Even More Schedule for Sale Geoff Ryan P.M.P.,2017-08-25 Even More Schedule for Sale is the second guidebook by Geoff Ryan on the subject of construction productivity for industrial projects. It describes the step-by-step application of the industry's best practice of advanced work packaging and ties it into the logic from the first book, Schedule for Sale, on workface planning. As the name suggests, there is even more schedule to be gained over just getting the construction team organized (workface planning) by aligning engineering and procurement deliverables with the needs of construction (advanced work packaging). This transition of workface planning into advanced work packaging is the bigger picture of construction productivity and the natural evolution of the road map that leads to the right stuff, ending up in the right place, in the right sequence.

Integrated Cost and Schedule Control for Construction Projects Frederick W. Mueller,2012-12-06 Management and administrative processes within the construction industry have been undergoing major changes in the last several decades. These changes have involved significant adjustments in management science and management techniques, brought about by the need for contemporary valid information with which to manage the construction process. In short, management in the construction industry is changing significantly; change will continue at an accelerated pace at least through the next decade. The responses

required of construction industry management are now resulting in a movement away from an entrepreneurial management style to professional management techniques and procedures. THE COMPELLING ECONOMIC ISSUES The issues forcing these changes are economic. The rising costs of construction and of money are forcing the buyers of construction services to be more demanding. Their demands are for more construction economies, more production, and more productivity than at any time in the past. Nowhere has this been more evident than in the Business Roundtable on construction and in the response of the construction industry to it. To be successfully responsive, management in the construction industry will be required to use the best project management methods available for cost control, schedule control, and for financial and accounting controls. But responsive professional management can survive and will flourish within this more demanding economic environment.
