Companion Technology Susanne Biundo,Andreas Wendemuth,2017-12-04 Future technical systems will be companion systems, competent assistants that provide their functionality in a completely individualized way, adapting to a user's capabilities, preferences, requirements, and current needs, and taking into account both the emotional state and the situation of the individual user. This book presents the enabling technology for such systems. It introduces a variety of methods and techniques to implement an individualized, adaptive, flexible, and robust behavior for technical systems by means of cognitive processes, including perception, cognition, interaction, planning, and reasoning. The technological developments are complemented by empirical studies from psychological and neurobiological perspectives.

ActiveMQ in Action Dejan Bosanac,Bruce Snyder,Rob Davies,2011-03-30 Applications in enterprises need to communicate, most commonly done by messaging. Apache ActiveMQ is an open-source implementation of the Java Message Service (JMS), which provides messaging in Java applications. ActiveMQ in Action is a thorough, practical guide to implementing message-oriented systems using ActiveMQ and Java. Co-authored by one of the leading ActiveMQ developers, Bruce Snyder, the book starts with the anatomy of a core Java message, then moves quickly through fundamentals including data persistence, authentication and authorization. Later chapters cover advanced features such as configuration and performance tuning, illustrating each concept with a running real-world stock portfolio application. Readers will learn to integrate ActiveMQ with Apache Geronimo and JBoss, and tie into both Java and non-Java technologies including AJAX, .NET, C++, Ruby, and the Spring framework. Purchase of the print book comes with an offer of a free PDF, ePub, and Kindle eBook from Manning. Also available is all code from the book.

A Road We All Travel Lloyd Dean McJunkin,2022-08-05 God has given humanity the highest level of intelligence of all living creations on earth.

That level seems to be, we realize we do not know everything, and we cannot do everything. We claim only God knows everything, and God can do everything. Our problems seem to develop when we try to guess what God will do and try to get ahead of Him, telling ourselves it will give Him more time to help those less capable than aEUroewe thinkaEUR we are.Only God has full control as to when we will be born and when we will die. In between those two events, each human has responsibilities, and God gives all humanity full control of how they respond to God's plan. We as individuals will determine our belief in God's Son, Jesus Christ, as their Lord and Savior. This alone will determine where our eternal life will be. What a wonderful blessing that we should all take very seriously.
