PORTAL (The Portal Series, Book1) Richard Bowker,2013-08-16 Trapped in an alternative universe where New England is at war, two young boys must find their way home. But first, they must help New England win the war. Larry Barnes has made a spectacular discovery—an invisible portal to a parallel universe, where Burger King is Burger Queen, cell phones are huge, and his hometown doesn't look anything like the place where he lives. When Larry returns, he tells his best friend, Kevin, who convinces him to re-enter The Portal. What could go wrong? This time, Larry and Kevin enter a world devoid of modern technology, where America doesn't exist, and New England is losing a war against Canada and New Portugal. Unable to get back to The Portal, they offer their knowledge to the New England army in order to survive and gain hope of returning home. But when the ambitious lieutenant using their services discovers just how valuable Larry and Kevin's knowledge is, he changes the plan. Publisher Note: Contains mild violence and is most appropriate for readers 13+. Fans of Octavia Butler, John Drees, John Birmingham and Marc Stiegler as well as David R. Designing Portals: Opportunities and Challenges Jafari, Ali,Sheehan, Mark,2002-07-01 Portals present unique strategic challenges in the academic environment. Their conceptualization and design requires the input of campus constituents who seldom interact and whose interests are often opposite. The implementation of a portal requires a coordination of applications and databases controlled by different campus units at a level that may never before have been attempted at the institution. Building a portal is as much about constructing intra-campus bridges as it is about user interfaces and content. Designing Portals: Opportunities and Challenges discusses the current status of portals in higher education by providing insight into the role portals play in an institution's business and educational strategy, by taking the reader through the processes of conceptualization, design, and implementation of the portals (in different stages of development) at major universities and by offering insight from three producers of portal software systems in use at institutions of higher learning and elsewhere.
