Adam Tooze

Shutdown Adam Tooze, 2021-09-07 This book's great service is that it challenges us to consider the ways in which our institutions and systems, and the assumptions, positions and divisions that undergird them, leave us ill prepared for the next crisis.—Robert Rubin, The New York Times Book Review Full of valuable insight and telling details, this may well be the best thing to read if you want to know what happened in 2020. --Paul Krugman, New York Review of Books Deftly weaving finance, politics, business, and the global human experience into one tight narrative, a tour-de-force account of 2020, the year that changed everything--from the acclaimed author of *Crashed*. The shocks of 2020 have been great and small, disrupting the world economy, international relations and the daily lives of virtually everyone on the planet. Never before has the entire world economy contracted by 20 percent in a matter of weeks nor in the historic record of modern capitalism has there been a moment in which 95 percent of the world's economies were suffering all at the same time. Across the world hundreds of millions have lost their jobs. And over it all looms the specter of pandemic, and death. Adam Tooze, whose last book was universally lauded for guiding us coherently through the chaos of the 2008 crash, now brings his bravura analytical and narrative skills to a panoramic and synthetic overview of our current crisis. By focusing on finance and business, he sets the pandemic story in a frame that casts a sobering new light on how unprepared the world was to fight the crisis, and how deep the ruptures in our way of living and doing business are. The virus has attacked the economy with as much ferocity as it has our health, and there is no vaccine arriving to address that. Tooze's special gift is to show how social organization, political interests, and economic policy interact with devastating human consequences, from your local hospital to the World Bank. He moves fluidly from the impact of currency fluctuations to the decimation of institutions--such as health-care systems, schools, and social services--in the name of efficiency. He starkly analyzes what happened when the pandemic collided with domestic politics (China's party conferences; the American elections), what the unintended consequences of the vaccine race might be, and the role climate change played in the pandemic. Finally, he proves how no unilateral declaration of 'independence or isolation can extricate any modern country from the global web of travel, goods, services, and finance.

Shutdown Heather Anastasiu,2013-07-02 Zoe's only remaining option to save humanity from the cruel Chancellor is to infiltrate the Community on her own and upend the Link system, freeing the world from the hardware that controls their thoughts and emotions, and hope it will trigger a revolution.

Shutdown of the Federal Government Congressional Research Service,2019-01-02 When federal agencies and programs lack funding after the expiration of full-year or interim appropriations, the agencies and programs experience a funding gap. If funding does not resume in time to continue government operations, then, under the Antideficiency Act, an agency must cease operations, except in certain situations when law authorizes continued activity. Funding gaps are distinct from shutdowns, and the criteria that flow from the Antideficiency Act for determining which activities are affected by a shutdown are complex. Failure of the President and Congress to reach agreement on full-year or interim funding measures occasionally has caused shutdowns of affected federal government activities. The longest such shutdown lasted 21 full days during FY1996, from December 16, 1995, to January 6, 1996. More recently, a relatively long funding gap commenced on October 1, 2013, the first day of FY2014, after funding for the previous fiscal year expired. Because funding did not resume on October 1, affected agencies began to cease operations and furlough personnel that day. A 16-full-day shutdown ensued, the first to occur in over 17 years. Subsequently, two comparatively brief shutdowns occurred during FY2018, in January and February 2018, respectively. Government shutdowns have necessitated furloughs of several hundred thousand federal employees, required cessation or reduction of many government activities, and affected numerous sectors of the economy. This report discusses causes of shutdowns, including the legal framework under which they may occur; processes related to how agencies may plan for the contingency of a shutdown; effects of shutdowns, focusing especially on federal personnel and government operations; and issues related to shutdowns that may be of interest to Congress.

Hollywood Shutdown Kate Fortmueller,2021-07-20 By March 2020, the spread of COVID-19 had reached pandemic proportions, forcing widespread shutdowns across industries, including Hollywood. Studios, networks, production companies, and the thousands of workers who make film and television possible were forced to adjust their time-honored business and labor practices. In this book, Kate Fortmueller asks what happened when the coronavirus closed Hollywood. *Hollywood Shutdown* examines how the COVID-19 pandemic affected film and television production, influenced trends in distribution, reshaped theatrical exhibition, and altered labor practices. From January movie theater closures in China to the bumpy September release of *Mulan* on the Disney+ streaming platform, Fortmueller probes various choices made by studios, networks, unions and guilds, distributors, and exhibitors during the evolving crisis. In seeking to explain what happened in the first nine months of 2020, this book also considers how the pandemic will transform Hollywood practices in the twenty-first century.

Enlisting the seasoned abilities of FBI Agent Brent McClaine, they launch an investigation that spans two continents. From Silicon Valley to the ruthless Far East markets, Erika and Brent must combine their computer and field talents before the next shutdown. Shutdown at Youngstown Terry F. Buss, F. Stevens Redburn, 1983-06-30 In spite of the gravity of the problem of mass unemployment and its periodic recurrence in industrial societies, few scientific studies have been undertaken which serve to define the impact of plant closings on workers, families, and the community; to evaluate individual group, or community responses to closings; and to offer suggestions for the future. Shutdown at Youngstown meets this need. It presents the findings of a multidisciplinary, scientific study of the closing of the steel mills in Youngstown in 1977 which put 5,000 persons out of work. Research reported in the text is based on personal interviews, social indicator data, and data from health and human service agencies. The authors conclude by developing a public policy for dealing with plant closings and the crisis of mass unemployment.
