Nature's Palette Patrick Baty, 2021-05-18 This fully realized colour catalogue includes elegant contemporary illustrations of every animal, plant or mineral cited in Syme's edition of "Werner's nomenclature of colours"

The Painter's Palette Denman Waldo Ross, 1919 Harvard lecturer of design Denman Waldo Ross discusses the attributes, temperature and tone of the colors, in a manner comprehensive to amateur and professional painters alike. A superb introductory text to color theory and art methodology, *The Painter's Palette* consists of brief yet salient information, presented alongside illustrative charts. The quantity and quality of the light present in each color is crucial to artists seeking to imbue a work with a certain mood or ambiance, or create phenomena such as shadows or rays of light being upon certain objects. Ross classifies and scales the colors with a simple, effective system whose utility cannot be doubted. Together with his educational books on art theory and composition, Ross worked as a lecturer and later as professor of art in Harvard University. His interests ranged through the history of art, such that he was appointed as trustee of the Museum of Fine Arts in Boston. Although he died in 1935, Ross's works remain both relevant and useful to artists in the modern day: his incisive style is suitable as a qualitative supplemental reference for amateurs, students, and the experienced.

Color Collective's Palette Perfect Lauren Wager, 2018-03-13 Aimed to fashion students and designers, *Palette Perfect* is both a practical guide and an inspirational book that proposes a reflection on the universe of colour combinations, the moods and atmospheres they evoke and how we associate particular places and emotions to special colours. Each chapter explores a

particular mood and describes the corresponding feelings and color combinations, using as examples exquisite photographs of objects, still-lives, landscapes, interiors and fashion. At the end of each chapter, a wide variety of palettes representing the chapter's particular mood or atmosphere is included.

Nature's Palette David Lee, 2010-09-03 Though he didn't realize it at the time, David Lee began this book twenty-five years ago as he was hiking in the mountains outside Kuala Lumpur. Surrounded by the wonders of the jungle, Lee found his attention drawn to one plant in particular, a species of fern whose electric blue leaves shimmered amidst the surrounding green. The evolutionary wonder of the fern's extravagant beauty filled Lee with awe--and set him on a career-long journey to understand everything about plant colors. Nature's Palette is the fully ripened fruit of that journey--a highly illustrated, immensely entertaining exploration of the science of plant color. Beginning with potent

reminders of how deeply interwoven plant colors are with human life and culture—from the shifting hues that told early humans when fruits and vegetables were edible to the indigo dyes that signified royalty for later generations—Lee moves easily through details of pigments, the evolution of color perception, the nature of light, and dozens of other topics. Through a narrative peppered with anecdotes of a life spent pursuing botanical knowledge around the world, he reveals the profound ways that efforts to understand and exploit plant color have influenced every sphere of human life, from organic chemistry to Renaissance painting to the highly lucrative orchid trade. Lavishly illustrated and packed with remarkable details sure to delight gardeners and naturalists alike, *Nature's Palette* will enchant anyone who's ever wondered about red roses and blue violets—or green thumbs.

Color Victoria Finlay, 2007-12-18 In this vivid and captivating journey through the colors of an artist's palette, Victoria Finlay takes us on an enthralling adventure around the world and through the ages, illuminating how the colors we choose to value have determined the history of culture

itself. How did the most precious color blue travel all the way from remote lapis mines in Afghanistan to Michelangelo's brush? What is the connection between brown paint and ancient Egyptian mummies? Why did Robin Hood wear Lincoln green? In *Color*, Finlay explores the physical materials that color our world, such as precious minerals and insect blood, as well as the social and political meanings that color has carried through time. Roman emperors used to wear togas dyed with a purple color that was made from an odorous Lebanese shellfish—which probably meant their scent preceded them. In the eighteenth century, black dye was called logwood and grew along the Spanish Main. Some of the first indigo plantations were started in America, amazingly enough, by a seventeen-year-old girl named Eliza. And the popular van Gogh painting *White Roses* at Washington's National Gallery had to be renamed after a researcher discovered that the flowers were originally done in a pink paint that had faded nearly a century ago. Color is full of extraordinary people, events, and anecdotes—painted all the more dazzling by Finlay's engaging style. Embark upon a thrilling adventure with this intrepid journalist as she travels on a donkey along ancient silk trade routes; with the Phoenicians sailing the Mediterranean in search of a special purple shell that garners wealth, sustenance, and prestige; with modern Chilean farmers breeding and bleeding insects for their viscous red blood. The colors that craft our world have never looked so bright.

The Mirror and the Palette Jennifer Higgin, 2021-10-05 A dazzlingly original and

ambitious book on the history of female self-portraiture by one of today's most well-respected art critics. Her story weaves in and out of time and place. She's Frida Kahlo, Loïs Mailou Jones and Amrita Sher-Gil en route to Mexico City, Paris or Bombay. She's Suzanne Valadon and Gwen John, craving city lights, the sea and solitude; she's Artemisia Gentileschi striding through the streets of Naples and Paula Modersohn-Becker in Worpswede. She's haunting museums in her paint-stained dress, scrutinising how El Greco or Titian or Van Dyck or Cézanne solved the problems that she too is facing. She's railing against her corsets, her chaperones, her husband and her brothers; she's hammering on doors, dreaming in her bedroom, working day and night in her studio. Despite the immense hurdles that have been placed in her way, she sits at her easel, picks up a mirror and paints a self-portrait because, as a subject, she is always available. Until the twentieth century, art history was, in the main, written by white men who tended to write about other white men. The idea that women in the West have always made art was rarely cited as a possibility. Yet they have - and, of course, continue to do so - often against tremendous odds, from laws and religion to the pressures of family and public disapproval. In *The Mirror and the Palette*, Jennifer Higgie introduces us to a cross-section of women artists who embody the fact that there is more than one way to understand our planet, more than one way to live in it and more than one way to make art about it. Spanning 500 years, biography and cultural history intertwine in a narrative packed with tales of rebellion, adventure, revolution, travel and tragedy enacted by women who turned their back on convention and lived lives of great resilience, creativity and bravery.
