Boarding School Blues Clifford E. Trafzer, Jean A. Keller, Lorene Sisquoc, 2006-01-01 An in depth look at boarding schools and their effect on the Native students.

Un sisma da non dimenticare Sergio Madonini, Andrea Ottonello, 2017-06-01 Ancora oggi la dimensione del disastro è visibile in alcuni luoghi ed è testimoniata anche dalla continua opera di ricostruzione che i dati elaborati e analizzati da Regione Lombardia ben inquadrano. Eppure questo sisma sembra dimenticato o peggio che non sia mai avvenuto. Nei media nazionali il terremoto del 2012 è quello dell'Emilia, regione colpita certamente quanto e più dei nostri territori. Ciò non toglie che anche il mantovano si sia trovato ad affrontare un evento quasi impensabile, scontando a volte questa "dimenticanza". Per questo l'Anci Lombardia è spesso intervenuta ottenendo la giusta considerazione verso il territorio mantovano nelle misure legislative.

Bonus Casa: Ristrutturazioni e Sisma bonus 2017 Stefano Setti, 2017-07-28 Con la Legge di Bilancio 2017 sono stati prorogati per tutto il 2017 i consueti "bonus casa" e per meglio dire: bonus ristrutturazioni, bonus mobili, bonus risparmio energetico. Inoltre, la citata Legge di Bilancio 2017 ha stabilito il potenziamento degli incentivi per la riqualificazione energetica e per gli adeguamenti antisismici. Il presente e-book analizza, con taglio operativo, le caratteristiche delle agevolazioni fiscali previste per: gli interventi di ristrutturazione edile; interventi antisismici in zone ad alta pericolosità acquisto mobili e grandi elettrodomestici L'e-book dà anche spazio all'applicazione del sisma bonus, per la cui concreta operatività è stato emanato il D.M. 28 febbraio 2017, n. 58 (modificato dal D.M. 7 marzo 2017, n. 65).

Dopo il sisma. Cronache da L'Aquila: 6 aprile 2009 - 2014 Emanuela Medoro, 2014-03-26 Leggere le riflessioni di Emanuela Medoro è come muoversi rapidamente in una pinacoteca, fermarsi e poi fare un passo indietro per mettere a fuoco un dipinto osservato troppo in fretta, e dei particolari dai significati troppo profondi per essere compresi a prima vista. Un pittore non ha bisogno di gridare per far sentire forte la sua voce, lo fanno le sue immagini con i colori, le sfumature dei tratti, le infinite letture che sa dare ai suoi personaggi, ai paesaggi, alle nature morte. Gli scritti su L'Aquila hanno la raffinatezza e l'eleganza dei dipinti del cinquecento, meno sacri di quelli medievali, meno opulenti di quelli del barocco. Nelle sue immagini sono raffigurate in secondo piano volgarità come le false aspettative, i padroni dell'informazione, gli interessati incoraggiamenti alla ricostruzione. E a differenza dei molti che raccontano forzatamente la sciagura come una opportunità di rinnovamento, si invita all'ascolto di ciò che le macerie hanno da raccontare, da insegnare, da tramandare: un monito intriso di dolcezza, un monito imponente che viene prima di ogni scelta innovativa per la ricostruzione, capace di destare le coscienze indifferenti perfino di fronte a quelle scellerate rotaie metropolitane che stavano per flagellare una schiena così fiera da non inchinarsi neanche di fronte alle truppe di occupazione.

Progetto, memoria e futuro dei luoghi post-sisma Giorgia De Pasquale, Dopo il terremoto, all'interno delle trasformazioni necessarie alla sopravvivenza delle comunità locali, il progetto, sia esso di architettura o di paesaggio, riveste un ruolo importante perché è l'unico strumento che permette di preservare le storie, i silenzi, le luci, i profumi, i colori, le gestualità che rappresentano la memoria dei luoghi stessi. È l'unico strumento, in altre parole, in grado di poter mantenere vivo il senso di attaccamento e di appartenenza di una comunità agli spazi della quotidianità. Questo volume raccoglie le proposte progettuali sviluppate, in collaborazione con l'Amministrazione comunale di Borbona, durante il Laboratorio di Progettazione Architettonica della Laurea Magistrale in Architettura Restauro del Dipartimento di Architettura dell'Università degli Studi di Roma Tre nell'a.a. 2018-2019 e nell'a.a. 2019-2020. La prima parte del volume è dedicata alle lezioni dei docenti invitati durante il corso a riflettere sul rapporto tra architettura contemporanea e patrimonio storico. La seconda parte contiene le proposte progettuali redatte dagli studenti al fine di introdurre nell'antico quartiere Lama nuove funzioni e nuovi usi che possano invertire i forti processi di abbandono, spopolamento e senilizzazione attualmente in corso.

China Satellite Navigation Conference (CSNC) 2012 Proceedings Jiadong Sun, Jingnan Liu, Yuanxi Yang, Shiwei Fan, 2012-04-02 Proceedings of the 3rd China Satellite Navigation Conference (CSNC2012) presents selected research papers from CSNC2012, held on 15-19 May in Guanzhou, China. These papers discuss the technologies and applications of the Global Navigation Satellite System (GNSS), and the latest progress made in the China BeiDou system especially. They are divided into 9 topics to match the corresponding sessions in CSNC2012, which broadly covered key topics in GNSS. Readers can learn about the BeiDou system and keep abreast of the latest advances in GNSS techniques and applications. SUN Jiadong is the Chief Designer of the Compass/BeiDou system, and the Academician of Chinese Academy of Sciences; LIU Jingnan is a professor at Wuhan University, and the Academician of Chinese Academy of Engineering; YANG Yuanxi is a professor at China National Administration of GNSS and Applications, and the Academician of Chinese Academy of Sciences; FAN Shiwei is a researcher on satellite navigation.

Governance Feminism Janet Halley, Prabha Kotiswaran, Rachel Rebouché, Hila Shamir, 2019-03-26 An interdisciplinary, multifaceted look at feminist engagements with governance across the global North and global South *Governance Feminism: Notes from the Field* brings together nineteen chapters from leading feminist scholars and activists to critically describe and assess contemporary feminist engagements with state and state-like power. Gathering examples from North America, South America, Europe, Asia, and the Middle East, it complements and expands on the companion volume *Governance Feminism: An Introduction*. Its chapters argue that governance feminism (GF) is institutionally diverse and globally distributed—emerging from traditional sites of state power as well as from various forms of governance and operating at the grassroots level, in the private sector, in civil society, and in international relations. The book begins by confronting the key role that crime and punishment play in GFeminist projects. Here, contributors explore the ideological and political conditions under which this branch of GF became so robust and rethink the carceral turn. Other chapters speak to another face of GFeminism: feminists finding, in mundane and seemingly unspectacular bureaucratic tools, leverage to bring about change in policy and governance practices. Several contributions highlight the political, strategic, and ethical challenges that feminists and LGBT activists must negotiate to play on the governmental field. The book concludes with a focus on feminist interventions in postcolonial legal and political orders, looking at new policy spaces opened up by conflict, postconflict, and occupation. Providing a clear, cross-cutting, critical lens through which to map developments in feminist governance around the world, *Governance Feminism: Notes from the Field* makes sense of the costs and benefits of current feminist realities to reimagine feminist futures. Contributors: Libby Adler, Northeastern U; Aziza Ahmed, Northeastern U; Elizabeth Bernstein, Barnard College; Amy J. Cohen, Ohio State U; Karen Engle, U of Texas at Austin; Jacob Gersen, Harvard U; Leigh Goodmark, U of Maryland; Aeyal Gross, Tel Aviv U; Aya Gruber, U of Colorado, Boulder; Janet Halley, Harvard U; Rema Hammami, Birzeit U, Palestine; Vanja Hamzić, U of London; Isabel Cristina Jaramillo-Sierra; Prabha Kotiswaran, King's College London; Maleiha Malik, King's College London; Vasuki Nesiah, New York U; Dianne Otto, Melbourne Law School; Helen Reece; Darren Rosenblum, Pace U; Jeannie Suk Gersen, Harvard U; Mariana Valverde, U of Toronto.

Disasters and Changes in Society and Politics Giuseppe Forino, 2024-01-16 From earthquakes to oil spills, Italy is recurrently affected by different kinds of disasters. This book brings a critical perspective to post-disaster reconstruction and recovery, which can impact in both the short- and long- term upon society, politics and organisations. It is often assumed that disaster-hit areas return to normality or even build back better thanks to the interventions of experts. Giuseppe Forino considers the complexities of disaster recovery and the sometimes radical changes in individual and collective behaviours that persist following such events. Bringing together the impacts of natural hazards (including climate change and the COVID-19 pandemic), this edited book will stimulate debate on policy and practice in disaster recovery.

Recent Issues in Pattern Analysis and Recognition Virginio Cantoni,Reiner

Creutzburg,Stefano Levialdi,Gottfried Wolf,1989-12-20 This book offers readers a broad view of research in some Western and Eastern European countries on pattern and signal analysis, and on coding, handling and measurement of images. It is a selection of refereed papers from two sources: first, a satellite conference within the biannual International Conference on Pattern Recognition held in Rome, November 14-17, 1988, and second, work done at the International Basic Laboratory on Image Processing and Computer Graphics, Berlin, GDR. The papers are grouped into three sections. The first section contains new proposals for the specific computation of particular features of digital images and the second section is devoted to the introduction and testing of general approaches to the solution of problems met in digital geometry, image coding, feature extraction and object classification. The third section illustrates some recent practical results obtained on real images specifically in character and speech recognition as well as in biomedicine. All the techniques illustrated in this book will find direct application in the near future. This book should interest and stimulate the reader, provoke new thoughts and encourage further research in this widely appealing field.
