**Studies in South Asian Linguistics** James W. Gair,1998 This  
volume collects twenty-nine published and unpublished papers by  
the linguist James Gair, considered the foremost western scholar of  
the Sri Lankan languages Sinhala and Jaffna Tamil. Ranging over  
thirty years, his work also considers issues in a variety of Indian  
languages, including Hindi, Marathi, Tamil, Malayalam, and

Bengali. The collection reflects the wide range of Gair's interests, from morpho-syntactic questions to questions regarding historical and areal linguistics, especially language contact and diglossia, and extending to language acquisition. By collecting these papers and making them newly accessible, this volume will provide an important resource not only for scholars of these languages but for linguists interested in the theoretical issues Gair explores.

**Guantánamo and Beyond** Fionnuala Ni Aoláin, Oren

belong. Raised by a quartet of protective guardians who have her

best interests at heart, she struggles with the silent weight of knowing she is missing a vital piece of who she is. Her perceived reality changes the morning she begins to see a mysterious alien figure. Confused but determined to learn the truth, V heads into her Uncle's study and finds a shocking revelation that will change her life forever. V is thrust into a universe she fails to understand as violent powers await in every shadow. Her survival depends on accepting what she must become. V's strength will determine whether she lives or dies.

**Pathogen and Microbial Contamination Management in Micropropagation** Alan C. Cassells,1997-10-31 This book is based mainly on invited and offered papers presented at the Second International Symposium on Bacterial and Bacteria-like Contaminants of Plant Tissue Cultures held at University College, Cork, Ireland in September 1996, with additional invited papers. The First International Symposium on Bacterial and Bacteria-like Contaminants of Plant Tissue Cultures was held at the same venue

in 1987 and was published as *Acta Horticulturae* volume 225, 1988. In the intervening years there have been considerable advances in both plant disease diagnostics and in the development of structured approaches to the management of disease and microbial contamination in micropropagation. These approaches have centred on attempts to separate, spatially, the problems of disease transmission and laboratory contamination. Disease-control is best achieved by establishing pathogen-free cultures while laboratory contamination is based on subsequent good working practice. Control of losses due to pathogens and microbial contamination in vitro addresses, arguably, the most importance causes of losses in the industry; nevertheless, losses at and post establishment can also be considerable due to poor quality microplants or micro-shoots. In this symposium, a holistic approach to pathogen and microbial contamination control is evident with the recognition that micropropagators must address pathogen and microbial contamination in vitro, and diseases and microplant failure at establishment. There is increasing interest in establishing beneficial bacterial and mycorrhizal association with microplants in vitro and in vivo.

*Pota Zanini Daria,2021-10-22* Tilde e Bep, sono due novelli sposini, provenienti dalle povere vallate della Bergamasca. Essi giungono in Svizzera, alla ricerca di un posto di lavoro sicuro e con l'obbiettivo di creare una famiglia. Voltano le spalle a un'Italia segnata dal dopoguerra, portandosi appresso pochi stracci e tanti ricordi. La passione per l'agricoltura e gli animali, da sempre parte della loro vita sin dagli albori, non li lascerà mai. L'agricoltore: uno dei lavori più umili, senza giorni di riposo, legato inesorabilmente alla terra e al tempo meteorologico. Coltiveranno il loro sapere, tramandandolo di generazione in generazione, fino ai nipoti, i giovani del giorno d'oggi: il futuro dell'agricoltura moderna. Durante la narrazione, verranno a galla le usanze di una volta e i rapporti freddi famigliari; il distacco evidente tra uomo e donna, in contrasto con le diversità relazionali del giorno d'oggi e i cambiamenti umanitari attuali. Tratto, in parte, dalle reali esperienze di alcuni

parenti, compaesani e non, questo libro vuole ricordare i sacrifici dei nostri predecessori: il loro sapere non deve andar perduto. La terra è l'unico reale dono materiale che ci rimarrà e dobbiamo prendercene cura.
