Advances in Artificial and Human Intelligence in the Modern Era Rajest, S. Suman,Singh, Bhopendra,Obaid, Ahmed J.,Regin, R.,Chinnusamy, Karthikeyan,2023-09-11 In the realm of psychological and brain sciences, there is a growing urgency to refine individual performance using personalized interventions that account for unique cognitive and biological attributes. Yet, the quest for such tailored approaches has proven challenging, as conventional methods often fall short. The limited integration of domain expertise and human judgment curtails the potential of artificial intelligence (AI) in effectively optimizing human performance, particularly in areas like customized training, health monitoring, and cognitive enhancement. Bridging the gap between AI capabilities and the specific requirements of individuals becomes crucial in meeting this rising demand. Advances in Artificial and Human Intelligence in the Modern Era present a transformative solution to tackle the prevailing challenges at the intersection of AI and human performance enhancement. This book delves deeply into the latest empirical research, literature reviews, and methodological advancements to introduce precision AI techniques for personalized interventions. By examining how the amalgamation of domain expertise and human insights can enhance AI performance, the book establishes a comprehensive framework for modeling individual distinctions and devising effective, tailored AI approaches. Tailored for academic scholars and researchers in psychological and brain sciences, computer science, and related fields, this book provides a comprehensive exploration of pioneering advancements in the convergence of artificial and human intelligence. Its diverse chapters encompass a wide array of topics, including the identification of mental health concerns, integration of human intelligence into AI tools, enhancement of reliability, and exploration of data standards. As it fuses expertise from these two disciplines, the book paves the way for a new era of personalized interventions with the potential to revolutionize human cognitive enhancement, training, and overall well-being.

Epidemiology of Injury in Adventure and Extreme Sports Travis W. Heggie,Dennis John Caine,2012 The first comprehensive examination of injuries associated with adventure and extreme sports This book reviews the existing data on the frequency and distribution of injuries and the factors contributing to injuries in adventure and extreme sports. Further, it suggests injury prevention strategies and provides recommendations for future research. Providing the first comprehensive compilation of epidemiological data over a range of new age sports considered to be adventurous and extreme, this publication is also the first of its kind to track down all of the major literature associated with the topic. A uniform and evidence-based approach to organizing and interpreting the literature is used in all chapters. All of the sport-specific chapters are laid out with the same basic headings making it easier for the reader to find common information across chapters. Sports physicians, physical therapists, recreation managers, researchers, injury prevention specialists, the adventure and extreme sport industry, and the adventure and extreme sport participants themselves will find the book useful in identifying problem areas in which appropriate preventive measures can be initiated to reduce the risk and severity of injuries. They will also want to use the book as a source for future research related to injuries in adventure and extreme sports.

Subaqueous Mass Movements and Their Consequences A. Georgiopolou,L.A. Amy,S. Benetti,J.D Chaytor,M.A. Clare,D. Gamboa,P.D.W. Haughton,J. Moernaut,J.J. Mountjoy,2020-07-08 This GSL volume focuses on underwater or subaqueous landslides with the overarching goal of understanding how they affect society and the environment. The new research presented here is the result of significant advances made over recent years in directly monitoring submarine landslides, in standardising global datasets for quantitative analysis, constructing a global database, and leading international research projects. This volume demonstrates the breadth of investigation taking place into subaqueous landslides, and shows that while events like the recent ones in the Indonesian archipelago can be devastating they are at the smaller end of what the Earth has experienced in the past. Understanding the spectrum of subaqueous landslide processes, and therefore the potential societal impact, requires research across all spatial and temporal scales. This volume delivers a compilation of state-of-the-art papers covering topics from regional landslide databases to advanced techniques for in situ measurements, to numerical modelling of processes and hazards.

Diving and Subaquatic Medicine Fourth Edition Robyn Walker,John Pennefather,2005 Now in it's fourth edition, Diving and Subaquatic Medicine remains the leading text on diving medicine. This completely revised edition covers the newly described diseases of diving medicine, the modern types of diving and diving equipment, free and indigenous diving, as well as updating the previous edition's coverage of established diving disorders. Each medical disorder is discussed from an historical, aetiological, clinical, pathological, preventative and therapeutic perspective in the accessible but informative style that has made the previous editions so popular. The principal disciplines addressed - diving medicine, occupational medicine and aquatic medicine - mean that the volume is vital reading for physicians, paramedics, navies, diving organisations and medical students at all levels. Those who know the book will waste no time in acquiring this update; those new to the text will soon find it a must for the personal bookshelf.
