10 PRINT CHR\$(205.5+RND(1)); : GOTO 10 Nick Montfort, Patsy Baudoin, John Bell, Ian Bogost, Jeremy Douglass, 2014-08-29 A single line of code offers a way to understand the cultural context of computing. This book takes a single line of code—the extremely concise BASIC program for the Commodore 64 inscribed in the title—and uses it as a lens through which to consider the phenomenon of creative computing and the way computer programs exist in culture. The authors of this collaboratively written book treat code not as merely functional but as a text—in the case of *10 PRINT*, a text that appeared in many different printed sources—that yields a story about its making, its purpose, its assumptions, and more. They consider randomness and regularity in computing and art, the maze in culture, the popular BASIC programming language, and the highly influential Commodore 64 computer.

A New Program for Graphic Design David Reinfurt, 2019-09-17 A toolkit for visual literacy in the 21st century *A New Program for Graphic Design* is the first communication-design textbook expressly of and for the 21st century. Three courses--Typography, Gestalt and Interface--provide the foundation of this book. Through a series of in-depth historical case studies (from Benjamin Franklin to the Macintosh computer) and assignments that progressively build in complexity, *A New Program for Graphic Design* serves as a practical guide both for designers and for undergraduate students coming from a range of other disciplines. Synthesizing the pragmatic with the experimental, and drawing on the work of Max Bill, György Kepes, Bruno Munari and Stewart Brand (among many others), it builds upon mid- to late-20th-century pedagogical models to convey contemporary design principles in an understandable form for students of all levels--treating graphic design as a liberal art that informs the

dissemination of knowledge across all disciplines. For those seeking to understand and shape our increasingly networked world of information, this guide to visual literacy is an indispensable tool. David Reinfurt (born 1971), a graphic designer, writer and educator, reestablished the Typography Studio at Princeton University and introduced the study of graphic design. Previously, he held positions at Columbia University Graduate School of Architecture, Planning and Preservation, Rhode Island School of Design and Yale University School of Art. As a cofounder of O-R-G inc. (2000), Dexter Sinister (2006) and the Serving Library (2012), Reinfurt has been involved in several studios that have reimagined graphic design, publishing and archiving in the 21st century. He was the lead designer for the New York City MTA Metrocard vending machine interface, still in use today. His work is included in the collections of the Walker Art Center, Whitney Museum of American Art, Cooper Hewitt National Design Museum and the Museum of Modern Art. He is the co-author of Muriel Cooper (MIT Press, 2017), a book about the pioneering designer.
