The Power Book Joelle Avelino,2019-10-01 With this inspiring and brightly illustrated guide to power, learn about the different types of power, what it means to have power, and what you can do with your own power to create positive change in the world, no matter who or how old you are. What makes you the boss of me? What makes a king a king, or a queen a queen? Why can some people vote for their leaders, but other people can't? Does having lots of money make you powerful? Why are there fewer female scientists, leaders, and artists than men in history books? These are things that kids wonder about. The Power Book answers these and other questions in a relatable way for young people, including thought-provoking discussions on challenging topics, like war, bullying, racism, sexism, and homophobia. You will gain an understanding of your place in your family, your school, and the world, and will discover ways in which you can use your own power to shape the future. As you explore the many aspects of power, thinking points pose questions that spark self-reflection and quotes and stories from some of the greatest change-makers--such as Gandhi, Martin Luther King Jr., Emmeline Pankhurst, Rosa Parks, Malala Yousafzai, and Stephen Hawking--provide historical context and inspiration. Find more opportunities for learning at the back with a glossary of terms and suggestions for further reading. Gain a greater understanding of how power works, then learn how to harness it for good with The Power Book.

New Power Jeremy Heimans, Henry Timms,2018-04-03 From two influential and visionary thinkers comes a big idea that is changing the way movements catch fire and ideas spread in our highly connected world. For the vast majority of human history, power has been held by the few. Old power is closed, inaccessible, and leader-driven. Once gained, it is jealously guarded, and the powerful spend it carefully, like currency. But the technological revolution of the past two decades has made possible a new form of power, one that operates differently, like a current. New power is made by many; it is open, participatory, often leaderless, and peer-driven. Like water or electricity, it is most forceful when it surges. The goal with new power is not to hoard it, but to channel it. New power is behind the rise of participatory communities like Facebook and YouTube, sharing services like Uber and Airbnb, and rapid-fire social movements like Brexit and #BlackLivesMatter. It explains the unlikely success of Barack Obama's 2008 campaign and the unlikelier victory of Donald Trump in 2016. And it gives ISIS its power to propagate its brand and distribute its violence. Even old power institutions like the Papacy, NASA, and LEGO have tapped into the strength of the crowd to stage improbable reinventions. In *New Power*, the business leaders/social visionaries Jeremy Heimans and Henry Timms provide the tools for using new power to successfully spread an idea or lead a movement in the twenty-first century. Drawing on examples from business, politics, and social justice, they explain the new world we live in--a world where connectivity has made change shocking and swift and a world in which everyone expects to participate.

Revolutionary Power Shalanda Baker,2021-01-14 In September 2017, Hurricane Maria hit Puerto Rico, completely upending the energy grid of the small island. The nearly year-long power outage that followed vividly shows how the new climate reality intersects with race and access to energy. The island is home to brown and black US citizens who lack the political power of those living in the continental US. As the world continues to warm and storms like Maria become more commonplace, it is critical that we rethink our current energy system to enable reliable, locally produced, and locally controlled energy without replicating the current structures of power and control. In *Revolutionary Power*, Shalanda Baker arms those made most vulnerable by our current energy system with the tools they need to remake the system in the service of their humanity. She argues that people of color, poor people, and indigenous people must engage in the creation of the new energy system in order to upend the unequal power dynamics of the current system. *Revolutionary Power* is a playbook for the energy transformation complete with a step-by-step analysis of the key energy policy areas that are ripe for intervention. Baker tells the stories of those who have been left behind in our current system and those who are working to be architects of a more just system. She draws from her experience as an energy-justice advocate, a lawyer, and a queer woman of color to inspire

activists working to build our new energy system. Climate change will force us to rethink the way we generate and distribute energy and regulate the system. But how much are we willing to change the system? This unique moment in history provides an unprecedented opening for a deeper transformation of the energy system, and thus, an opportunity to transform society. Revolutionary Power shows us how.

Total Power Vince Flynn, Kyle Mills, 2020-09-15 “One of the best thriller writers on the planet.” —The Real Book Spy In the next thriller in the #1 New York Times bestselling Mitch Rapp series, it’s a race against the clock when ISIS takes out the entire US power grid and throws the country into chaos. When Mitch Rapp captures ISIS’s top technology expert, he reveals that he was on his way to meet a man who claims to have the ability to bring down America’s power grid. Rapp is determined to eliminate this shadowy figure, but the CIA’s trap fails. The Agency is still trying to determine what went wrong when ISIS operatives help this cyber terrorist do what he said he could—plunge the country into darkness. With no concept of how this unprecedented act was accomplished, the task of getting the power back on could take months. Perhaps even years. Rapp and his team embark on a desperate search for the only people who know how to repair the damage—the ones responsible. But his operating environment is like nothing he’s experienced before. Computers and communication networks are down, fuel can no longer be pumped from gas stations, water and sanitation systems are on the brink of collapse, and the supply of food is running out. Can Rapp get the lights back on before America descends irretrievably into chaos? This compulsive thriller proves once again that the Mitch Rapp series is “the best of the best when it comes to the world of special ops” (Booklist, starred review).

Sources of Power Gary A. Klein, 1999-02-18 Anyone who watches the television news has seen images of firefighters rescuing people from burning buildings and paramedics treating bombing victims. How do these individuals make the split-second decisions that save lives? Most studies of decision making, based on artificial tasks assigned in laboratory settings, view people as biased and unskilled. Gary Klein is one of the developers of the naturalistic decision making approach, which views people as inherently skilled and experienced. It documents human strengths and capabilities that so far have been downplayed or ignored. Since 1985, Klein has conducted fieldwork to find out how people tackle challenges in difficult, nonroutine situations. Sources of Power is based on observations of humans acting under such real-life constraints as time pressure, high stakes, personal responsibility, and shifting conditions. The professionals studied include firefighters, critical care nurses, pilots, nuclear power plant operators, battle planners, and chess masters. Each chapter builds on key incidents and examples to make the description of the methodology and phenomena more vivid. In addition to providing information that can be used by professionals in management, psychology, engineering, and other fields, the book presents an overview of the research approach of naturalistic decision making and expands our knowledge of the strengths people bring to difficult tasks.

The Education of an Idealist Samantha Power, 2019-09-10 A NEW YORK TIMES, WALL STREET JOURNAL, AND USA TODAY BESTSELLER An intimate,

powerful, and galvanizing memoir by Pulitzer Prize winner, human rights advocate, and former US Ambassador to the UN Samantha Power. Named one of the best books of the year: The New York Times • National Public Radio • Time • The Economist • The Washington Post • Vanity Fair • Christian Science Monitor • Publishers Weekly • Audible “Her highly personal and reflective memoir . . . is a must-read for anyone who cares about our role in a changing world.”—President Barack Obama Includes an updated afterword Tracing her distinctly American journey from immigrant to war correspondent to presidential Cabinet official, Samantha Power’s acclaimed memoir is a unique blend of suspenseful storytelling, vivid character portraits, and shrewd political insight. After her critiques of US foreign policy caught the eye of Senator Barack Obama, he invited her to work with him on Capitol Hill and then on his presidential campaign. When Obama won the presidency, Power went from being an activist outsider to serving as his human rights adviser and, in 2013, becoming the youngest-ever US Ambassador to the United Nations. Power transports us from her childhood in Dublin to the streets of war-torn Bosnia to the White House Situation Room and the world of high-stakes diplomacy, offering a compelling and deeply honest look at navigating the halls of power while trying to put one’s ideals into practice. Along the way, she lays bare the searing battles and defining moments of her life, shows how she juggled the demands of a 24/7 national security job with raising two young children, and makes the case for how we each can advance the cause of human dignity. This is an unforgettable account of the power of idealism—and of one person’s fierce determination to make a difference. “This is a wonderful book. [...] The interweaving of Power’s personal story, family story, diplomatic history and moral arguments is executed seamlessly and with unblinking honesty.”—THOMAS L. FRIEDMAN, The New York Times Book Review “Truly engrossing...A pleasure to read.”—RACHEL MADDOW “A beautiful memoir about the times we’re living in and the questions we must ask ourselves...I honestly couldn’t put it down.” —CHERYL STRAYED, author of Wild “Power’s compelling memoir provides critically important insights we should all understand as we face some of the most vexing issues of our time.” —BRYAN STEVENSON, author of Just Mercy

The Power Naomi Alderman, 2017 She throws her head back and pushes her chest forward and let's go a huge blast right into the centre of his body. The rivulets and streams of red scarring run across his chest and up around his throat. She'd put her hand on his heart and stopped him dead. Suddenly, girls find that with a flick of their fingers, they can inflict agonizing pain and even death. With this single twist, the four lives at the heart of this novel are utterly transformed, and we look at the world in an entirely new light. What if the power to hurt were in women's hands?

The Power Elite C. Wright Mills, 2000-02-17 First published in 1956, *The Power Elite* stands as a contemporary classic of social science and social criticism. C. Wright Mills examines and critiques the organization of power in the United States, calling attention to three firmly interlocked prongs of power: the military, corporate, and political elite. *The Power Elite* can be read as a good account of what was taking place in America at the time it was written, but its underlying question of whether America is as democratic in practice as it is in theory continues to matter very much today. What *The Power Elite* informed readers of in 1956 was how much the organization of power in America had changed during their lifetimes, and Alan Wolfe's astute afterword to this new edition brings us up to date, illustrating how much more has changed since then. Wolfe sorts out what is helpful in Mills' book and which of his predictions have not come to bear, laying out the radical changes in American capitalism, from intense global competition and the collapse of communism to rapid technological transformations and ever changing consumer tastes. *The Power Elite* has stimulated generations of readers to think about the kind of society they have and the kind of society they might want, and deserves to be read by every new generation.

A Question of Power Robert Bryce, 2020-03-10 An acclaimed author and celebrated journalist breaks down the history of electricity and the impact of global energy use on the world and the environment. Global demand for power is doubling every two decades, but electricity remains one of the most difficult forms of energy to supply and do so reliably. Today, some three billion people live in places where per-capita electricity use is less than what's used by an average American refrigerator. How we close the colossal gap between the electricity rich and the electricity poor will determine our success in addressing issues like women's rights, inequality, and climate change. In *A Question of Power*, veteran journalist Robert Bryce tells the human story of electricity, the world's most important form of energy. Through onsite reporting from India, Iceland, Lebanon, Puerto Rico, New York, and Colorado, he shows how our cities, our money--our very lives--depend on reliable flows of electricity. He highlights the factors needed for successful electrification and explains why so many people are still stuck in the dark. With vivid writing and incisive analysis, he powerfully debunks the notion that our energy needs can be met solely with renewables and demonstrates why--if we are serious about addressing climate change--nuclear energy must play a much bigger role. Electricity has fueled a new epoch in the history of civilization. *A Question of Power* explains how that happened and what it means for our future.

Real Power Janet O. Hagberg, 2002-09-02 Janet O. Hagberg has written a dynamic book about power -real, personal power- for forward-looking people and organizations who want to harness their own power for the common good. I wrote this book, says Hagberg, to transform the way we think about power and leadership. It takes people on a journey beyond achievement and success to a stance in which power comes from their inner core and they lead from their souls. There is no doubt that the world is ready for a new model of leadership. In this third edition, Janet Hagberg addresses much that she has learned from her readers. The result is a deepening of the descriptions of each stage, a new way to think about the dark side of each stage, new stories of each stage derived from her readers, a connection to the spirituality expressed at each stage, as well a description of The Wall between Stages Four and Five. Throughout the book, the author adds more of her personal story to illustrate her experiences and observations of each of the stages of power.

Thirst for Power Michael E. Webber, 2016-04-26 Although it is widely understood that energy and water are the world's two most critical resources, their vital interconnections and vulnerabilities are less often recognized. This farsighted book offers a new, holistic way of thinking about energy and water—a big picture approach that reveals the interdependence of the two resources, identifies the seriousness of the challenges, and lays out an optimistic approach with an array of solutions to ensure the continuing sustainability of both. Michael Webber, a leader and teacher in the field of energy technology and policy, explains how energy and water supplies are linked and how problems in either can be crippling for the other. He shows that current population growth, economic growth, climate change, and short-sighted policies are likely to make things worse. Yet, Webber asserts, more integrated planning with long-term sustainability in mind can avert such a daunting future. Combining anecdotes and personal stories with insights into the latest science of energy and water, he identifies a hopeful path toward wise long-range water-energy decisions and a more reliable and abundant future for humanity.

Star Power Alain Bécoulet, 2023-09-19 A concise and accessible explanation of the science and technology behind the domestication of nuclear fusion energy. Nuclear fusion research tells us that the Sun uses one gram of hydrogen to make as much energy as can be obtained by burning eight tons of petroleum. If nuclear fusion—the process that makes the stars shine—could be domesticated for commercial energy production, the world would gain an inexhaustible source of energy that neither depletes natural resources nor produces greenhouse gases. In *Star Power*, Alan Bécoulet offers a concise and accessible primer on fusion energy, explaining the science and technology of nuclear fusion and describing the massive international scientific effort to achieve commercially viable fusion energy. Bécoulet draws on his work as Head of Engineering at ITER (International Thermonuclear Experimental Reactor) to explain how scientists are trying to “put the sun in a box.” He surveys the history of nuclear power, beginning with post-World War II efforts to use atoms for peaceful purposes and describes how energy is derived from fusion, explaining that the essential principle of fusion is based on the capacity of nucleons (protons and neutrons) to assemble and form structures (atomic nuclei) in spite of electrical repulsion between protons, which all have a positive charge. He traces the evolution of fusion research and development, mapping the generation of electric current through fusion. The ITER project marks a giant step in the development of fusion energy, with the potential to demonstrate the feasibility of a nuclear fusion reactor. *Star Power* offers an introduction to what may be the future of energy production.

On Power Gene Simmons, 2017-11-14 YOU DESERVE TO HAVE POWER. IT IS YOURS FOR THE TAKING. GENE SIMMONS IS HERE TO UNLOCK THE DOORS TO THE TEMPLE. Gene Simmons, KISS front-man, multi-hyphenate entrepreneur, and master of self-invention, shares his philosophy on power—how to attain it, how to keep it, and how to harness it as a driving force in business and in life. As co-founder of KISS, America's #1 gold record-award-winning group of all time, Simmons knows the thrill and seduction of power firsthand. But gold records alone don't equal power. The decisions you make once you attain a certain level of success are what separate the pretenders from the pantheon. Inspired by Niccolo Machiavelli's *The Prince*, Simmons offers his unique take on the dynamics of power in every realm of life, from the bedroom to the boardroom, to the world of rock, celebrity, and social media, to politics. With one-of-a-kind anecdotes from his life and career, as well as stories from historical and contemporary masters of power, including Winston Churchill, Napoleon Bonaparte, Warren Buffett, Michael Jordon, Oprah, and Elon Musk, Simmons crafts a persuasive and provocative theory on how the pursuit of power drives civilization and defines our lives. The rules of power are changing in today's fast-paced, hyper-connected world in a way that Machiavelli never could have imagined, and we all need to learn to adapt. Simmons tells readers: Ignore the negatives. Be unrelenting. Rise above the rest. You are the architect of your success.
