Biographical Dictionary of New Chinese Entrepreneurs and Business Leaders Wenxian Zhang, Ilan Alon, 2009 The book is an outstanding compilation. It is easy to use, the information is clear and well-presented, and the volume is smart and robustly crafted. . . The book is an important reference source for practitioners in international business, entrepreneurs and Asian studies. Bob Duckett, Reference Reviews The current compilation fills the need for a Who's Who in the Chinese business world. . . This is a useful reference for scholars and students in China studies and for business practitioners. Recommended. K.T. Wei, Choice As direct foreign investment, both inward and outward, continues to gather momentum, the need to understand the leaders of Chinese corporations is increasingly important. The Biographical Dictionary of New Chinese Entrepreneurs and Business Leaders is therefore a welcome addition to corporate and academic libraries. The encyclopedia provides up-to-date coverage of the major players in China's new economy. Dorothy Mays, Chinese Librarianship A long awaited reference volume! Professionally compiled and user-friendly. A must for the serious researcher. Leo-Paul Dana, Journal of Enterprising Communities Biographical information about business leaders and entrepreneurs in China is scattered in a variety of Chinese sources such as books, newspapers, journal articles, web pages, etc. and are difficult to locate, especially from outside of China. This biographical dictionary, written in English, which includes some 200 of the most important movers and shakers of the new Chinese economy since 1978, is a very useful reference tool for libraries of all types as well as for anyone who is interested in learning and understanding the growing influence of China as a new economic power in the world. Hwa-Wei Lee, formerly of the Library of Congress, and Ohio University Libraries This impressive effort by two leading scholars of Chinese business and society will quickly become a reference for all students and practitioners. Indeed, it is a ready vade mecum, filling the crying

gap many experts have identified in recent years. This work will set the standard for its successors: independent in its analytical assessments, broad-spectrum in its choice of entry, far-sighted in its selections. John R. McIntyre, Georgia Institute of Technology, US

The book is a must-have for any student, library, executive or entrepreneur contemplating the business environment in China. In an important society where clout is paramount and relationship is key, the book's listing of Who's Who in China is essential to success. An essential read for anyone thinking of doing business in China! J. Mark Munoz, Munoz and Associates International and author of *A Salesman in Asia* For anyone interested in interacting with China, whether doing business or not, it would be advantageous to know thy foe and thyself, as Sunzi (Sun Tzu) put it. And this work will definitely be conducive to your gaining an insight on contemporary China and its economic boom. It can be used as a reference tool or read as a textbook. Highly recommended for college and public libraries. Shixing Wen, Editor-in-Chief, Chinese Librarianship, Former President, Chinese American Librarians Association and Councilor, American Library Association

This exhaustive resource provides comprehensive coverage of the major players in the Chinese economy since the reform era, which began in 1978. It includes 200 entries briefly summarizing each individual's life and career, with a central focus on his or her accomplishments and the key roles played in the economic development of China. The emphasis of the book is on the movers and shakers of China's new economy, highlighting notable figures from both the initial economic liberalization period and the renewed growth from the early 1990s to the present time. This invaluable dictionary is the result of collaborative efforts across the globe. Over forty scholars from the United States, mainland China and Taiwan, United Kingdom, Germany, F

Entrepreneurship in the Asia-Pacific: Case Studies Jing Wang, Michitaka Kosaka, Ke Xing, Hua Bai, 2019-09-23 This book is dedicated to the analysis of the entrepreneurship in successful

companies by presenting and comparing a series of case studies in the Asia-Pacific where many new companies have been growing successfully in the 21th century. In total, 5 cases in the manufacturing industry, 4 cases in the services industry, and 3 cases related to new business and social innovation are chosen from The mainland of China, Taiwan, Japan, Australia, Malaysia and Vietnam. Each case provides insight into the entrepreneur's aspiration, the processes of personal and business developments, the factors of success, and the inspirations drawn from the analysis. These cases are analyzed and compared from the viewpoints of entrepreneur's motivation, ability of foreseeing changes and opportunities in the future business environment, core resources and innovation, knowledge management and culture for the company, determination and ethos. These are critical factors in value creation for customers and the society, especially in the future business environment. Finally, commonalities and uniquenesses in entrepreneurship relevant to industry sectors and social-economic-cultural contexts are clarified and a typical entrepreneurship model in the Asia-Pacific is proposed.

From the Other Side of the World Elmira Bayrasli, 2015-09-08

Elmira Bayrasli's worldview was turned upside down when a woman in Bosnia told her, "thanks for the help. But we need work and jobs, not foreign aid." That prompted Bayrasli to embark on a worldwide quest to find how talented people have overcome insurmountable obstacles to build high-growth businesses that are driving wealth and building communities, regions and countries. Through seven remarkable stories, Elmira Bayrasli shows why the next Steve Jobs and the next Apple, Google or Facebook is as likely to come from Nigeria, Pakistan or Mexico as Silicon Valley. She discovers that what distinguishes techies in Silicon Valley from women selling bamboo stools in Bangladesh isn't their sophistication but simply the conditions that are necessary to sustain and scale business ideas. In the absence of these obstacles, global entrepreneurship can flourish. Bayrasli paints compelling stories of extraordinary entrepreneurs creatively battling corruption, lack of infrastructure, capital shortages and underdeveloped supplier and customer networks. She offers solutions that can be utilized by entrepreneurs everywhere, and shows why micro-finance, social entrepreneurship, and foreign aid are not enough. Most importantly, she shows how the key to building successful entrepreneurial ecosystems is to provide the framework that enables start-ups to scale.

Global Information Technologies: Concepts, Methodologies, Tools, and Applications Tan, Felix B., 2007-10-31 This collection compiles research in all areas of the global information domain. New Media and China's Social Development Yungeng Xie, 2017-10-03 Starting from a history of new media, this book presents the development of network technology and media applications in China, while also examining the relationship between new media and politics, economy, culture, lifestyle, traditional media, law, knowledge, etc. As of 2014, China had been connected to the Internet for 20 years. During those two decades, China has witnessed drastic changes, from its national makeup to people's daily lives. The book analyzes the changes in China brought about by the new media on the basis of large-scale data. Further, through comparisons with international trends in new media development, it seeks to clarify the new media development in China and comprehensively demonstrate the revolution and brand-new faces of Chinese society over the past two decades in the wake of new media. As such, it outlines the bright future of new media by revisiting and summarizing the developmental courses of new media and Chinese society.

Tencent Min Tang, 2019-07-04 In this book, author Min Tang examines the political economy of the China-based leading global Internet giant, Tencent. Tracing the historical context and shaping forces, the book illuminates Tencent's emergence as a joint creation of the Chinese state and transnational financial capital. Tencent reveals interweaving axes of power on different levels, particularly interactions between the global digital industry and contemporary China. The expansion strategies Tencent has

employed—horizontal and vertical integration, diversification and transnationalization—speak to the intrinsic trends of capitalist reproduction and the consistent features of the political economy of communications. The book also pinpoints two emerging and entangling trends—transnationalization and financialization—as unfolding trajectories of the global political economy.

Understanding Tencent's dynamics of growth helps to clarify the complex nature of China's contemporary transformation and the multifaceted characteristics of its increasingly globalized Internet industry. This short and highly topical research volume is perfect for students and scholars of global media, political economy, and Chinese business, media and communication, and society.

Mobile Security Products for Android Philipp

Kratzer,Christoph Gruber,Andreas Clementi,David Lahee,Philippe Rödlach,Peter Stelzhammer,2014-10-14 We have once again tested security products for smartphones running Google's Android operating system. Our report covers details of the products made by leading manufacturers. Smartphones represent the future of modern communications. In 2013, more than 1 billion smartphones were sold, a further milestone in the advance of these devices¹. A study published by Facebook emphasises the importance of smartphones in our lives; about 80% of users make use of their smartphone within 15 minutes of waking up each day. At the same time, the traditional function of a telephone is becoming less and less important. The high quality of integrated cameras means that the smartphone is increasingly used for photography. As well as with photos, users trust their devices with their most personal communications, such as Facebook, WhatsApp and email. This brings some risks with it, as such usage makes the smartphone interesting for criminals, who attempt to infect the device with malware or steal personal data. There is also the danger brought by phishing attacks. These days, the use of security software on a PC or laptop is seen as essential. However, many smartphone users do not yet have the same sense of responsibility, even though their devices store personal data, private photos, Internet banking information or even company data. As modern smartphones are often expensive to buy, they are also an attractive target for thieves. Top-quality smartphones cost several hundred Euros. As it is not possible to physically prevent them from being stolen, they must be made less attractive to thieves. Consequently, many of today's security products contain not only malware protection, but also highly developed theft-protection functions, which make the device less attractive to thieves (e.g. by locking the device), and help the owner to find it again.

The Inside Story of China's High-tech Industry Yu Zhou,2008 In the 1980s, China faced the monumental task of creating, from

scratch, internationally competitive companies. This challenge was especially daunting in the information and communications technology sector. The Inside Story of China's High-Tech Industry describes the emergence and growth of this industry through an analysis of China's leading science park, Beijing's Zhongguancun. Zhou argues that, in the case of China, it is the conjunction of export and domestic markets that has provided the main impetus to technological learning and the development of industry competitiveness. This is the best treatment to date of China's most important innovation region.

A New GeoComputation Pattern and Its Application in Dual-Evaluation Wensheng Zhou, 2021-04-24 This book introduces Document As System (DAS), a new GeoComputation pattern, which is also a new GIS application pattern. It uses the GeoComputation language (G language) to describe and execute complex spatial analysis model in the MS Word environment, which solves the bottleneck problem of GIS application, makes GIS become a popular tool for spatial data analysis from the spatial data visualization tool, and plays an important role in the wide application of GIS technology. This book systematically introduces the theory related to the new GeoComputation pattern and the application example in the “dual-evaluation” of territorial and spatial planning, which can be used as a learning and reference manual for GIS related professionals and business personnel engaged in the “dual-evaluation” of territorial and spatial planning.

The Mobile Photographer Robert Fisher, 2014-11-17 It's been said that, with smartphones, everyone is a photographer. There is a snide implication with that statement—that camera phones aren't “real” cameras and that the people who use them aren't “real” photographers. In this book, Robert Fisher proves that today's Android devices offer cameras that are remarkably powerful and more than capable of producing images that rival those made with more “serious” equipment. In this book, Fisher

guides readers through the menus of the Android operating system, helping them to understand how to choose and use out-of-the-box controls for better images. Next, he covers add-on accessories and applications designed to enhance the devices' capabilities. While the photographic capabilities of the "base" camera are pretty terrific and will meet with rave reviews from many users, the camera really produces images that sing when suited up with DSLR functions, filters, and postproduction effects—all of which Fisher covers with prowess and technical skill.

Co-governed Sovereignty Network Hui Li,Xin Yang,2021

This open access book introduces MIN, a novel networking architecture to implement the sovereign equality of all countries in the cyberspace. Combining legal theory and network technology, it first discusses the historical development of sovereignty and expounds the legal basis of cyberspace sovereignty. Then, based on the high-performance blockchain, it describes a new network architecture designed to implement co-governance at the technical level. Explaining network sovereignty and including rich illustrations and tables, the book helps readers new to the field grasp the evolution and necessity of cyberspace sovereignty, gain insights into network trends and develop a preliminary understanding of complex network technologies such as blockchain, security mechanisms and routing strategies. The MIN network implements the our principles of cyberspace adopted by most nations and people: respecting cyber sovereignty; maintaining peace and protection; promoting openness and cooperation; and building good order to provide network system security. There maybe three scales of application scenario for MIN, the big one is for UN of Cyberspace, the middle one is for Smart city, the small one is for enterprise group or organizations as private network, MIN-VPN. We have developed the product of MIN-VPN, you could find its message on the preface if care about the security of your network.

Popular Culture Noah Berlatsky,2010-11-19 This edition

delivers contemporary perspectives on popular culture, with the majority of the material reflecting stances of countries other than the United States. Readers are offered a truly panoramic view. Essays are arranged in a thoughtful sequence that guides readers through several sides to each topic covered. Does television create obesity? Should manga depicting child pornography be illegal? Could China benefit from stronger intellectual property laws? Essays answer these and other questions about pop culture. Helpful features include an annotated table of contents, a world map and country index, a bibliography, and subject index.
