2 **THE MEMORY BOOK** LARA AVERY,2016-07-05 They tell me that my memory will never be the same, that I’ll start forgetting things. At first just a little, and then a lot. So I’m writing to remember. Sammie McCoy is a girl with a plan: graduate at the top of her class and get out of her small town as soon as possible. Nothing will stand in her way—not even the rare genetic disorder the doctors say will slowly steal her memories and then her health. So the memory book is born: a journal written to Sammie’s future self, so she can remember everything from where she stashed her study guides to just how great it feels to have a best friend again. It’s where she’ll record every perfect detail of her first date with longtime-crush Stuart, a gifted young writer home for the summer. And where she’ll admit how much she’s missed her childhood friend Cooper, and the ridiculous lengths he will go to make her laugh. The memory book will ensure Sammie never forgets the most important parts of her life—the people who have broken her heart, those who have mended it—and most of all, that if she’s going to die, she’s going to die living. This moving and remarkable novel introduces an inspiring character you’re sure to remember, long after the last page.

From the United States Memory Championship to deep within the author’s own mind, this is an electrifying work of journalism that reminds us that, in every way that matters, we are the sum of our memories.

📖 **MEMORY LESSONS** Jerald Winakur, 2009-01-01 The story of becoming a doctor, and being a son. Jerald Winakur is a doctor who cares for, and about, the elderly. Dedicated and compassionate, he’s a surrogate son to many. And yet, all his years of service helping patients and their families adjust to the challenges of aging did not prepare him for becoming father to his own father, who had become as needy as any child. In Memory Lessons--a tender and provocative book--Dr. Winakur writes about what it’s like to be medical counselor to countless patients, while disclosing his personal heartbreak at watching his 86-year-old father descend into disability and dementia, his mother at his side. In both of these roles--highly skilled professional and loving son--he finds he is hard pressed to alter a course that devastates his dad and tears at his family. But he does what he can. A doctor who does his best to listen carefully to each patient in turn, who attempts to confront every problem with, as he says, a reasonable fund of knowledge, a modicum of common sense, and a large dose of honesty, Dr. Winakur knows that there is much we can do by loving and listening. We all search for answers; we all want to do the right thing for our parents, but few of us know what that right thing is. Faced with caring for a growing sea of elders, Dr. Winakur reflects on his thirty years in the medical profession to consider the very personal and immediate questions asked by families every day: What are we going to do with Dad? Who will care for him--and how? These are urgent questions, and they’re faced head-on in Memory Lessons with unflinching honesty, hope, and, above all, love.

📖 **ADVENTURES IN MEMORY** Hilde 📖 stby, Ylva 📖 stby, 2018 What makes us remember? Why do we forget? And what, exactly, is a memory? With playfulness and intelligence, Adventures in Memory answers these questions and more, offering an illuminating look at one of our most fascinating faculties. The authors--two Norwegian sisters, one a neuropsychologist and the other an acclaimed writer--skillfully interweave history, research, and exceptional personal stories, taking readers on a captivating exploration of the evolving understanding of the science of memory from the Renaissance discovery of the hippocampus--named after the seahorse it resembles--up to the present day. Mixing metaphor with meta-analysis, they embark on an incredible journey: diving for seahorses for a memory experiment in Oslo fjord, racing taxis through London, and time-traveling to the future to reveal thought-provoking insights into remembering and forgetting. Along the way they interview experts of all stripes, from the world’s top neuroscientists to famous novelists, to help explain how memory works, why it sometimes fails, and what we can do to improve it. Filled with cutting-edge research and nimble storytelling, the result is a charming--and memorable--adventure through human memory.--
