Managing Sport Mega-Events Stephen Frawley,2016-06-17 Managing Sport Mega-Events explores global developments in the management of sport mega-events. Sport mega-events such as the Olympic Games and the Football World Cup have been examined from a number of academic perspectives including history, sociology, politics, urban planning and economics. What is lacking, however, is a book which identifies and evaluates the current issues and complexities faced by those charged with the responsibility of managing these sport mega-events. This book fills the gap. The book addresses three broad but interconnected themes. First, strategic matters are explored focusing on the rise of sport mega-events, the management of stakeholders and governance issues. Second, how organisers can best ensure the sustainable management of sport mega-events is considered. Third, operational matters and related issues are examined including media management, broadcast management, venue management, risk management, marketing and sponsorship management. The book draws on leading international sport management scholars, each of whom has expertise in the organisation of sport mega-events. It makes a valuable contribution to the existing literature.

Fundamental Theories of Mega Infrastructure Construction Management Zhaohan Sheng,2017-10-20 Fundamental Theories of Mega Infrastructure Construction Management: Theoretical Considerations from Chinese Practices is a collection of decades of research and applications of managing megaprojects using theories of complex systems and management sciences. It presents basic (classical) theory of megaproject management and is a showcase of more than 30 years of research of complex system and management sciences on the theory of megaproject management resulting from the integrating of theory and practice of megaprojects. The theory and models have undergone rigorous systematic testing during the management and implementation of megaprojects in China. Megaprojects are huge undertakings, often in infrastructure (bridges, tunnels, airports, etc.) that involve huge levels of investment, often take years to complete, and typically run into delays, cost overruns, and any number of unforeseen problems. Over the last few decades, no one country has undertaken more of these projects than China, and this book presents the fundamental theories underlying the practice of Mega Infrastructure Construction Management as practiced in China. Individual chapters provide a basic definition of Mega Infrastructure Construction and it's management; an overview of the theories behind it; the Formation Path; basic concepts; fundamental principles; scientific problems; the Method System of Meta-synthesis; specialized methods in research; and intelligent management of Mega Infrastructure Construction. Although the theoretical construction management problems in this book are derived from construction practices in China, they can be applied universally and extended for great fundamental significance.

Policing Sport Mega-Events Dennis Pauschinger,2024-01-16 Security has become one of the most important aspects of sport mega-event organisation. This book explores how Rio de Janeiro was imagined and transformed into a security fortress when the 2014 Men's World Cup and the 2016 Olympics came to the city and how the fortress was nonetheless permeable and porous. Dennis Pauschinger experienced exceptional backstage access at high level in the Brazilian mega-event security architecture as well as at street level with the local public security sphere. His ethnographic account takes us from the hidden world of surveillance and control centres, to the security perimeters around stadiums, and to the mundane routine of police officers during day and night shifts at local police stations or at the Special Forces' headquarters. This book shows how police officers' emotions and Special Forces' war narratives impact the static and technology-based security models at mega-events and how traditional patterns of police work, along lines of class and racial inequalities, still prevail and shape the city's public security. The book argues against the common narrative of the positive impacts of mega-event security legacies upon host cities by advancing towards a general understanding of how security governance is carried out in places where the use of digital security technologies co-exists with overly lethal and repressive forms of policing.

Mega-Events and Mega-Ambitions: South Korea's Rise and the Strategic Use of the Big Four Events Yu-Min Joo, Yooil Bae, Eva Kassens-Noor, 2017-07-04 This book provides a holistic analysis of South Korea's strategic use of mega-events in its modern development. It examines the Summer Olympics (1988), the World Expo (1993), the FIFA World Cup (2002), and the Winter Olympics (2018) over the past 30 years of the country's rapid growth, and across varying stages of economic and political development. It explains how mega-events helped to secure South Korea's position on the international stage, boost nationalism, propel economic growth in export-oriented national companies, and build cities that accommodate – as well as represent – South Korea's progress. It thereby highlights the broader implications for today's global phenomenon of increasing reliance on mega-events as a catalyst for development, while the criticism that mega-events do more harm than good proliferates. The book is ideal for academics, policymakers, and those with an interest in mega-events and their role in the development of non-western countries.

Mega-events and Urban Image Construction Anne-Marie Broudehoux, 2017-02-17 While societies shape the way their cities look and are represented, urban images, in turn, nurture and structure social relations in multiple ways. Nowhere is this dialectical relationship between social processes and urban representations more visible than in the hosting of global spectacles such as the FIFA World Cup and the Olympic Games, which both embody some of societys deepest dreams and desires. The focus of this book is the image of cities. It is not only interested in the mechanisms of urban image construction but also in the politics of such a phenomenon, especially its social impacts in terms of representation and right to the city. The book investigates the complex power relationships that underscore the production of the urban landscape and the construction and diffusion of urban images, especially in the context of urban mega-events. It uses the notion of urban image construction as a lens through which to examine the mega-event spectacle, with chapters exploring the physical, social and political dimensions of the imagineering process as well as emerging resistance to controversial initiatives. Through an analysis of event-related urban construction efforts in Rio de Janeiro and Beijing, this book examines the effects of mega-events upon the construction of an exclusive vision of urbanity. It demonstrates how mega-events are increasingly utilized by local political and economic elites to reconfigure power relations, strengthen their hold upon the urban territory and exclude vulnerable population groups. The book thus offers a critical analysis of the practice of urban image construction, and will be of interest to those working in geography, urban studies, tourism, sport studies, development studies and politics.

Impacts and strategic outcomes from non-mega sport events for local communities Marijke Taks, Laurence Chalip, B. Christine Green, 2017-10-02 Do small- and medium-sized sporting events affect the overall wellbeing of people living in the host community? If so, how they do they affect local life? This book specifically addresses the strategic choices that host communities make when hosting non-mega sporting events, and looks at the outcomes of those choices. The contributions to this study assess a variety of tangible and intangible effects, including the economic and social impacts, and the effect on tourism and participation in sport. It contains analysis of a variety of events, including spectator and participant events, single-sport and multi-sport events, and one-day and multi-day events, all hosted in different types of cities and communities around the globe. Overall, this book identifies and extends our understanding of the nature, management, and implications of non-mega sporting events. The impacts and strategic outcomes highlighted here have practical value for sport event management and strategy, and advance our understanding of the economic and social consequences of hosting an event. This book was originally published as a special issue of European Sport Management Quarterly.

Mega-regionalism and Great Power Geo-economic Competition Xianbai Ji, 2021-09-22 The regional trade governance architecture is in flux. The latest wave of regionalism in the form of mega-regional trade partnerships between countries with major shares of the world economy occurred in the aftermath of the Global Financial Crisis of 2008-09. The most systematically important mega-FTAs included the Trans-Pacific Partnership led by the United States (US), the China-backed Regional Comprehensive Economic Partnership, and the Transatlantic Trade and Investment Partnership between the European Union (EU) and the US. Drawing on policy diffusion and competitive regionalism literatures, Xianbai Ji develops an innovative model of competitive spill-over to uncover the historical and contemporary sources of mega-regionalism resulting from a temporal clustering of mega-FTA initiatives from great powers. In the book, mega-FTA is conceptualised as an instrument of geo-economic competition between the US, China, and the EU. Each aspired to leverage its mega-FTA to gain an edge over its rivals in economic, geopolitical, and legal terms. Through a mix-method research strategy involving computable general equilibrium modelling, game theory, desk research, and perception survey, Ji generates an impressive chorus of quantitative, qualitative, and perceptual data demonstrating that the rise of mega-regionalism was driven by the multidimensional competition between the US, China, and the EU over international economic benefits, geopolitical influence, and the authority to write rules governing emerging trade issues. This book will attract academics, think tankers, practitioners, and postgraduate students interested in regionalism, international trade, international political economy, applied trade policy analysis, great power competition, geo-economics, and international relations.
