Practitioner Management of Value Courseware – English publication you are advised to obtain the official publication from TSO. MoV Practitioner is suitable for management and staff in organizations wishing to use MoV. MoV is answering the question: are we getting the optimal benefits, at affordable costs, with an acceptable risk level. It shows that we have to achieve the optimal balance between all stakeholders' needs, and the usage of resources (money, people, time, energy and material). The greater the benefits delivered and the fewer resources that are used in doing so, the higher the value ratio. It is also intended for professionals involved in directing, managing, supporting and delivering portfolios, programmes and projects, including Senior Management, Programme Managers, Project Managers, Change Managers and Project and Programme Office staff and their sponsors. MoV is also relevant for those who apply the methods in other PPM guides to build on and enhance the activities to maximize value and delivery of benefits. Management of value Michael Dallas,Stephanie Clackworthy,2010-11-04 This guide provides clear and unambiguous guidance to value management. It is the first cross-sector and universally-applicable guidance on how to maximise value in a way that takes account of an organisation's priorities, differing stakeholder needs and, at the same time, the use of resources as efficiently and effectively as possible. It is the basis for a qualification scheme, initially an APM Group Foundation level examination. It meets the requirements of all the markets it addresses (namely the PPM market with information for Senior Management), identifies the attributes, processes, techniques and benefits of value management and encourages the delivery of Value for Money; is applicable generally across all project environments and compatible with OGC's core portfolio, programme, project and risk management (P3RM) guidance
