Security Gina Wohlsdorf,2017-05-23 “Original and imaginative . . . Ripping suspense, sheer terror, and a wrenching love story.” –Sandra Brown, New York Times bestselling author of Friction The terrible truth about Manderley is that someone is always watching. Manderley Resort is a gleaming, new twenty-story hotel on the California coast. It’s about to open its doors, and the world—at least those with the means to afford it—will be welcomed into a palace of opulence and unparalleled security. But someone is determined that Manderley will never open. The staff has no idea that their every move is being watched, and over the next twelve hours they will be killed off, one by one. Writing in the tradition of Edgar Allan Poe and Stephen King, and with a deep bow to Daphne du Maurier, author Gina Wohlsdorf pairs narrative ingenuity and razor-wire prose with quick twists, sharp turns, and gasp-inducing terror. Security is grand guignol storytelling at its very best. A shocking thriller, a brilliant narrative puzzle, and a multifaceted love story unlike any other, Security marks the debut of a fearless and gifted writer. “Be surprised, be very surprised: Gina Wohlsdorf brings more than just plot twists and a terrifically tender love story to this thriller . . . It’s her playful homage to Hitchcock and du Maurier that had me reading, howling, and just plain loving this novel.” –Sara Gruen, author of At the Water’s Edge “Grand Hotel meets Psycho in the age of surveillance . . . Security is cinematically vivid, crisply written, and sharp enough to cut . . . Wohlsdorf brilliantly subverts our expectations of the action genre in this smart, shocking, poignant thriller.” –Emily Croy Barker, author of The Thinking Woman’s Guide to Real Magic “The thrill of this novel goes beyond its wickedly clever, split-screen, high-tech wizardry—a kind of video gamer’s literary retake of Hitchcock’s Rear Window—and emanates from its strange, disembodied narrator . . . The effect is terrifying, sexy, dizzying, and impossible to look away from.” –Tim Johnston, author of Descent “Shocking and filled with Tarantino-ish dark humor. . . . Structurally reminiscent of the amazing Jennifer Egan,Wohlsdorf’s book is certainly a hybrid, like nothing else. Get ready.” –Ann Beattie, author of The State We’re In “Flawless . . . Security is perfectly tuned for blockbuster status . . . They don’t make a hotel big enough to house all the people who will want to read this, and soon, as in Manderley, all eyes will be on Wohlsdorf.” –Daniel Kraus, Booklist, starred review

Road Map for National Security United States Commission on National Security/21st Century,2001 After our examination of the new strategic environment of the next quarter century (Phase I) and of a strategy to address it (Phase II), this Commission concludes that significant changes must be made in the structures and processes of the U.S. national security apparatus. Our institutional base is in decline and must be rebuilt. Otherwise, the United States risks losing its global influence and critical leadership role. We offer recommendations for organizational change in five key areas: ensuring the security of the American homeland; recapitalizing America's strengths in science and education; redesigning key institutions of the Executive Branch; overhauling the U.S. government's military and civilian personnel systems; and reorganizing Congress's role in national security affairs--Page xiii.

Airport Security Dr. Stacey L. Tyler,2017-05-09 Airport Security by Dr. Stacey L. Tyler Airport Security: Passenger Screening and Governance Post 9/11 provides knowledge of governance, terrorism, security, and democratic principles in the passenger screening processes by the Department of Homeland Security, Transportation Security Administration, and air carriers. This book identifies the inadequate security measure designs, resulting from legislation, implemented by the Transportation Security Administration (TSA), and the Department of Homeland Security (DHS). These security measures impose risk to our passengers daily as their principle provider of airport screening services. The author has over 20 years of professional experience in the airline industry. She started as a Ticketing Agent and progressed to General Manager for various airlines and vendor services. The truth is, despite current best practices and policies, dangerous items, and contraband continue to find its way past the screening areas of many airports and into secure areas. As a New Jersey Women Owned Small Business and Women-Owned Minority Business entrepreneur, The Interactive Intelligence Corporation is dedicated to assisting policy makers, administrators, and airport and airline management with examining and preventing the exploitation of weaknesses in the current system, increasing the efficiency and effectiveness in identifying and responding to emerging threats, and producing greater public satisfaction.

Assessment of the Bureau of Reclamation's Security Program National Research Council, Division on Engineering and Physical Sciences, Board on Infrastructure and the Constructed Environment, Committee on the Assessment of the Bureau of Reclamation's Security Program, 2008-12-13 The water impounded behind a dam can be used to generate power and to provide water for drinking, irrigation, commerce, industry, and recreation. However, if a dam fails, the water that would be unleashed has the energy and power to cause mass destruction downstream, killing and injuring people and destroying property, agriculture, industry, and local and regional economies. The U.S. Bureau of Reclamation (Reclamation) is responsible for managing and operating some of this nation's largest and most critical dams. The failure of one or more of these dams as the result of a malicious act would come with little warning and a limited time for evacuation. In the years since the 9/11 attacks, Reclamation has invested significant resources to establish and build a security program. Reclamation is now ready to evaluate the results of these efforts and determine how best to move forward to develop a security program that is robust and sustainable. This book assesses Reclamation's security program and determines its level of preparedness to deter, respond to, and recover from malicious acts to its physical infrastructure and to the people who use and manage it.

Harboring Data Andrea M. Matwyshyn, 2009-10-06 As identity theft and corporate data vulnerability continue to escalate, corporations must protect both the valuable consumer data they collect and their own intangible assets. Both Congress and the states have passed laws to improve practices, but the rate of data loss persists unabated and companies remain slow to invest in information security. Engaged in a bottom-up investigation, Harboring Data reveals the emergent nature of data leakage and vulnerability, as well as some of the areas where our current regulatory frameworks fall short. With insights from leading academics, information security professionals, and other area experts, this original work explores the business, legal, and social dynamics behind corporate information leakage and data breaches.
