Peer Coaching to Enrich Professional Practice, School Culture, and Student Learning Pam Robbins, 2015-05-19 How can educators work together more effectively to improve professional practice in a way that enhances student performance? The answer, says author Pam Robbins, involves combining collaborative activities and peer coaching—teachers supporting teachers. This book describes how any school can implement these proven practices and experience positive

changes in teaching, school culture, and learning. Robbins explains how to develop a collaborative, learning-focused culture and build trust among colleagues; offers strategies for participating in difficult conversations that yield useful feedback; clarifies how to develop, sustain, and evaluate peer coaching efforts; and showcases exemplary peer coaching practices used in real schools. She also includes coaching tools, scenarios, process guidelines, and reflection questions that make it easier to transfer these ideas into a school setting. Peer coaching offers a job-embedded learning strategy; it's a valuable structure for supporting schoolwide and districtwide priorities such as analyzing data, improving instruction, integrating technology, and implementing standards. In short, it creates an effective way to support the growth of every teacher and enrich learning processes in any school. Pam Robbins is a former teacher, coach, director of professional development, and school leader. She consults with high-performing and low-performing districts and designs and conducts workshops on leadership, school culture, organizational change, mentoring, and peer coaching.

The Army's Professional Military Ethic in an Era of Persistent Conflict Don M. Snider, 2009

This essay offers a proposal for the missing constructs and language with which we can more precisely think about and examine the Army's Professional Military Ethic, starting with its macro context which is the profession's culture. We examine three major long-term influences on that culture and its core ethos, thus describing how they evolve over time. We contend that in the present era of persistent conflict, we are witnessing dynamic changes within these three influences. In order to analyze these changes, we introduce a more detailed framework which divides the Ethic into its legal and moral components, then divide each of these into their institutional and individual manifestations. Turning from description to analysis, we also examine to what extent, if any, recent doctrinal adaptations by the Army (FM 3-0, 3-24, and 6-22, etc.) indicate true evolution in the essential nature of the profession's Ethic. Then, we present what we believe to be the most significant ethical challenge facing the Army profession -- the moral development of Army leaders, moving them from 'values to virtues' in order that they, as Army professionals, can consistently achieve the high quality of moral character necessary to apply effectively and, in a trustworthy manner, their renowned military-technical competencies.--P. x

The Intercultural Professional Fiona O'Neill, 2020-08-18 This book considers what is at stake for professionals whose work increasingly involves communicating in linguistically and culturally diverse contexts, and argues for the need to better understand the crucial role of languages and cultures in the modern workplace. This book examines the ways in which professionals interpret and manage their experience of working within and across

languages and cultures in ways that create affordances for them, their professional practice, and those who depend on their knowledge and expertise. It will be relevant to undergraduate and postgraduate students undertaking studies in applied linguistics, sociolinguistics, intercultural education and professional communication in any discipline.

Meaningful Work Mike W. Martin, 2000-03-16 As commonly understood, professional ethics consists of shared duties and episodic dilemmas--the responsibilities incumbent on all members of specific professions joined together with the dilemmas that arise when these responsibilities conflict. Martin challenges this consensus paradigm as he rethinks professional ethics to include personal

commitments and ideals, of which many are not mandatory. Using specific examples from a wide range of professions, including medicine, law, high school teaching, journalism, engineering, and ministry, he explores how personal commitments motivate, guide, and give meaning to work.

Addiction and the Making of Professional Careers Griffith Edwards, Thomas F.

Babor, 2012-03-15 The misuse of drugs continues to cause suffering and worldwide economic turmoil. In response to these problems, many have devoted their lives to preventing the misuse of mind-altering substances. *Addiction and the Making of Professional Careers* focuses on the need for enhanced understanding of professional careers in the addiction field. The spectrum of professionals involved is wide and includes treatment personnel of every kind. Some of the questions examined here include: Why do some people decide to dedicate their lives to responding to drug problems? How do and should we select, train, mentor, support, inspire, and nurture the young career aspirant? What makes for the most effective use of talent? Is every personal case different or can general conclusions be reached? After a foreword by William Miller and an introduction by Griffith Edwards, the book includes interviews with Joseph Brady, Louis Harris, Conan Kornetsky, and Robert DuPont, all of whom were pioneers in the behavioral pharmacological analysis of addiction. Commentary chapters are written by Kerstin Stenius, Ilana Crome, Peter Anderson, and Jonathan Chick.
