contrast between the scientific experience, its psychoanalytic version, and the definition of the judgment of experience as formulated by Kant. Truth, from the American perspective, appears to have shifted from a mathematical and universal model to a contemporary notion of truth so elusive and plural that it has almost disappeared as a concept. The Indian approach is deeply historical, as it surveys the meaning of truth from the Vedas to the Gandhian ideal. The African author in this instance has chosen to ignore the history of the concept in order to concentrate on a crucial contemporary question: How well has the South African Commission for Truth and Reconciliation worked and what are its realistic limitations? The variety of the authors' backgrounds (anthropology, philosophy, sociology, epistemology) and their commitment to making *Keywords* relevant in the explosive here and now offer new parameters for envisioning the implications of the process of globalization. This project is required reading for anyone who aspires to become an informed citizen of the world. *Keywords* will be published in its entirety in 2004 by Other Press. The series will be brought out simultaneously by the other five participating publishers in the languages native to their territories. Each essay was written originally for this series and has never before been published.
