Rover Andrew Grant,2017-10-01 In 2009, Andrew Grant began photographing dogs, starting with two French bulldogs at an unrelated commercial -shoot-. Then he discovered the sad fact that millions of lost or abandoned dogs enter animal shelters every year. And only a few leave, through rescue and adoption. The rest are euthanized or live out a lonely, caged life. Andrew Grant began to photograph dogs that should be rescued, and dogs that have been rescued. Over 6 years he raised nearly \$2 million for shelter dogs through his photographic project. He did this with the sale of four limited-edition books of dog portraits, each called Rover. Each was bigger than the previous, and helped by hundreds of sponsoring dog owners. Those editions are all sold out, and fetch up to \$400 on the rare book market -- when available. Most, though, are as treasured as their canine subjects. Now, Firefly Books is publishing a popularly-priced trade edition of Rover: Wagmore Edition. It contains 360 of Andrew Grant's most appealing photographs of dogs. Some are the best friends of lucky owners, and some, sadly, are homeless. All are splendidly realized in sharp, large and very lifelike color portraits. All were captured by state-of-the-art equipment and are truly the most beautiful dog pictures you have ever seen. They feature purebreds of almost every kind, and mixed breeds, too. Each dog's name is on its page. Each is looking intently at the reader. Firefly Books pledges a portion of the revenue from sales of Rover: Wagmore Edition to dog rescue.

Red Rover Christopher Krovatin,2021-03-02 Sit, stay, die. Dogs aren't always man's best friend. When Amy sees a dog stranded on the side of the highway, she knows what she has to do. She tells her dad to stop the car. She can't understand why anyone would abandon a dog in such a way, tied up and blindfolded. Amy's parents say they'll only keep the dog until they can find it a permanent home. Amy's younger sister names the dog Rover.They take Rover into their house, their family. And once he's there . . . he doesn't want to leave.Amy loves dogs. But she starts to worry when strange things start happening in the house.Objects move. Lights go off. Accidents happen.Soon man's best friend has turned into Amy's worst nightmare.The problem isn't Rover's bark or his bite - it's even creepier than that. This dog's purpose is evil . . . and it's waiting to be unleashed.

Rovers Richard Lange,2021-07-27 Two immortal brothers crisscross the American Southwest to elude a murderous biker gang and protect a young woman in this “utter triumph and delight” from award-winning author Richard Lange (Jonathan Ames, author of A Man Named Doll). Summer, 1976. Jesse and his brother, Edgar, are on the road in search of victims. They’re rovers, nearly indestructible nocturnal beings who must consume human blood in order to survive. For seventy years they’ve lurked on the fringes of society, roaming from town to town, dingy motel to dingy motel, stalking the transients, addicts, and prostitutes they feed on. This hard-boiled supernatural hell ride kicks off when the brothers encounter a young woman who disrupts their grim routine, forcing Jesse to confront his past and plunging his present into deadly chaos as he finds himself scrambling to save her life. The story plays out through the eyes of the brothers, a grieving father searching for his son’s murderer, and a violent gang of rover bikers, coming to a shattering conclusion in Las Vegas on the eve of America’s Bicentennial. Gripping, relentless, and ferocious, Rovers demonstrates once again why Richard Lange has been hailed as an

Mars Rover Curiosity Rob Manning, William L. Simon, 2014-10-21 The firsthand account of the trials and tribulations of engineering one of the most complex pieces of space technology, the Mars Rover Curiosity, by its chief engineer Rob Manning In the course of our enduring quest for knowledge about ourselves and our universe, we haven't found answers to one of our most fundamental questions: Does life exist anywhere else in the universe? Ten years and billions of dollars in the making, the Mars Rover Curiosity is poised to answer this all-important question. In Mars Rover Curiosity: An Inside Account from Curiosity's Chief Engineer, Rob Manning, the project's chief engineer, tells of bringing the groundbreaking spacecraft to life. Manning and his team at NASA's Jet Propulsion Laboratory, tasked with designing a lander many times larger and more complex than any before, faced technical setbacks, fights over inadequate resources, and the challenges of leading an army of brilliant, passionate, and often frustrated experts. Manning's fascinating personal account--which includes information from his exclusive interviews with leading Curiosity scientists--is packed with tales of revolutionary feats of science, technology, and engineering. Readers experience firsthand the disappointment at encountering persistent technical problems, the agony of near defeat, the sense of victory at finding innovative solutions to these problems, the sheer terror of staking careers and reputations on a lander that couldn't be tested on Earth, and the rush of triumph at its successful touchdown on Mars on August 5, 2012. This is the story of persistence, dedication, and unrelenting curiosity.

Red Rover Richard Ho, 2019-10-29 Red Rover is a gorgeously illustrated tale that explores the vast, inhospitable landscape of Mars and the adventures of the little rover that calls the planet its home. Mars has a visitor. It likes to roam... observe... measure... and collect. It explores the red landscape—crossing plains, climbing hills, and tracing the bottoms of craters—in search of water and life. It is not the first to visit Mars. It will not be the last. But it might be... the most curious. Join Curiosity on its journey across the red planet in this innovative and dynamic nonfiction picture book by Richard Ho, illustrated by Sibert Honor winner Katherine Roy. This title has Common Core connections.

Red And Rover Brian Basset,2002-04 Ten-year-old Red and his faithful canine companion, Rover, forged their fellowship in a gentler time, when friends were forever and loyalty was unquestioned. Red and Rover have an endearing partnership that brings them-and the strip's lucky readers-a measure of pure delight.

The Design and Engineering of Curiosity Emily Lakdawalla,2018-03-27 This book describes the most complex machine ever sent to another planet: Curiosity. It is a one-ton robot with two brains, seventeen cameras, six wheels, nuclear power, and a laser beam on its head. No one human understands how all of its systems and instruments work. This essential reference to the Curiosity mission explains the engineering behind every system on the rover, from its rocket-powered jetpack to its radioisotope thermoelectric generator to its fiendishly complex sample handling system. Its lavishly illustrated text explains how all the instruments work -- its cameras, spectrometers, sample-cooking oven, and weather station -- and describes the instruments' abilities and limitations. It tells you how the systems have functioned on Mars, and how scientists and engineers have worked around problems developed on a faraway planet: holey wheels and broken focus lasers. And it explains the grueling mission operations schedule that keeps the rover working day in and day out.

Move Over, Rover Karen Beaumont,2006 In this cumulative story, a fluffy, friendly dog named Rover makes room in his doghouse for a succession of animals seeking shelter from a thunderstorm.

Curiosity: The Story of a Mars Rover Markus Motum,2023-10-24 In his debut picture book, Motum brings the story of NASA's beloved Mars rover Curiosity to life in vivid color. Mars Rover Driver Scott Maxwell,2013-07-18 No one has yet visited Mars - at least, no humans have. Robot rovers have explored the surface of the Red Planet, and it's the job of people on Earth to control their every movement. Find out what's involved in being a rover driver, the tools and skills you need, and the difficulties of controlling something that's millions of miles away.

Seeing Like a Rover Janet Vertesi,2015-04-22 In the years since the Mars Exploration Rover Spirit and Opportunity first began transmitting images from the surface of Mars, we have become familiar with the harsh, rocky, rusty-red Martian landscape. But those images are much less straightforward than they may seem to a layperson: each one is the result of a complicated set of decisions and processes involving the large team behind the Rovers. With *Seeing Like a Rover*, Janet Vertesi takes us behind the scenes to reveal the work that goes into creating our knowledge of Mars. Every photograph that the Rovers take, she shows, must be processed, manipulated, and interpreted--and all that comes after team members negotiate with each other about what they should even be taking photographs of in the first place. Vertesi's account of the inspiringly successful Rover project reveals science in action, a world where digital processing uncovers scientific truths, where images are used to craft consensus, and where team members develop an uncanny intimacy with the sensory apparatus of a robot that is millions of miles away. Ultimately, Vertesi shows, every image taken by the Mars Rovers is not merely a picture of Mars--it's a portrait of the whole Rover team, as well.

Mars Rover Danielle Smith-Llera, 2017-07-01 Weighing as much as a small car, a rover named Curiosity rolls quietly around Mars. Scientific instruments pack its body and cluster at the end of a mechanical arm. An arrangement of lenses and instruments tops its mast, like a face. To the many NASA workers involved in Curiosity s mission on Mars, the rover is not simply a robot, but an astronaut bravely exploring an alien place. Curiosity s instruments collect data and its cameras take images of the Mars landscape, including self-portraits, in vivid color and detail. As it roams and explores, Curiosity will help find the answers to such age-old questions as has there ever been life on Mars? Could there be one day?

Lunar and Planetary Rovers Anthony Young, 2007-07-05 This book fills a need for a complete history of the Lunar Roving Vehicle used on Apollo 15, 16 and 17, drawing on many photographs never before published. It also tells the story of the robotic rovers used on Mars, and concludes with a description of the new designs of rovers planned for The New Vision for Exploration now underway at NASA.
