Opportunistic Spectrum Sharing and White Space Access Oliver Holland, Hanna Bogucka, Arturas Medeisis, 2015-04-22 Details the paradigms of opportunistic spectrum sharing and white space access as effective means to satisfy increasing demand for high-speed wireless communication and for novel wireless communication applications This book addresses opportunistic spectrum sharing and white space access, being particularly mindful of practical considerations and solutions. In Part I, spectrum sharing implementation issues are considered in terms of hardware platforms and software architectures for realization of flexible and spectrally agile transceivers. Part II addresses practical mechanisms supporting spectrum sharing, including spectrum sensing for opportunistic spectrum access, machine learning and decision making capabilities, aggregation of spectrum opportunities, and spectrally-agile radio waveforms. Part III presents the ongoing work on policy and regulation for efficient and reliable spectrum sharing, including major recent steps forward in TV White Space (TVWS) regulation and associated geolocation database approaches, policy management aspects, and novel licensing schemes supporting spectrum sharing. In Part IV, business and economic aspects of spectrum sharing are considered, including spectrum value modeling, discussion of issues around disruptive innovation that are pertinent to opportunistic spectrum sharing and white space access, and business benefits assessment of the novel spectrum sharing regulatory proposal Licensed Shared Access. Part V discusses deployments of opportunistic spectrum sharing and white space access solutions in practice, including work on TVWS system implementations, standardization activities, and development and testing of systems according to the standards. Discusses aspects of pioneering standards such as the IEEE 802.22 “Wi-Far” standard, the IEEE 802.11af “White-Fi” standard, the IEEE Dynamic Spectrum Access Networks Standards Committee standards, and the ETSI Reconfiguration Radio Systems standards Investigates regulatory and regulatory-linked solutions assisting opportunistic spectrum sharing and white space access, including geo-location database approaches and licensing enhancements Covers the pricing and value of spectrum, the economic effects and potentials of such technologies, and provides detailed business assessments of some particularly innovative regulatory proposals The flexible and efficient use of radio frequencies is necessary to cater for the increasing data traffic demand worldwide. This book addresses this necessity through its extensive coverage of opportunistic spectrum sharing and white space access solutions. Opportunistic Spectrum Sharing and White Space Access: The Practical Reality is a great resource for telecommunication engineers, researchers, and students.

Case Studies on Access and Benefit-sharing ,

Access, Ownership, and Resource Sharing Sul H. Lee, 1994 Over 20 papers presented at a meeting in Montecito, CA, December 1988, discuss data accuracy for geographic information systems used in ecology, marketing, and other fields. They draw from a wide range of physical and human systems, taking approaches that vary from statistical to descriptive. Both a review of existing knowledge, techniques, and experience, and an analysis of critical research needs in the area of spatial data handling. Librarians and other related professionals identify issues involved in obtaining the resources and materials desired by library users and review concepts and projects in resource sharing. Highlights include a discussion of collection access and document delivery, and a view of how technology affects relations between publishers, libraries, and vendors. No index. Enhancing Access to and Sharing of Data Reconciling Risks and Benefits for Data Re-use across Societies OECD, 2019-11-26 This report examines the opportunities of enhancing access to and sharing of data (EASD) in the context of the growing importance of artificial intelligence and the Internet of Things. It discusses how EASD can maximise the social and economic value of data re-use and how the related risks and challenges can be addressed. It highlights the trade-offs, complementarities and possible unintended consequences of policy action – and inaction. It also provides examples of EASD approaches and policy initiatives in OECD countries and partner economies.

Access and Benefit Sharing of Genetic Resources, Information and Traditional Knowledge Charles Lawson, Michelle Rourke, Fran Humphries, 2022-10-14 Addressing the management of genetic resources, this book offers a new assessment of the contemporary Access and Benefit Sharing (ABS) regime. Debates about ABS have moved on. The initial focus on the legal obligations established by international agreements like the United Nations Convention on Biological Diversity and the form of obligations for collecting physical biological materials have now shifted into a far more complex series of disputes and challenges about the ways ABS should be implemented and enforced. These now cover a wide range of issues, including: digital sequence information, the repatriation of resources, technology transfer, traditional knowledge and cultural expressions, open access to information and knowledge, naming conventions, farmers’ rights, new schemes for accessing pandemic viruses sharing DNA sequences, and so on. Drawing together perspectives from an interdisciplinary range of leading and emerging international scholars, this book offers a new approach to the ABS landscape; as it breaks from the standard regulatory analyses in order to explore alternative solutions to the intractable issues for the Access and Benefit Sharing of genetic resources. Addressing these modern legal debates from a perspective that will appeal to both ABS scholars and those with broader legal concerns in the areas of intellectual property, food, governance, Indigenous issues, and so on, this book will be a useful resource for scholars and students as well as those in government and in international institutions working in relevant areas.

Biodiversity, Access and Benefit-Sharing Daniel F. Robinson, 2014-11-13 The Nagoya Protocol to the Convention on Biological Diversity (CBD) is rapidly receiving signatures and ratifications. Many countries are preparing to implement the protocol through national research permit systems and/or biodiversity laws. Yet there is still considerable confusion about how to implement the Protocol, regarding access and benefit-sharing (ABS) procedures, and minimal experience in many countries. This book seeks to remedy this gap in understanding by analysing a number of ABS case studies in light of the Nagoya Protocol. The case studies are wide-ranging, with examples of plants for medicinal, cosmetic, biotech and food products from or for development in Australia, North Africa, Madagascar, Switzerland, Thailand, USA and Oceania. These will encourage countries to develop national systems which maximise their benefits (both monetary and non-monetary) towards conservation and support for local communities that hold traditional knowledge. In addition, the author analyses new expectations raised by the Nagoya Protocol, such as the encouragement of the development of community protocols by indigenous and local communities. As a result, stakeholders and policy-makers will be able to learn the steps involved in establishing ABS agreements, issues that arise between stakeholders, and the types of benefits that might be realistic.

The Multilateral System of Access and Benefit-sharing Food and Agriculture Organization of the United Nations, 2022-01-05 The fourth educational module on the International Treaty focuses on the Multilateral System functions provides an overview of the legal and historical perspectives that lead to the development of the Multilateral System and the list of Annex I crops. It also illustrates the core concepts and articles of Section IV of the International Treaty. The first two lessons are aimed at a broad target learner group, especially at learners that are new to the Multilateral System. Lessons three and four contain practical elements related to the day-to-day operations and may be of interest to those exchanging material and involved in the planning and implementation of the Multilateral System at the national level. All lessons provide an extensive list of resources and references for further reading and learning. It has been designed to contribute to supporting the implementation of the International Treaty and also the Post-2020 Global Biodiversity Framework.

Marine Genetic Resources, Access and Benefit Sharing Bevis Fedder, 2013-05-29 Access to genetic resources and Benefit Sharing (ABS) has been promoted under the Convention on Biological Diversity, with the aim of combining biodiversity conservation goals with economic development. However, as this book shows, since its inception in 1992, implementation has encountered multiple challenges and obstacles. This is particularly so in the marine environment, where interest in genetic resources for pharmaceuticals and nutrients has increased. This is partly because of the lack of clarity of terminology, but also because of the terms of the comprehensive law of the sea (UNCLOS) and transboundary issues of delineating ownership of marine resources. The author explains and compares relevant provisions and concepts under ABS and the law of the sea taking access, benefit sharing, monitoring, compliance, and dispute settlement into consideration. He also provides an overview of the implementation status of ABS-relevant measures in user states and identifies successful ABS transactions. A key unique feature of the book is to illustrate how biological databases can serve as the central scientific infrastructure to implement the global multilateral benefit sharing mechanism, proposed by the Nagoya

Protocol. The research for this book was supported by both the Bremen International Graduate School for Marine Sciences (GLOMAR) and the International Research Training Group INTERCOAST – Integrated Coastal Zone and Shelf-Sea Research.

Sharing your work in open access Mishra, Sanjaya, Das, Anup Kumar, 2015-04-27 Traducción parcial de la Introducción: Este es el último módulo del curso sobre acceso abierto para investigadores. Se han visto diferentes cuestiones en torno al concepto de acceso abierto, su historia, sus ventajas, iniciativas, derechos de autor y licencias, y su impacto en el contexto de la comunicación académica. En este módulo con sólo dos unidades, tiene como objetivo ayudar al investigador a compartir su trabajo en acceso abierto en repositorios y revistas OA. El módulo tiene como objetivo: - Comprender el proceso de publicación en la difusión de trabajos académicos; - Elegir las revistas de acceso abierto y repositorios adecuados para el intercambio de resultados de la investigación - Utilizar los medios sociales para promover el trabajo de investigación personal y construir una reputación digital. En la Unidad 1, se discute el proceso de publicación de la investigación en cinco etapas: planificación, preparación, la etapa previa a la publicación, etapa de publicación y el estadio postpublicación. Haciendo hincapié en la importancia de los medios sociales para compartir y hacer un trabajo visible a los grupos objetivo. En la Unidad 2, se centra en como compartir la investigación a través de repositorios OA y Revistas. Los diferentes tipos de repositorios para seleccionar y destaca los pasos que un investigador puede considerar incluyendo el depósito en sus propios repositorios institucionales o en repositorios abiertos globales. Esta unidad también ofrece orientación sobre la elección de las revistas de acceso abierto más adecuadas, como la calidad de las publicaciones de OA es a menudo cuestionada. (Trad. Julio Alonso Arévalo. Univ. Salamanca).

Survey of access and benefit-sharing country measures accommodating the distinctive features of genetic resources for food and agriculture and associated traditional knowledge Food and Agriculture Organization of the United Nations, 2021-09-01 The Commission on Genetic Resources for Food and Agriculture, at its Seventeenth Regular Session, requested its Secretary to prepare for review by the intergovernmental technical working groups on animal, aquatic, forest and plant genetic resources to produce an up-to-date survey of existing legislative, administrative and policy approaches, including best practices, for ABS for the different subsectors of GRFA and traditional knowledge associated with GRFA held by indigenous peoples and local communities, with the aim of identifying typical approaches and lessons learned from their implementation, as well as challenges and possible solutions. The current survey comprises a baseline desktop review of legislation, policy and literature. It provides a review of how countries address the distinctive features of GRFA and TKGRFA based on the letter of their ABS legislative, administrative and policy measures rather than on how these measures have been implemented in practice. It therefore does not provide an analysis of the state of implementation, the challenges involved and possible solutions to these challenges. As such, it aims to provide a basis for future empirical research on how ABS measures work in practice for GRFA subsectors. A specific objective is to provide a typology of legislative, administrative and policy measures applying to ABS for GRFA and TKGRFA.

The 2010 Nagoya Protocol on Access and Benefit-sharing in Perspective Elisa Morgera, Matthias Buck, Elsa Tsioumani, 2012-11-21 The 2010 Nagoya Protocol on Access and Benefit-sharing in Perspective analyses the implications of this innovative environmental treaty for different areas of international law, and its implementation challenges in various regions and from the perspectives of various stakeholders.

Biodiversity Conservation Through Access and Benefit Sharing (ABS) Oommen V. Oommen, K. P. Laladhas, Prakash Nelliya, Balakrishna Pisupati, 2023-01-18 This book deals with the economic potentials of biodiversity and its capacity to support its own conservation aiming to provide livelihood for millions engaged in conservation, both now and for future generations. The book highlights the potentials of natural resources which are characterized as capital wealth (as defined in Convention on Biological Diversity (CBD)), to finance its own conservation and to provide livelihood means to people who conserve it. The book is divided into five Parts. PART I explains about the Premise of Access and Benefit Sharing (ABS), PART II describes about the Technology Transfer, PART III will provide details about the Access to Genetic Resources and to Associated Traditional Knowledge and Benefit Sharing PART IV is the Implementation of ABS Mechanisms and PART V is about ABS and Its Economics. This book will be of interest to biodiversity policy makers, administrators, university and college students, researchers, biodiversity conservationists.

Sharing Research Data to Improve Public Health in Africa National Academies of Sciences, Engineering, and Medicine, Division of Behavioral and Social Sciences and Education, Committee on Population, 2015-09-18 Sharing research data on public health issues can promote expanded scientific inquiry and has the potential to advance improvements in public health. Although sharing data is the norm in some research fields, sharing of data in public health is not as firmly established. In March 2015, the National Research Council organized an international conference in Stellenbosch, South Africa, to explore the benefits of and barriers to sharing research data within the African context. The workshop brought together public health researchers and epidemiologists primarily from the African continent, along with selected international experts, to talk about the benefits and challenges of sharing data to improve public health, and to discuss potential actions to guide future work related to public health research data sharing. Sharing Research Data to Improve Public Health in Africa summarizes the presentations and discussions from this workshop.

Cognitive Radio, Mobile Communications and Wireless Networks Mubashir Husain Rehmani, Riadh Dhaou, 2018-07-30 This book provides an overview of the latest research and development of new technologies for cognitive radio, mobile communications, and wireless networks. The

contributors discuss the research and requirement analysis and initial standardization work towards 5G cellular systems and the capacity problems it presents. They show how cognitive radio, with the capability to flexibly adapt its parameters, has been proposed as the enabling technology for unlicensed secondary users to dynamically access the licensed spectrum owned by legacy primary users on a negotiated or an opportunistic basis. They go on to show how cognitive radio is now perceived in a much broader paradigm that will contribute to solve the resource allocation problem that 5G requirements raise. The chapters represent hand-selected expanded papers from EAI sponsored and hosted conferences such as the 12th EAI International Conference on Mobile and Ubiquitous Systems, the 11th EAI International Conference on Heterogeneous Networking for Quality, Reliability, Security and Robustness, the 10th International Conference on Cognitive Radio Oriented Wireless Networks, the 8th International Conference on Mobile Multimedia Communications, and the EAI International Conference on Software Defined Wireless Networks and Cognitive Technologies for IoT.

Emerging Issues And Trends In Innovation And Technology Management Alexander Brem,2021-10-25 This book is a compilation of papers published in International Journal of Innovation and Technology Management. The chapters in the book focus on recent developments in the field of innovation and technology management. Carefully selected on the basis of relevance, rigor and research, the chapters in the book take the readers through various emerging topics and trends in the field.Written in a simple and accessible manner, the chapters in this book will be of interest to academics, practitioners and general public interested in knowing about emerging trends in innovation and technology management.

FAQs About SharingAccess Books

What is a SharingAccess PDF? A PDF (Portable Document Format) is a file format developed by Adobe that preserves the layout and formatting of a document, regardless of the software, hardware, or operating system used to view or print it. **How do I create a SharingAccess PDF?** There are several ways to create a PDF: Use software like Adobe Acrobat, Microsoft Word, or Google Docs, which often have built-in PDF creation tools. Print to PDF: Many applications and operating systems have a "Print to PDF" option that allows you to save a document as a PDF file instead of printing it on paper. Online converters: There are various online tools that can convert different file types to PDF. **How do I edit a SharingAccess PDF?** Editing a PDF can

be done with software like Adobe Acrobat, which allows direct editing of text, images, and other elements within the PDF. Some free tools, like PDFescape or Smallpdf, also offer basic editing capabilities. **How do I convert a SharingAccess PDF to another file format?** There are multiple ways to convert a PDF to another format: Use online converters like Smallpdf, Zamzar, or Adobe Acrobats export feature to convert PDFs to formats like Word, Excel, JPEG, etc. Software like Adobe Acrobat, Microsoft Word, or other PDF editors may have options to export or save PDFs in different formats. **How do I password-protect a SharingAccess PDF?** Most PDF editing software allows you to add password protection. In Adobe Acrobat, for instance, you can go to "File" -> "Properties" -> "Security" to set a password to restrict access or editing capabilities. Are there any free alternatives to Adobe Acrobat for working with PDFs? Yes, there are many free alternatives for working with PDFs, such as: LibreOffice: Offers PDF editing features. PDFsam: Allows splitting, merging, and editing PDFs. Foxit Reader: Provides basic PDF viewing and editing capabilities. How do I compress a PDF file? You can use online tools like Smallpdf, ILovePDF, or desktop software like Adobe Acrobat to compress PDF files without significant quality loss. Compression reduces the file size, making it easier to share and download. Can I fill out forms in a PDF file? Yes, most PDF viewers/editors like Adobe Acrobat, Preview (on Mac), or various online tools allow you to fill out forms in PDF files by selecting text fields and entering information. Are there any restrictions when working with PDFs? Some PDFs might have restrictions set by their creator, such as password protection, editing restrictions, or print restrictions. Breaking these restrictions might require specific software or tools, which may or may not be legal depending on the circumstances and local laws.
