**Broken News** Chris Stirewalt, 2022-08-23 One of America's most experienced and exemplary journalists has written an unsparing analysis of the dreadful consequences -- for journalism and the nation -- of 'how the news lost a race to the bottom with itself.'" -- George F. Will In this national bestseller, Chris Stirewalt, a former Fox News political editor, takes readers inside America's broken newsrooms that have succumbed to the temptation of "rage revenue." One of America's sharpest political analysts, Stirewalt employs his trademark wit and insight to reveal how these media organizations slant coverage -- and why that drives political division and rewards outrageous conduct. The New York Times wrote that Stirewalt's book is an often candid reflection on the state of political journalism and his time at Fox News, where such post-mortem assessments are not common... Broken News is a fascinating, deeply researched, conversation-provoking study of how the news is made and how it must be repaired. Stirewalt goes deep inside the history of the industry to explain how today's media divides America for profit. And he offers practical advice for how readers, listeners, and viewers can (and should) become better news consumers for the sake of the republic.

How to Avoid a Climate Disaster Bill Gates, 2021-02-16 #1 NEW YORK TIMES BEST SELLER • In this urgent, authoritative book, Bill Gates sets out a wide-ranging, practical—and accessible—plan for how the world can get to zero greenhouse gas emissions in time to avoid a climate catastrophe. Bill Gates has spent a decade investigating the causes and effects of climate change. With the help of experts in the fields of physics, chemistry, biology, engineering, political science, and finance, he has focused on what must be done in order to stop the planet's slide to certain environmental disaster. In this book, he not only explains why we need to work toward net-zero emissions of greenhouse gases, but also details what we need to do to achieve this profoundly important goal. He gives us a clear-eyed description of the challenges we face. Drawing on his understanding of innovation and what it takes to get new ideas into the market, he describes the areas in which technology is already helping to reduce emissions, where and how the current technology can be made to function more effectively, where breakthrough technologies are needed, and who is working on these essential innovations. Finally, he lays out a concrete, practical plan for achieving the goal of zero emissions—suggesting not only policies that governments should adopt, but what we as individuals can do to keep our government, our employers, and ourselves accountable in this crucial enterprise. As Bill Gates makes clear, achieving zero emissions will not be simple or easy to do, but if we follow the plan he sets out here, it is a goal firmly within our reach.

*New Power* Jeremy Heimans, Henry Timms, 2018-04-03 From two influential and visionary thinkers comes a big idea that is changing the way movements catch fire and ideas spread in our highly connected world. For the vast majority of human history, power has been held by the few. Old power is closed, inaccessible, and leader-driven. Once gained, it is jealously guarded, and the powerful spend it carefully, like currency. But the technological revolution of the past two decades has made possible a new form of power, one that operates differently, like a current. New power is made by many; it is open, participatory, often leaderless, and peer-driven. Like water or electricity, it is most forceful when it surges. The goal with new power is not to hoard it, but to channel it. New power is behind the rise of participatory communities like Facebook and YouTube, sharing services like Uber and Airbnb, and rapid-fire social movements like Brexit and #BlackLivesMatter. It explains the unlikely success of Barack Obama's 2008 campaign and the unlikelier victory of Donald Trump in 2016. And it gives ISIS its power to propagate its brand and distribute its violence. Even old power institutions like the Papacy, NASA, and LEGO have tapped into the strength of the crowd to stage improbable reinventions. In *New Power*, the business leaders/social visionaries Jeremy Heimans and Henry Timms provide the tools for using new power to successfully spread an idea or lead a movement in the twenty-first century. Drawing on examples from business, politics, and social justice, they explain the new world we live in--a world where connectivity has made change shocking and swift and a world in which everyone expects to participate.

**The Wisdom of Crowds** James Surowiecki, 2005-08-16 In this fascinating book, New Yorker business columnist James Surowiecki explores a

deceptively simple idea: Large groups of people are smarter than an elite few, no matter how brilliant—better at solving problems, fostering innovation, coming to wise decisions, even predicting the future. With boundless erudition and in delightfully clear prose, Surowiecki ranges across fields as diverse as popular culture, psychology, ant biology, behavioral economics, artificial intelligence, military history, and politics to show how this simple idea offers important lessons for how we live our lives, select our leaders, run our companies, and think about our world.

**The Room Where It Happened** John Bolton, 2024-01-30 As President Trump's National Security Advisor, John Bolton spent many of 453 days in the room where it happened, and the facts speak for themselves. The result is a "scathing and revelatory" (The New Yorker) White House memoir that is the most comprehensive and substantial account of the Trump Administration, and one of the few to date by a top-level official. With almost daily access to the President, John Bolton has produced a precise rendering of his days in and around the Oval Office. What Bolton saw astonished him: a President for whom getting reelected was the only thing that mattered, even if it meant endangering or weakening the nation. "I am hard-pressed to identify any significant Trump decision during my tenure that wasn't driven by reelection calculations," he writes. In fact, he argues that the House committed impeachment malpractice by keeping its prosecution focused narrowly on Ukraine when Trump's Ukraine-like transgressions existed across the full range of his foreign policy—and Bolton documents exactly what those were, and attempts by him and others in the Administration to raise alarms about them. He shows a President addicted to chaos, who embraced our enemies and spurned our friends, and was deeply suspicious of his own government. In Bolton's telling, all this helped put Trump on the bizarre road to impeachment. "The differences between this presidency and previous ones I had served were stunning," writes Bolton, who worked for Reagan, Bush 41, and Bush 43. He discovered a President who thought foreign policy is like closing a real estate deal—about personal relationships, made-for-TV showmanship, and advancing his own interests. As a result, the US lost an opportunity to confront its deepening threats, and in cases like China, Russia, Iran, and North Korea ended up in a more vulnerable place. Bolton's "first tell-all memoir by such a high-ranking official" (The New York Times) starts with his long march to the West Wing as Trump and others woo him for the National Security job. The minute he lands, he has to deal with Syria's chemical attack on the city of Douma, and the crises after that never stop. As he writes in the opening pages, "If you don't like turmoil, uncertainty, and risk—all the while being constantly overwhelmed with information, decisions to be made, and sheer amount of work—and enlivened by international and domestic personality and ego conflicts beyond description, try something else." The turmoil, conflicts, and egos are all there—from the upheaval in Venezuela, to the erratic and manipulative moves of North Korea's Kim Jong Un, to the showdowns at the G7 summits, the calculated warmongering by Iran, the crazy plan to bring the Taliban to Camp David, and the placating of an authoritarian China that ultimately exposed the world to its lethal lies. But this seasoned public servant also has a great eye for the Washington inside game, and his story is full of wit and wry humor about how he saw it played.

**Documents of the Assembly of the State of New York** New York (State). Legislature. Assembly, 1872

**New York Magazine** , 1997-06-02 New York magazine was born in 1968 after a run as an insert of the New York Herald Tribune and quickly made a place for itself as the trusted resource for readers across the country. With award-winning writing and photography covering everything from politics and food to theater and fashion, the magazine's consistent mission has been to reflect back to its audience the energy and excitement of the city itself, while celebrating New York as both a place and an idea.

The New Localism Bruce Katz, Jeremy Nowak, 2018-01-09 The New Localism provides a roadmap for change that starts in the communities where

most people live and work. In their new book, *The New Localism*, urban experts Bruce Katz and Jeremy Nowak reveal where the real power to create change lies and how it can be used to address our most serious social, economic, and environmental challenges. Power is shifting in the world: downward from national governments and states to cities and metropolitan communities; horizontally from the public sector to networks of public, private and civic actors; and globally along circuits of capital, trade, and innovation. This new locus of power—this new localism—is emerging by necessity to solve the grand challenges characteristic of modern societies: economic competitiveness, social inclusion and opportunity; a renewed public life; the challenge of diversity; and the imperative of environmental sustainability. Where rising populism on the right and the left exploits the grievances of those left behind in the global economy, new localism has developed as a mechanism to address them head on. New localism is not a replacement for the vital roles federal governments play; it is the ideal complement to an effective federal government, and, currently, an urgently needed remedy for national dysfunction. In *The New Localism*, Katz and Nowak tell the stories of the cities that are on the vanguard of problem solving. Pittsburgh is catalyzing inclusive growth by inventing and deploying new industries and technologies. Indianapolis is governing its city and metropolis through a network of public, private and civic leaders. Copenhagen is using publicly owned assets like their waterfront to spur large scale redevelopment and finance infrastructure from land sales. Out of these stories emerge new norms of growth, governance, and finance and a path toward a more prosperous, sustainable, and inclusive society. Katz and Nowak imagine a world in which urban institutions finance the future through smart investments in innovation, infrastructure and children and urban intermediaries take solutions created in one city and adapt and tailor them to other cities with speed and precision. As Katz and Nowak show us in *The New Localism*, “Power now belongs to the problem solvers.”

*The Fourth Industrial Revolution* Klaus Schwab, 2017-01-03 World-renowned economist Klaus Schwab, Founder and Executive Chairman of the World Economic Forum, explains that we have an opportunity to shape the fourth industrial revolution, which will fundamentally alter how we live and work. Schwab argues that this revolution is different in scale, scope and complexity from any that have come before. Characterized by a range of new technologies that are fusing the physical, digital and biological worlds, the developments are affecting all disciplines, economies, industries and governments, and even challenging ideas about what it means to be human. Artificial intelligence is already all around us, from supercomputers, drones and virtual assistants to 3D printing, DNA sequencing, smart thermostats, wearable sensors and microchips smaller than a grain of sand. But this is just the beginning: nanomaterials 200 times stronger than steel and a million times thinner than a strand of hair and the first transplant of a 3D printed liver are already in development. Imagine “smart factories” in which global systems of manufacturing are coordinated virtually, or implantable mobile phones made of biosynthetic materials. The fourth industrial revolution, says Schwab, is more significant, and its ramifications more profound, than in any prior period of human history. He outlines the key technologies driving this revolution and discusses the major impacts expected on government, business, civil society and individuals. Schwab also offers bold ideas on how to harness these changes and shape a better future—one in which technology empowers people rather than replaces them; progress serves society rather than disrupts it; and in which innovators respect moral and ethical boundaries rather than cross them. We all have the opportunity to contribute to developing new frameworks that advance progress.

**Biological Relatives** Sarah Franklin, 2013-10-16 Thirty-five years after its initial success as a form of technologically assisted human reproduction, and five million miracle babies later, in vitro fertilization (IVF) has become a routine procedure worldwide. In *Biological Relatives*, Sarah Franklin explores how the normalization of IVF has changed how both technology and biology are understood. Drawing on anthropology, feminist theory, and science studies, Franklin charts the evolution of IVF from an experimental research technique into a global technological platform used for a wide variety of applications, including genetic diagnosis, livestock breeding, cloning, and stem cell research. She contends that despite its ubiquity, IVF remains a highly paradoxical technology that confirms the relative and contingent nature of biology while creating new biological relatives. Using IVF as

a lens, Franklin presents a bold and lucid thesis linking technologies of gender and sex to reproductive biomedicine, contemporary bioinnovation, and the future of kinship.

**The Borowitz Report** Andy Borowitz,2010-05-11 Prepare to be shocked. From the man The Wall Street Journal hailed as a Swifteen satirist comes the most shocking book ever written! The Borowitz Report: The Big Book of Shockers, by award-winning fake journalist Andy Borowitz, contains page after page of news stories too hot, too controversial, too -- yes, shocking -- for the mainstream press to handle. Sample the groundbreaking reporting from the news organization whose motto is Give us thirty minutes -- we'll waste it.

**The New Censorship** Joel Simon,2014-11-11 An examination of how the media is under fire and how to safeguard journalists and the information they seek to share with the public. Journalists are being imprisoned and killed in record numbers. Online surveillance is annihilating privacy, and the Internet can be brought under government control at any time. Joel Simon, the executive director of the Committee to Protect Journalists, warns that we can no longer assume that our global information ecosystem is stable, protected, and robust. Journalists are increasingly vulnerable to attack by authoritarian governments, militants, criminals, and terrorists, who all seek to use technology, political pressure, and violence to set the global information agenda. Reporting from Pakistan, Russia, Turkey, Egypt, and Mexico, among other hotspots, Simon finds journalists under threat from all sides. The result is a growing crisis in information—a shortage of the news we need to make sense of our globalized world and fight human rights abuses, manage conflict, and promote accountability. Drawing on his experience defending journalists on the front lines, he calls on “global citizens,” U.S. policy makers, international law advocates, and human rights groups to create a global freedom-of-expression agenda tied to trade, climate, and other major negotiations. He proposes ten key priorities, including combating the murder of journalists, ending censorship, and developing a global free-expression charter to challenge the criminal and corrupt forces that seek to manipulate the world's news. “Wise and insightful. [Simon] offers hope to all who care about maintaining the free flow of information in a world full of would-be censors.”—Ann Cooper, Columbia Journalism School
