The Coder Habits Rafael Gomez Blanes, 2020-10-19 A good programmer not only writes code but also incorporates routines, tricks, and attitudes into his day-to-day life that allow him to be more productive, more creative, and an even better professional. Repeat and assume them as something natural until they become habits and, only then, you will go to the next level. The only thing that

distinguishes a good professional from another in the crowd are their habits. It is not necessary to work many more hours, but to do it with more efficiency, productivity and more concentration. Do not generate software with so many bugs but rather develop better with good design and clean code practices. Adopt the necessary 'soft-skills' for a programmer. Nor it is necessary to exert yourself to exhaustion, but to really assume the habits of an expert and more valued programmer. And so on until you complete the thirty-nine pills of wisdom described in this book that will take you several steps beyond your career. By the author of The Black Book of the Programmer.

Accounting: A Smart Approach Mary Carey, Cathy Knowles, Jane Towers-Clark, 2014 Covering all the accounting topics a non-specialist needs to know, this text provides a fresh, innovative approach to accounting which will engage students and truly bring the subject to life.

Hacking Essentials Adidas Wilson, Originally, the term “hacker” referred to a programmer who was skilled in computer operating systems and machine code. Today, it refers to anyone who performs hacking activities. Hacking is the act of changing a system’s features to attain a goal that is not within the original purpose of the creator. The word “hacking” is usually perceived negatively especially by people who do not understand the job of an ethical hacker. In the hacking world, ethical hackers are good guys. What is their role? They use their vast knowledge of computers for good instead of malicious reasons. They look for vulnerabilities in the computer security of organizations and businesses to prevent bad actors from taking advantage of them. For someone that loves the world of technology and computers, it would be wise to consider an ethical hacking career. You get paid (a good amount) to break into systems. Getting started will not be a walk in the park—just as with any other career. However, if you are determined, you can skyrocket yourself into a lucrative career. When you decide to get started on this journey, you will have to cultivate patience. The first step for many people is usually to get a degree in computer science. You can also get an A+ certification (CompTIA)—you must take and clear two different exams. To be able to take the qualification test, you need to have not less than 500 hours of experience in practical computing. Experience is required, and a CCNA or Network+ qualification to advance your career.
