Vocational Requirements EDUARD F. WINCKEL Lecturer, at the University of Southern California

this book help in the early liberation from the usurpers. Salam dan Bahagia EDUARD F. WINCKEL.

FOREWORD The purpose of this handbook is to supply a guide for the acquisi tion of a practical

knowledge of Malay. The Malay language, as spoken in every-day life by some eighty million people in

the Netherlands East Indies, the Malayan Peninsula, and adjacent territories, is essentially simple. It is

possible, therefore, to acquire in a few weeks a basic working knowledge of this language which will

enable those who intend to go there to get along very adequately, not only with the Indonesians, but with most of the other settled inhabitants of the extensive areas in the Far East. The more advanced student will soon perceive that there exist minor differences in the vernaculars of the various sections of Malay sia, and he will adapt himself easily to the special words, expressions, and slight variations of pronunciation in the localities which he may visit. Malaysia is a term used to designate the Malay Peninsula and all the islands of the Indian Ocean, including Indonesia. These variations are due to the fact that the indigenous population consists of many diversified tribes, each preserving its own dialect for home use but also interjecting a few words of its private lingo into the Malay, which is the lingua franca that serves them all in common. Thus, in a few cases, different words are found in various localities to express the same idea. An intelligent Indonesian, however, will never fail to understand a word from some other region, even though he would not ever use that word himself or the pronunciation might vary from his own. In order to save the newcomer any perplexity on this point, such special words have been indicated in the DICTIONARY of this book by noting in parentheses the

locality where the words are likely to be heard. Abbreviations used for this and other purposes have been listed on page 185. It should be understood, of course, that this handbook deals primarily with the conversational language which is in common use throughout the thousands of islands of the Netherlands East Indies, the Malayan Peninsula, parts of Siam, Burma, Indo-China, and the Philippine Islands. Without a knowledge of this language, it is practically impossible to conduct any kind of business or vocation in Indonesia. The influence of foreign traders and successive invaders has strongly colored this *Bngtta franca*. Words and phrases of Sanscrit, Arabic, Persian, Chinese and later of Portuguese, English, and Dutch origin have, through the ages, been introduced. These terms\* altered vii by the natives to suit the peculiar twist of the Malay tongue, have become an intrinsic part of the colloquial Malay which is taught in this book. High Malay, the purer but far more difficult language of literature, is a mixture of the original Malay of Sumatra, Sanscrit and Arabic, and has been kept fairly free from further foreign infiltrations. That rich and flowery language, however, is used only in highly cultured forms of expression which fall outside the scope of the practical work here presented.

Attention must be called to a peculiarity of Malay speech. Certain words are used by the natives only when addressing their superiors, such as their chiefs, or white people never vice versa. In this hand book, these words which will be heard, but seldom used by the Westerner are designated polite. There are also some words which the natives use only when speaking to a subordinate or close relative. The Occidental might use them occasionally to a coolie

**The Malay Art of Self-Defense** Sheikh Shamsuddin, 2005 Silat Seni Gayong is an art of self-defense, a fighting art but one that also emphasizes the development of the self, becoming a better person, and serving humanity. Sometimes compared to a tiger ready to devour its prey, Gayong helps

practitioners develop and increase physical fitness, flexibility, mental conditioning, and self-confidence. Author Sheikh Shamsuddin, who has studied Gayong for 25 years, introduces this little-known practice to Western readers in this first book on the subject in English. The most comprehensive study in any language on Gayong and its customs, *The Malay Art of Self-Defense* explores in depth the system, techniques, crucial elements, and philosophies involved. Also covered are the art's history, profiles of the most notable practitioners, and an informative Q&A collected from various martial art practitioners to expand readers' knowledge and appreciation. Included are photos of Gayong demonstrations, traditional training centers, customs, and events.

*Tribal Communities in the Malay World* Geoffrey Benjamin, 2003-08-01 The Malay World (Alam Melayu), spanning the Malay Peninsula, much of Sumatra, and parts of Borneo, has long contained within it a variety of populations. Most of the Malays have been organized into the different kingdoms (kerajaan Melayu) from which they have derived their identity. But the territories of those kingdoms have also included tribal peoples - both Malay and non-Malay - who have held themselves apart from

those kingdoms in varying degrees. In the last three decades, research on these tribal societies has aroused increasing interest. This book explores the ways in which the character of these societies relates to the Malay kingdoms that have held power in the region for many centuries past, as well as to the modern nation-states of the region. It brings together researchers committed to comparative analysis of the tribal groups living on either side of the Malacca Straits - in Indonesia, Malaysia, Thailand, and Singapore. New theoretical and descriptive approaches are presented for the study of the social and cultural continuities and discontinuities manifested by tribal life in the region.

**Living on the Edge** Andrew M Carruthers, 2018-06-27 In Indonesia's Riau Islands Province — a place envisioned as a distinctly “Malay Province” upon its legal formation in 2002 — ethnic Malays are the proud heirs and custodians of a rich legacy associated with a once-sprawling Malay empire that stretched across present-day transnational borders from Indonesia, to Singapore, to Malaysia. Malays of Bugis descent have long played a disproportionately central role in the history (and the historiography or “history-telling”) of the region that now encompasses Indonesia's Riau Islands

Province. While steadfastly “Malay”, members of this community readily acknowledge that their ethnically Bugis roots maintain an enduring historical and ideological salience in their everyday lives. However, transregional economic trends and rapid sociodemographic shift shaped by ongoing migration flows have led to feelings of “marginalization” (peminggiran) among the islands’ Malay-Bugis community. This has led them to claim that they are being gradually pushed to the literal and figurative “edges” of social life in the Riau Islands Province. Fears that a one-time ethnic “majority is becoming a minority” (mayoritas menjadi minoritas) have fuelled feelings of inter-ethnic resentment, and have shaped provincial government policies geared toward the “preservation” of Malay custom. While international focus continues to centre on Indonesia’s Chinese-pribumi divide as diagnostic of Indonesian inter-ethnic and religious relations on edge, a grounded assessment of ethnicity in the Riau islands offers an alternative perspective on these important issues.

**Other Malays** Joel S. Kahn, 2006 This simulating new reading of constructions of ethnicity in Malaysia and Singapore is an important contribution to understanding the powerful linkages between

ethnicity, religious reform, identity and nationalism in multi-ethnic Southeast Asia.

**The Malay Ideals** Asrul Zamani,2002

**Conceptualizing the Malay World** SODA Naoki,2020-02

**The Malay Peninsula** Micheal Jacq-Hergoualc'h,2002 This book attempts to give an accurate history of the Malay peninsula from the first centuries of the Christian era to the 14th century, a story of city states and chiefdoms directly connected with the commercial relationship of the maritime Silk Road.

Contesting Malayness Timothy P. Barnard,2004 Contesting Malayness assembles research on the theme of how Malays have identified themselves in time and place, developed by a wide range of scholars. While the authors describe some of the historical and cultural patterns that make up the Malay world, taken as a whole their work demonstrates the impossibility of offering a definition or even a description of Melayu that is not rife with omissions and contradictions.

**Interpreting Diversity: Europe and the Malay World** Christina Skott, 2018-04-19 This volume departs from conventional historiography concerned with colonialism in the Malay world, by turning to the use of knowledge generated by European presence in the region. The aim here is to map the ways in which European observers and scholars interpreted the ethnic, linguistic and cultural diversity which has been seen as a hallmark of Southeast Asia. With a chronological scope of the eighteenth to the early twentieth century, contributors examine not only European writing on the Malay world, but the complex origins of various forms of knowledge, dependent on local agency but always closely intertwined with contemporary metropolitan scientific and scholarly ideas. Knowledge of the peoples, languages and music of the Malay world, it is argued, came to inform and shape European scholarship within a variety of areas, such as Enlightenment science and anthropology, ideas of human progress, philological theory, ethnomusicology and emerging theories of race. But this volume also contributes to ongoing debates within the region, by discussing ideas about the Malay language and definitions of 'Malayness'. The last chapters of the book present a reversed viewpoint, in examinations of how local

cultural forms, theatrical traditions and literature were reshaped and given new meaning through encounters with cosmopolitanism and perceived modernity. This book was previously published as a special issue of *Indonesia and the Malay World*.

Lost Times and Untold Tales from the Malay World Jan van der Putten, Mary Kilcline Cody, 2009

This book brings together a group of international scholars, inspired by the scholarly perspective of Australian philologist Ian Proudfoot, who look at calendars and time, royal myths, colonial expeditions, printing, propaganda, theater, art, Islamic manuscripts, and many more aspects of Malayan history.

**The Genesis of Sri Lanka Malay** Sebastian Nordhoff, 2012-11-29 Sri Lanka Malay shows extreme language contact: Malay phonology and lexicon are squared with clearly Indian morphosyntax and semantics. Historical, anthropological, typological and structural approaches shed light on the complex genesis and rapid evolution of this language.

*The Phonetics of Malay* David Deterding, Ishamina Athirah Gardiner, Najib Noorashid, 2022-05-19

Malay is one of the major languages in the world, but there has been relatively little detailed research

on its phonetics. This Element provides an overview of existing descriptions of the pronunciation of Standard Malay before briefly considering the pronunciation of some dialects of Malay. It then introduces materials that may be used for studying the phonetics of Malay: a short text, the NWS passage; and a map-task, to generate conversational data. Based on recordings using these materials by two female and two male consultants who are academics at Universiti Brunei Darussalam, the Element next offers an acoustic analysis of the consonants and vowels of Malay, the syllable structure arising from fast speech processes, as well as the rhythm and intonation of the Standard Malay that is spoken in Brunei. Finally, it suggests directions for further research on the phonetics of Malay.

The Malay Archipelago (Vol. 1&2) Alfred Russel Wallace, 2021-01-28 The Malay Archipelago is a

book by the British naturalist Alfred Russel Wallace which chronicles his scientific exploration, during the eight-year period 1854 to 1862, of the southern portion of the Malay Archipelago including Malaysia, Singapore, the islands of Indonesia, and the island of New Guinea. The book describes each island that he visited in turn, giving a detailed account of its physical and human geography, its volcanoes, and the variety of animals and plants that he found and collected. At the same time, he describes his experiences, the difficulties of travel, and the help he received from the different peoples that he met.

*The Heritage of Traditional Malay Literature* V.I. Braginsky, 2022-06-20 Traditional literature, or 'the deed of the reed pen' as it was called by its creators, is not only the most valuable part of the cultural heritage of the Malay people, but also a shared legacy of Malaysia, Indonesia, Singapore and Brunei. Malay culture during its heyday saw the entire Universe as a piece of literature written by the Creator with the Sublime Pen on the Guarded Tablet. Literature was not just the creation of a scribe, but a scribe himself, imprinting words on the 'sheet of memory' and thus shaping human personality. This book, the first comprehensive survey of traditional Malay literature in English since 1939, embraces more than a millennium of Malay letters from the vague data of the seventh century up to the early

beginnings of the modern literatures in the late nineteenth century. The long path trodden by traditional Malay literature is viewed in historical and theoretical perspectives as a development of integral system, caused by cultural and religious changes, primarily by gradual Islamization. This changing system considered in the entirety of its genres and works, is seen both externally and internally: from the point of view of modern scholarship and through the examination of indigenous concepts of literary creativity, poetics and aesthetics. The book not only represents an original study based on a specific historico-theoretical approach, but it is also a complete reference-work and an indispensable manual for students.
