Handbook of Multilingualism and Multilingual Communication Peter Auer, Li Wei, 2007-01-01 This volume is an up-to-date, concise introduction to bilingualism and multilingualism in schools, in the workplace, and in international institutions in a globalized world. The authors use a problem-solving approach and ask broad questions about bilingualism and multilingualism in society, including the question of language acquisition versus maintenance of bilingualism. Key features: provides a state-of-the-art description of different areas in the context of multilingualism and multilingual communication presents a critical appraisal of the relevance of the field, offers solutions of everyday language-related problems international handbook with contributions from renowned experts in the field

**Multilingual Norms** Madalena Cruz-Ferreira, 2010 Multilinguals are not multiple monolinguals. Yet multilingual assessment proceeds through monolingual norms, as if fair conclusions were possible in the absence of fair comparison. In addition, multilingualism concerns what people do with language, not what languages do to people. Yet research focus remains on multilinguals' languages, as if languages existed despite their users. This book redresses these paradoxes. Multilingual scholars, teachers and speech-language clinicians from Europe, Asia, Australia and the US contribute the first studies dedicated to multilingual norms, those found in real-life multilingual development, assessment and use. Readership includes educators, clinicians, decision-makers and researchers interested in multilingualism.

**The Multilingual Turn** Stephen May, 2013-07-24 Drawing on the latest developments in bilingual and multilingual research, The Multilingual Turn offers a critique of, and alternative to, still-dominant monolingual theories, pedagogies and practices in SLA, TESOL, and bilingual education. Critics of the 'monolingual bias' argue that notions such as the idealized native speaker, and related concepts of interlanguage, language competence, and fossilization, have framed these fields inextricably in relation to monolingual speaker norms. In contrast, these critics advocate an approach that emphasizes the multiple competencies of bi/multilingual learners as the basis for successful language teaching and learning. This volume takes a big step forward in re-situating the issue of multilingualism more centrally in applied linguistics and, in so doing, making more permeable its key sub-disciplinary boundaries - particularly, those between SLA, TESOL, and bilingual education. It addresses this issue head on, bringing together key international scholars in SLA, TESOL, and bilingual education to explore from cutting-edge interdisciplinary perspectives what a more critical multilingual perspective might mean for theory, pedagogy, and practice in each of these fields.

**The Multilingual Turn in Languages Education** Jean Conteh, Gabriela Meier, 2014-09-01 This book addresses the ways in which languages education around the world has changed in recent years to recognise and reflect the increasing phenomenon of societal multilingualism. It examines the implications for research, theory, policy and practice.

Multilingual Communication Juliane House, Jochen Rehbein, 2004-01-01 In a world of increasing migration and technological progress, multilingual communication has become the rule rather than the exception. This book reflects the growing interest in understanding communication between members of different linguistic groups and contains a collection of original papers by members of the German Science Foundation's research center on multilingualism at Hamburg University and by international experts, offering an overview of the most important research fields in multilingual communication. The book is divided into four sections dealing with interpreting and translation, code-switching in various institutional contexts, two important strands of multilingual communication: rapport and politeness, and contrastive studies of Japanese and German grammar and discourse. The editors' preface

presents the relevant theoretical and methodological background to the issues discussed in this book and points to useful directions for future research.

Wright, Sovicheth Boun, Ofelia García, 2017-09-25 The Handbook of Bilingual and Multilingual Education presents the first comprehensive international reference work of the latest policies, practices, and theories related to the dynamic interdisciplinary field of bilingual and multilingual education. Represents the first comprehensive reference work that covers bilingual, multilingual, and multicultural educational policies and practices around the world Features contributions from 78 established and emerging international scholars Offers extensive coverage in sixteen chapters of language and education issues in specific and diverse regional/geographic contexts, including South Africa, Mexico, Latvia, Cambodia, Japan, and Texas Covers pedagogical issues such as language assessment as well as offering evolving perspectives on the needs of specific learner populations, such as ELLs, learners with language impairments, and bilingual education outside of the classroom

Imagining Multilingual Schools Ofelia García, Tove Skutnabb-Kangas, Maria E. Torres-Guzmán, 2006 This book brings together visions and realities of multilingual schools throughout the world so as to examine the pedagogical, socioeducational and sociopolitical issues that impact on their development and success. It considers issues of multilingual schooling in different countries and for diverse populations.

**The Multilingual Apple** Ofelia García, Joshua A. Fishman, 1997 This book will be of special interest to the general reader concerned with the issue of language in the United States, as well as the language specialist and sociolinguist. It has been written to inform those wishing to learn more about the role that languages other than English have had, and continue to have, in the life of the most important United States city, New York. At the same time this volume makes an important contribution to the scholarly literature on urban multilingualism and the sociology of language. The book contains chapters on languages of ethnolinguistic groups who arrived early in New York and which have been somewhat silenced (Irish, German, Yiddish), the languages of groups who made early contributions and continue to be heard in the city (Italian, Greek, Spanish, Hebrew), and languages which are acquiring an important voice in the city today (Chinese, Indian languages, English creoles, Haitian Creole).

**The Multilingual Reality** Ajit K. Mohanty, 2018-11-01 This book is a multidisciplinary analysis of the meaning and dynamics of multilingualism from the perspectives of multilingual societies and language communities in the margins, who are trapped in a vicious circle of disadvantage. It analyses the social, psychological and sociolinguistic processes of linguistic dominance and hierarchical relationships among languages, discrimination, marginalisation and assertive maintenance in multilingualism characterised by a Double Divide, and shows the relationship between educational neglect of languages, capability deprivation and poverty, and loss of linguistic diversity. Its comparative analysis of language-in-education policies and practices and applications of multilingual education (MLE) in diverse contexts shows some promises and challenges in the education of indigenous/tribal/minority children. This book will be of interest to students, researchers, educators and practitioners in sociolinguistics, educational linguistics, psycholinguistics, multilingualism and bilingual/multilingual education.

Multilingual Practices in Language History Päivi Pahta, Janne Skaffari, Laura Wright, 2017-12-18 Texts of the past were often not monolingual but were produced by and for people with bi- or multilingual repertoires; the communicative practices witnessed in them therefore reflect ongoing and earlier language contact situations. However, textbooks and earlier research tend to display a

monolingual bias. This collected volume on multilingual practices in historical materials, including code-switching, highlights the importance of a multilingual approach. The authors explore multilingualism in hitherto neglected genres, periods and areas, introduce new methods of locating and analysing multiple languages in various sources, and review terminology, theories and tools. The studies also revisit some of the issues already introduced in previous research, such as Latin interacting with European vernaculars and the complex relationship between code-switching and lexical borrowing. Collectively, the contributors show that multilingual practices share many of the same features regardless of time and place, and that one way or the other, all historical texts are multilingual. This book takes the next step in historical multilingualism studies by establishing the relevance of the multilingual approach to understanding language history.

**Multilingual Literacy** Esther Odilia Breuer, Eva Lindgren, Anat Stavans, Elke Van Steendam, 2021-01-21 This book investigates multilingual literacy practices, explores the technology applied in different educational frameworks, the centrality of multilingual literacy in non-formal, informal and formal educational contexts, as well as its presence in everyday life. Thematically clustered in four parts, the chapters present an overview of theory related to multilingual literacy, address the methodological challenges of research in the area, describe and evaluate projects set up to foster multilingual literacy in a variety of educational contexts, analyze the literacy practices of multilinguals and their contribution to language and literacy acquisition. This volume aims to initiate a change in paradigms, shifting from structured and conservative problematizations to inclusive and diverse conceptualizations and practices. To that end, the book showcases explorations of different methodologies and needs in formal and non-formal educational systems; and it serves as a springboard for developing multivocal participatory spaces with opportunities for learning and identity-building for all multilinguals, across different settings, languages, ages and contexts.

Multilingual La La Land Claire Hitchins Chik, 2021-09-30 Home to immigrants from more than 140 countries speaking over 180 languages, Los Angeles is a microcosm of the world. While Los Angeles' ethnic enclaves have been the subject of study by researchers from a wide range of fields, these enclaves remain under-researched from a linguistic standpoint. Multilingual La La Land addresses the sociolinguistic landscape of the Greater Los Angeles (GLA) area, providing in-depth accounts of the sixteen most spoken languages other than English in the region. Each chapter introduces the history of the language in the L.A. region, uses census figures and residential densities to examine location-based and network-based speech communities, and discusses the patterns of usage that characterize the language, including motivations to maintain the language. How these patterns and trends bear on the vitality of each language is a central consideration of this book.

*Forging Multilingual Spaces* Christine Hélot, Anne-Marie De Mejía, 2008 This book is the first to propose an integrated approach to the study of bilingual education in minority and majority settings. Contributions from well-known scholars working in eight different countries in Europe and the Americas show that it is possible to bridge the gap between prestigious elite bilingualism and the bilingualism of minority communities and work towards the construction of multilingual spaces.

*Multilingual Trends in a Globalized World* Navin Kumar Singh, 2013-07-16 This book presents evolving language education trends by drawing examples and case studies from around the world. Over the past few decades, significant economic and political changes have taken place around the world which have had a significant impact on language teaching and learning practices across the globe. With globalization, the focus of language education has shifted from monolingualism towards bilingualism and multilingualism, in that

multilingual practices have become the norm rather than the exception in most parts of the world. This book brings together some of latest controversies and case studies from South East Asia, the most diverse and multilingual context in the world, along with various other diverse contexts of importance. This book will be of interest to graduate students and advanced undergraduates in sociolinguistics, applied linguistics, and bilingual and multicultural education, second and foreign language educators, and other specialists in these fields.

**Growing Up with Two Languages** Una Cunningham, 2020-02-19 *Growing Up with Two Languages* provides a highly accessible account of the stages of language development, describes and evaluates the various systems and strategies that can be adopted and looks at the problems that can occur when a child is exposed to two languages and cultures. Combining research-informed advice and the experience of parents raising children as speakers of a wide range of languages in every populated continent in the world, this book and its associated web material will answer questions, offer tried and tested strategies to keep children speaking a minority language, and provide material to enlist the support of the extended family, teachers and others. The perspective of adults who were themselves raised speaking more than one language is included. New to this edition is a chapter focusing on families raising children as speakers of indigenous and threatened languages as well as chapters for teachers and health professionals who want to know more about multilingual child language development and how they can support parents to continue speaking their language with their children. With new and updated first-hand advice, Internet resources and examples throughout, this book also includes a chapter that introduces important recent research into multilingual children and further reading guides for those who want to know more. This book is for parents who are raising or plan to raise children as speakers of more than one language, and for the teachers and

healthcare workers who meet and can support them.

**Multilingual Literacies** Marilyn Martin-Jones, Kathryn E. Jones, 2001-01-12 The research in this unique collection lies at the interface between the fields of bilingualism and literacy. It deepens our understanding of the significance of reading and writing as social practices and opens up new lines of inquiry for research on multilingualism. The authors incorporate theoretical and methodological insights from both fields and provide detailed accounts of everyday practices of reading and writing in different multilingual settings. The focus is primarily on linguistic minority groups in Britain and on the language and literacy experiences of children and adults in rural and urban communities. Together, the chapters of the volume build up a rich and illuminating picture of specific ways in which literacy is bound up with cultural practices and with different ways of seeing the world. They also address fundamental questions about the relationship between language, literacy and power in multi-ethnic contexts.

**European Multilingualism** Rosita Rindler Schjerve, Eva Vetter, 2012 Expanding on the results of the EU project LINEE (Languages in a Network of European Excellence), this book pursues a multi-focal approach which elaborates on European Multilingualism as an ongoing process of shaping policy and generating scientific knowledge.
