Who Geoff Smart, Randy Street, 2008-09-30 In this instant New York Times Bestseller, Geoff Smart and Randy Street provide a simple, practical, and effective solution to what The Economist calls “the single biggest problem in business today”: unsuccessful hiring. The average hiring mistake costs a company \$1.5 million or more a year and countless wasted hours. This statistic becomes even more startling when you consider that the typical hiring success rate of managers is only 50 percent. The silver lining is that “who” problems are easily preventable. Based on more than 1,300 hours of interviews with more than 20 billionaires and 300 CEOs, Who presents Smart and Street’s A Method for Hiring. Refined through the largest research study of its kind ever undertaken, the A Method stresses fundamental elements that anyone can implement—and it has a 90 percent success rate. Whether you’re a member of a board of directors looking for a new CEO, the owner of a small business searching for the right people to make your company grow, or a parent in need of a new babysitter, it’s all about Who. Inside you’ll learn how to • avoid common “voodoo hiring” methods • define the outcomes you seek • generate a flow of A Players to your team—by implementing the #1 tactic used by successful businesspeople • ask the right interview questions to dramatically improve your ability to quickly distinguish an A Player from a B or C candidate • attract the person you want to hire, by emphasizing the points the candidate cares about most In business, you are who you hire. In Who, Geoff Smart and Randy Street offer simple, easy-to-follow steps that will put the right people in place for optimal success.

Data Smart John W. Foreman, 2013-10-31 Data Science gets thrown around in the press like it's magic. Major retailers are predicting everything from when their customers are pregnant to when they want a new pair of Chuck Taylors. It's a brave new world where seemingly meaningless data can be transformed into valuable insight to drive smart business decisions. But how does one exactly do data science? Do you have to hire one of these priests of the dark arts, the data scientist, to extract this gold from your data? Nope. Data science is little more than using straight-forward steps to process raw data into actionable insight. And in Data Smart, author and data scientist John Foreman will show you how that's done within the familiar environment of a spreadsheet. Why a spreadsheet? It's comfortable! You get to look at the data every step of the way, building confidence as you learn the tricks of the trade. Plus, spreadsheets are a vendor-neutral place to learn data science without the hype. But don't let the Excel sheets fool you. This is a book for those serious about learning the analytic techniques, the math and the magic, behind big data. Each chapter will cover a different technique in a spreadsheet so you can follow along: Mathematical optimization, including non-linear programming and genetic algorithms Clustering via k-means, spherical k-means, and graph modularity Data mining in graphs, such as outlier detection Supervised AI through logistic regression, ensemble models, and bag-of-words models Forecasting, seasonal adjustments, and prediction intervals through monte carlo simulation Moving from spreadsheets into the R programming language You get your hands dirty as you work alongside John through each technique. But never fear, the topics are readily applicable and the author laces humor throughout. You'll even learn what a dead squirrel has to do with optimization modeling, which you no doubt are dying to know.

Are You Smart, Or What? Pasqual J. Battaglia, Pat Battaglia, 2001 Are You Smart, or What? A Bizarre Book of Games & Fun for Everyone, is loaded with word games that will both amaze and amuse readers of all ages. The games are highly clever and fun to solve. They're challenging, yet lighthearted. Answers may elude you at first, but when you discover them you'll wonder why they didn't dawn on you sooner. The games are even more fun when you quiz your family and friends. The fun is contagious! No wonder Bill Cosby endorsed it by stating, “Cleverly presented to tease, intrigue, and challenge. Naturally I scored off the charts!”

Book Smart Anne E. Cunningham, PhD, Jamie Zibulsky, 2014 In Book Smart: How to Support Successful, Motivated Readers, the experience of reading together is used as a vehicle for discussing the varied yet interconnected language and literacy skills that jumpstart the career of a successful reader.

Getting Smart Tom Vander Ark, 2011-09-20 A comprehensive look at the promise and potential of online learning In our digital age, students have dramatically new learning needs and must be prepared for the idea economy of the future. In Getting Smart, well-known global education expert Tom Vander Ark examines the facets of educational innovation in the United States and abroad. Vander Ark makes a convincing case for a blend of online and onsite learning, shares inspiring stories of schools and programs that effectively offer personal digital learning opportunities, and discusses what we need to do to remake our schools into smart schools. Examines the innovation-driven world, discusses how to combine online and onsite learning, and reviews smart tools for learning Investigates the lives of learning professionals, outlines the new employment bargain, examines online universities and smart schools Makes the case for smart capital, advocates for policies that create better learning, studies smart cultures

The Smart Culture Robert L. Hayman, 1998 Interweaving engaging narratives with dramatic case studies, Robert L. Hayman, Jr., has written a history of intelligence that will forever change the way we think about who is smart and who is not. To give weight to his assertion that intelligence is not simply an inherent characteristic but rather reflects the interests and predispositions of those doing the measuring, Hayman traces numerous campaigns to classify human intelligence. His tour takes us through the early craniometric movement, eugenics, the development of the IQ, Spearman's general intelligence, and more recent works claiming a genetic basis for intelligence differences.

Tour:Smart Martin Atkins, 2007-09 From packing the right equipment to keeping enough gas in the tank to get home, every aspect of making a successful tour with a band is addressed in this comprehensive guide. More than 100 luminaries and leading organizations from the world of touring—among them Chris Connelly, Henry Rollins, the House of Blues, and the Vans Warped Tour, as well as club owners, tour managers, and even sex advisors—provide handy insider know-how along with insight on mistakes commonly made by novice bands. Chapters address the nitty-gritty of touring, with instructions on how to secure venues and publicity, how to stay healthy on the road, and how to keep the budget in the black. Loaded with hundreds of years' worth of collective hands-on experience from those steeped in the music business, this is a must-have resource for creating an unforgettable tour.

Too Smart Jathan Sadowski, 2020-03-24 Who benefits from smart technology? Whose interests are served when we trade our personal data for convenience and connectivity? Smart technology is everywhere: smart umbrellas that light up when rain is in the forecast; smart cars that relieve drivers of the drudgery of driving; smart toothbrushes that send your dental hygiene details to the cloud. Nothing is safe from smartification. In Too Smart, Jathan Sadowski looks at the proliferation of smart stuff in our lives and asks whether the tradeoff—exchanging our personal data for convenience and connectivity—is worth it. Who benefits from smart technology? Sadowski explains how data, once the purview of researchers and policy wonks, has become a form of capital. Smart technology, he argues, is driven by the dual imperatives of digital capitalism: extracting data from, and expanding control over, everything and everybody. He looks at three domains colonized by smart technologies' collection and control systems: the smart self, the smart home, and the smart city. The smart self involves more than self-tracking of steps walked and calories burned; it raises questions about what others do with our data and how they direct our behavior—whether or not we want them to. The smart home collects data about our habits that offer business a window into our domestic spaces. And the smart city, where these systems have space to grow, offers military-grade surveillance capabilities to local authorities. Technology gets smart from our data. We may enjoy the conveniences we get in return (the refrigerator says we're out of milk!), but, Sadowski argues, smart technology advances the interests of corporate technocratic power—and will continue to do so unless we demand oversight and ownership of our data.

smART Amy E. Herman, 2022-10-25 I Spy and Where's Waldo? get a revolutionary twist in this “fun, eye-opening” (Booklist) interactive book that teaches young readers how to fully engage their brains to think critically and creatively. What would you say if I told you that looking at art could give you the confidence you need to speak up in class? Or that learning the history of donuts could help you think like a super spy and train like the CIA? smART teaches readers how to process information using paintings, sculptures, and photographs using methods that instantly translate to real world situations and are also fun! With three simple steps (1) How to SEE, (2) How to THINK about what you see, and (3) How to TALK about what you see, readers learn how to think critically and creatively, a skill that only requires you to open your eyes and actively engage your brain.

Things That Make Us Smart Don Norman, 2014-12-02 By the author of THE DESIGN OF EVERYDAY THINGS. Insightful and whimsical, profoundly intelligent and easily accessible, Don Norman has been exploring the design of our world for decades, exploring this complex relationship

between humans and machines. In this seminal work, fully revised and updated, Norman gives us the first steps towards demanding a person-centered redesign of the machines we use every day. Humans have always worked with objects to extend our cognitive powers, from counting on our fingers to designing massive supercomputers. But advanced technology does more than merely assist with memory—the machines we create begin to shape how we think and, at times, even what we value. In *THINGS THAT MAKE US SMART*, Donald Norman explores the complex interaction between human thought and the technology it creates, arguing for the development of machines that fit our minds, rather than minds that must conform to the machine.

Time Smart Ashley Whillans, 2020-10-06 There's an 80 percent chance you're poor. Time poor, that is. Four out of five adults report feeling that they have too much to do and not enough time to do it. These time-poor people experience less joy each day. They laugh less. They are less healthy, less productive, and more likely to divorce. In one study, time stress produced a stronger negative effect on happiness than unemployment. How can we escape the time traps that make us feel this way and keep us from living our best lives? *Time Smart* is your playbook for taking back the time you lose to mindless tasks and unfulfilling chores. Author and Harvard Business School professor Ashley Whillans will give you proven strategies for improving your time affluence. The techniques Whillans provides will free up seconds, minutes, and hours that, over the long term, become weeks and months that you can reinvest in positive, healthy activities. *Time Smart* doesn't stop at telling you what to do. It also shows you how to do it, helping you achieve the mindset shift that will make these activities part of your everyday regimen through assessments, checklists, and activities you can use right away. The strategies Whillans presents will help you make the shift to time-smart living and, in the process, build a happier, more fulfilling life.

You Are Not So Smart David McRaney, 2012-11-06 Explains how self-delusion is part of a person's psychological defense system, identifying common misconceptions people have on topics such as caffeine withdrawal, hindsight, and brand loyalty.

The Cult of Smart Fredrik deBoer, 2020-08-04 Named one of *Vulture's* Top 10 Best Books of 2020! Leftist firebrand Fredrik deBoer exposes the lie at the heart of our educational system and demands top-to-bottom reform. Everyone agrees that education is the key to creating a more just and equal world, and that our schools are broken and failing. Proposed reforms variously target incompetent teachers, corrupt union practices, or outdated curricula, but no one acknowledges a scientifically-proven fact that we all understand intuitively: Academic potential varies between individuals, and cannot be dramatically improved. In *The Cult of Smart*, educator and outspoken leftist Fredrik deBoer exposes this omission as the central flaw of our entire society, which has created and perpetuated an unjust class structure based on intellectual ability. Since cognitive talent varies from person to person, our education system can never create equal opportunity for all. Instead, it teaches our children that hierarchy and competition are natural, and that human value should be based on intelligence. These ideas are counter to everything that the left believes, but until they acknowledge the existence of individual cognitive differences, progressives remain complicit in keeping the status quo in place. This passionate, voice-driven manifesto demands that we embrace a new goal for education: equality of outcomes. We must create a world that has a place for everyone, not just the academically talented. But we'll never achieve this dream until the *Cult of Smart* is destroyed.

Playing Smart Julian Togelius, 2019-01-15 A new vision of the future of games and game design, enabled by AI. Can games measure intelligence? How will artificial intelligence inform games of the future? In *Playing Smart*, Julian Togelius explores the connections between games and intelligence to offer a new vision of future games and game design. Video games already depend on AI. We use games to test AI algorithms, challenge our thinking, and better understand both natural and artificial intelligence. In the future, Togelius argues, game designers will be able to create smarter games that make us smarter in turn, applying advanced AI to help design games. In this book, he tells us how. Games are the past, present, and future of artificial intelligence. In 1948, Alan Turing, one of the founding fathers of computer science and artificial intelligence, handwrote a program for chess. Today we have IBM's Deep Blue and DeepMind's AlphaGo, and huge efforts go into developing AI that can play such arcade games as Pac-Man. Programmers continue to use games to test and develop AI, creating new benchmarks for AI while also challenging human assumptions and cognitive abilities. Game design is at heart a cognitive science, Togelius reminds us—when we play or design a game, we plan, think spatially, make predictions, move, and assess ourselves and our performance. By studying how we play and design games, Togelius writes, we can better understand how humans and machines think. AI can do more for game design than providing a skillful opponent. We can harness it to build game-playing and game-designing AI agents, enabling a new generation of AI-augmented games. With AI, we can explore new frontiers in learning and play.

How to Take Smart Notes Sönke Ahrens, 2022-03-11 This is the second, revised and expanded edition. The first edition was published under the slightly longer title *How to Take Smart Notes. One Simple Technique to Boost Writing, Learning and Thinking - for Students, Academics and Nonfiction Book Writers*. The key to good and efficient writing lies in the intelligent organisation of ideas and notes. This book helps students, academics and other knowledge workers to get more done, write intelligent texts and learn for the long run. It teaches you how to take smart notes and ensure they bring you and your projects forward. The *Take Smart Notes* principle is based on established psychological insight and draws from a tried and tested note-taking technique: the Zettelkasten. This is the first comprehensive guide and description of this system in English, and not only does it explain how it works, but also why. It suits students and academics in the social sciences and humanities, nonfiction writers and others who are in the business of reading, thinking and writing. Instead of wasting your time searching for your notes, quotes or references, you can focus on what really counts: thinking, understanding and developing new ideas in writing. Dr. Sönke Ahrens is a writer and researcher in the field of education and social science. He is the author of the award-winning book *“Experiment and Exploration: Forms of World Disclosure”* (Springer). Since its first publication, *How to Take Smart Notes* has sold more than 100,000 copies and has been translated into seven languages.

The Smart Wife Yolande Strengers, Jenny Kennedy, 2020-09-01 A bold dive into the problematic development (and developers) of smart wives--feminized digital assistants who are friendly, sometimes flirty, docile, efficient, occasionally glitchy, and perpetually available. Meet the Smart Wife--at your service, an eclectic collection of feminized AI, robotic, and smart devices. This digital assistant is friendly and sometimes flirty, docile and efficient, occasionally glitchy but perpetually available. She might go by Siri, or Alexa, or inhabit Google Home. She can keep us company, order groceries, vacuum the floor, turn out the lights. A Japanese digital voice assistant--a virtual anime hologram named Hikari Azuma--sends her master helpful messages during the day; an American sexbot named Roxxy takes on other kinds of household chores. In *The Smart Wife*, Yolande Strengers and Jenny Kennedy examine the emergence of digital devices that carry out wifework--domestic responsibilities that have traditionally fallen to (human) wives. They show that the principal prototype for these virtual helpers--designed in male-dominated industries--is the 1950s housewife: white, middle class, heteronormative, and nurturing, with a spick-and-span home. It's time, they say, to give the Smart Wife a reboot.

Are You Smart Enough? Alexander W. Astin, 2023-07-03 This book explores the many ways in which the obsession with “being smart” distorts the life of a typical college or university, and how this obsession leads to a higher education that shortchanges the majority of students, and by extension, our society’s need for an educated population. The author calls on his colleagues in higher education to return the focus to the true mission of developing the potential of each student: However “smart” they are when they get to college, both the student and the college should be able to show what they learned while there. Unfortunately, colleges and universities have embraced two very narrow definitions of smartness: the course grade and especially the standardized test. A large body of research shows that it will be very difficult for colleges to fulfill their stated mission unless they substantially broaden their conception to include student qualities such as leadership, social responsibility, honesty, empathy, and citizenship. Specifically, the book grapples with issues such as the following: • Why America’s 3,000-plus colleges and universities have evolved into a hierarchical pecking order, where institutions compete with each other to recruit “smart” students, and where a handful of elite institutions at the top of the pecking order enroll the “smartest” students. • Why higher education favors its smartest students to the point where the “not so smart” students get second-class treatment. • Why so many colleges find it difficult to make good on their commitment to affirmative action and “equality of opportunity.” • Why college faculties tend to value being smart more than developing students’ smartness (i.e., teaching and learning).

I Am Smart Suzy Capozzi,2022-10-11 The Positive Power early reader series introduces self-esteem and empathy to budding young readers. I Am Smart is a fun and encouraging story about making good choices. Now a part of the premier early reading line, Step into Reading! When a young boy's teacher announces that there will be a science fair in a few weeks, he is worried. He doesn't like science. But by doing research, asking his friends for help instead of going out to play soccer, and not giving up, he learns that making smart choices leads to success. In this installment of the Positive Power series, kids will learn the affirmation I am smart through a relatable story of dedication and perseverance. Through simple text and joyful illustrations, this installment in the Positive Power series inspires kids to make smart choices while giving them the confidence they need to transform from little to BIG readers. Step 2 Readers use basic vocabulary and short sentences to tell simple stories, for children who recognize familiar words and can sound out new words with help. Rhyme and rhythmic text paired with picture clues help children decode the story.
